Salesforce B2C-Commerce-Architect Certification Exam concentrate on material which incorporates a rundown of the multitude of points and an outline making sense of the general subject.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q37-Q42):

NEW QUESTION # 37

While validating a LINK Cartridge for inclusion into the solution, an Architect notices that the UNK cartridge documentation requires the Architect to add a script node to a Pipeline in the storefront cartridge. The script is also a valid CommonJS module. Which approach can the Architect use to Integrate this cartridge into a site that uses Controllers only?

- A. Add the script that is required via an `import$Script` statement in the Controller, add the appropriate arguments, and execute the correct method.
- **B. Add the script that is required via a `require` statement in the Controller, add the appropriate arguments, and execute the correct method.**
- C. Add the script that is required via a `Module`, `exports` statement in the Controller add the appropriate arguments, and execute the correct method.
- D. Copy and paste the script that is required directly into the Controller, add the appropriate arguments, then execute the correct method

**Answer: B**

Explanation:

In a site using Controllers, the most efficient way to integrate a script from a LINK cartridge that is also a valid CommonJS module is by using a `require` statement. This method enables the Architect to modularly load the necessary script, passing in any arguments that the script needs to function correctly within the existing Controller framework. This approach maintains modularity and adherence to the CommonJS module pattern, making it the most suitable for seamless integration.

### NEW QUESTION # 38

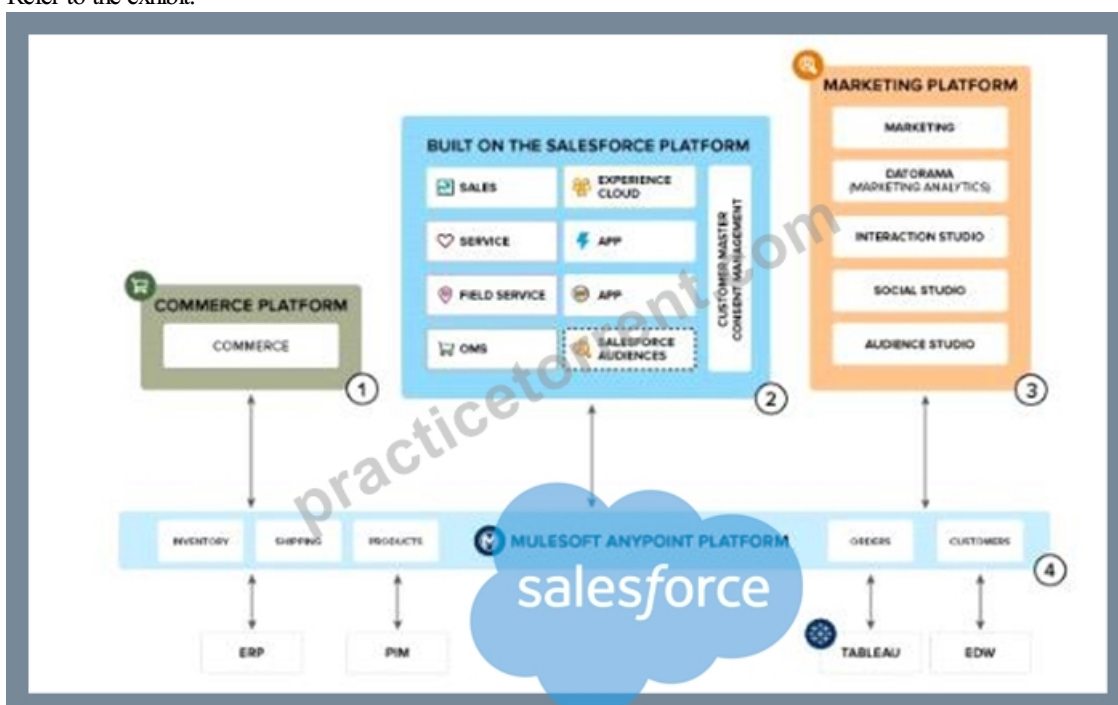

A retail company currently uses 62C Commerce and Marketing Cloud to enable a seamless customer experience. They are evaluating tools to better support customer service activities like their call center for online ordering and social customer service. Which two functionalities should a Solution Architect discuss with the company to explain the value of Service Cloud? Choose 2 answers

- **A. Ability to allow the agent to see purchase history to support case management**
- **B. Ability to de-duplicate and create a single customer identity.**
- C. Ability to have a customer leave a journey when they have an escalated case.
- D. Ability to create a B2C storefront using Digital Experiences.

**Answer: A,B**

### NEW QUESTION # 39

Refer to the exhibit.

A company plans to adopt Salesforce for a number of their needs, including an internal CRM, a public B2C Commerce storefront

with order management functionality, and an extensible API framework to integrate with other systems, as well as marketing automation. The overall system landscape of the proposed solution is shown above.

Which three considerations are important for this scenario? Choose 3 answers

- A. Salesforce products, including Sales Cloud, Service Cloud, Experience Cloud, and Order Management System (OMS) run on the same physical platform and share a common data model.
- B. The Salesforce Platform can be used for customer master and consent management, or it can Integrate with a third-party Master Data Management system.
- C. Order Management System (OMS) is a B2C Commerce product but it does not run natively on the core Salesforce Platform.
- D. Marketing Cloud enables personalization, journey orchestration, and cross-channel messaging.
- E. Tableau requires MuleSoft in order to access data outside of the Salesforce Platform.

Answer: A,D,E

#### NEW QUESTION # 40

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort?

- A. The Architect should check to see If the LINK cartridge has been updated already, integrate It, apply the customisations, and test thoroughly.
- B. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.
- C. The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.
- D. The Architect should update all the deprecated API cats in the already integrated LINK cartridge and test thoroughly.

Answer: D

#### NEW QUESTION # 41

There Is an Issue with the site when the domain Is opened from Google search results. After researching the problem. It turns out that the site returns \* 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add dynamic catch-all rule to redirect to home page.
- B. Add this snippet to the aliases configuration for the domain

```
{  
  "controller": "Home-Show"  
  "apply-to-host-only-request-with-params": "true"  
}
```

- C. Add this snippet to the aliases configuration for the domain:

```
{  
  "pipeline": "Home-Show"  
  "apply-to-host-only-request-with-params": "true"  
}
```

- D. Add dynamic redirect if the URL contains parameter to Home Show.  
Add this snippet to the aliases configuration for the domain

Answer: C
