How to study the Certificate of Cloud Security Knowledge (CCSK) Exam

The CSA Security Guidelines for Sensitive Areas of Focus in Cloud Computing v4, English edition, ENISA Report 'Cloud Computing: Advantages, Threats and Recommendations for Information Security' is the body of knowledge for the CCSK review.

Several resources are available for study. To get a solid understanding of the course contents, we recommend checking out the **CCSK exam dumps** available at the certificate-questions website that can be accessed via the link at the bottom of this document. The CSA Security Guidance can be accessed from here and is the definitive guide to keeping the cloud safe for your company. As an ever-evolving technology, the rise of cloud computing brings with it a range of opportunities and challenges. This paper offers both guidance and encouragement to support business objectives while managing and minimizing the risks associated with cloud

computing technology adoption. This new edition covers developments in cloud, security, and technology support; focuses on cloud security activities in the real world; integrates the latest CSA research projects; and provides guidelines for relevant technologies.

The Cloud Controls Matrix (CCM) can be accessed from here. The CSA Cloud Controls Matrix (CCM) offers a comprehensive understanding of the concepts and values of security consistent with the domains of Security Guidelines v.4. It offers basic security concepts to direct cloud vendors as they build service offerings and assist prospective cloud customers in determining a cloud provider's overall security risk.

Cloud Security Alliance offers self-study materials, online and in person training for the exam so definitely check out and complete these training. The **CCSK practice exams** available have proven to be the best learning materials and have ensured unbelievable passing rates in the past years. So definitely check out the **CCSK exam dumps** before you appear for the exam.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which one of the following is the key tool of Cloud Governance?

- A. Business Impact Analysis(BIA)
- B. Auditor Selection
- C. Data classification
- **D. Contracts**

Answer: D

Explanation:

The primary tool of governance is the contract between a cloud provider and a cloud customer (this is true for public and private cloud). The contract is your only guarantee of any level of service or commitment Ref: CSA Security Guidance V4.0

NEW QUESTION # 65

Which of the following items is NOT an example of Security as a Service (SecaaS)?

- A. Web filtering
- B. Spam filtering
- C. Authentication
- D. Intrusion detection
- **E. Provisioning**

Answer: E

NEW QUESTION # 66

Which of the following pair represents Storage used in IaaS infra-structure?

- **A. Volume and object storage**
- B. Raw and long-term storage
- C. Structured and Unstructured Storage
- D. CDN and Ephemeral

Answer: A

Explanation:

IaaS uses the following storage types:

Volume storage: A virtual hard drive that can be attached to a virtual machine instance and be used to host data within a file System, Volumes attached to IaaS instances behave just like a physical drive or an array does. Examples include VMware Virtual Machine File System (VMFS), Amazon Elastic Block Store (EBS), RackSpace Redundant Array of Independent Disks (RAID), and OpenStack Cinder.

Object storage: Similar to a file share accessed via APIs or a web interface. Examples include Amazon S3 and Rackspace cloud files.

NEW QUESTION # 67

Which one is NOT considered as one of the building blocks of the cloud computing?

- A. RAM
- B. Networking
- **C. Clock**
- D. CPU

Answer: C

Explanation:

The question is asking for an exception by using "NOT"

The building blocks of cloud computing are composed of random access memory (RAM), the central processing unit (CPU), storage, and networking.

NEW QUESTION # 68

What of the following is NOT an essential characteristic of cloud computing?

- A. Resource Pooling
- B. Rapid Elasticity
- **C. Third Party Service**
- D. Measured Service
- E. Broad Network Access

Answer: C
