HashiCorp Certified: Terraform Associate (003) (HCTA0-003) latest study material & Terraform-Associate-003 valid vce exam & HashiCorp Certified: Terraform Associate (003) (HCTA0-003) pdf vce demo

With many advantages such as immediate download, simulation before the real test as well as high degree of privacy, our Terraform-Associate-003 actual exam survives all the ordeals throughout its development and remains one of the best choices for those in preparation for exams. Many people have gained good grades after using our Terraform-Associate-003 real test, so you will also enjoy the good results. Don't hesitate any more. Time and tide wait for no man. Now that using our Terraform-Associate-003 practice materials have become an irresistible trend, why don't you accept it with pleasure?

HashiCorp Terraform-Associate-003 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Develop collaborative Terraform workflows: In this section, candidates are tested for their skills related to managing the Terraform binary, providers, and modules using version constraints and setting up remote states. It also covers the utilization of the Terraform workflow in automation.
Topic 2	<ul style="list-style-type: none">Create, maintain, and use Terraform modules: In this section of the exam, candidates are tested for creating a module, using a module in configuration, and topics such as refactoring an existing configuration into modules.
Topic 3	<ul style="list-style-type: none">Manage resource lifecycle: The section covers topics such as Initializing a configuration using terraform init and its options and generating an execution plan using terraform plan and its options. It also covers the configuration changes using Terraform Apply and its options.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q126-Q131):

NEW QUESTION # 126

Variables declared within a module are accessible outside of the module.

- A. True
- B. False

Answer: B

Explanation:

Explanation

Variables declared within a module are only accessible within that module, unless they are explicitly exposed as output values.

NEW QUESTION # 127

What does this code do?

```
terraform { required_providers { aws = ">= 3.0" } }
```

- A. Requires any version of the AWS provider ≥ 3.0
- B. Requires any version of the AWS provider > 3.0
- C. Requires any version of the AWS provider ≥ 3.0 and < 4.0
- D. Requires any version of the AWS provider ≥ 3.0 major release. like 4.1

Answer: C

Explanation:

From the Terraform Provider Requirements:

" ≥ 3.0 " means any version greater than or equal to 3.0- including 4.x and beyond.

* A (wrong): Would need ≥ 3.0 , < 4.0

* C/D (wrong): $>$ excludes 3.0 - not what's written.

NEW QUESTION # 128

You are working on some new application features and you want to spin up a copy of your production deployment to perform some quick tests. In order to avoid having to configure a new state backend, what open source Terraform feature would allow you create multiple states but still be associated with your current code?

- A. Terraform data sources
- B. None of the above
- C. Terraform modules

- D. Terraform local values
- E. Terraform workspaces

Answer: E

Explanation:

Terraform workspaces allow you to create multiple states but still be associated with your current code. Workspaces are like "environments" (e.g. staging, production) for the same configuration. You can use workspaces to spin up a copy of your production deployment for testing purposes without having to configure a new state backend. Terraform data sources, local values, and modules are not features that allow you to create multiple states. Reference = Workspaces and How to Use Terraform Workspaces

NEW QUESTION # 129

Which of the following is not a benefit of adopting infrastructure as code?

- A. Automation
- B. A Graphical User Interface
- C. Versioning
- D. Reusability of code

Answer: B

Explanation:

Infrastructure as Code (IaC) provides several benefits, including the ability to version control infrastructure, reuse code, and automate infrastructure management. However, IaC is typically associated with declarative configuration files and does not inherently provide a graphical user interface (GUI). A GUI is a feature that may be provided by specific tools or platforms built on top of IaC principles but is not a direct benefit of IaC itself.

References = The benefits of IaC can be verified from the official HashiCorp documentation on "What is Infrastructure as Code with Terraform?" provided by HashiCorp Developer1.

NEW QUESTION # 130

What is the Terraform style convention for indenting a nesting level compared to the one above it?

- A. With a tab
- B. With three spaces
- C. With four spaces
- D. With two spaces

Answer: D

Explanation:

This is the Terraform style convention for indenting a nesting level compared to the one above it. The other options are not consistent with the Terraform style guide.

NEW QUESTION # 131

.....

The SureTorrent HashiCorp Certified: Terraform Associate (003) (HCTA0-003) (Terraform-Associate-003) exam dumps are ready for quick download.
