Simplified Document Sharing and Accessibility With Juniper JN0-336 PDF (Dumps)

BONUS!!! Download part of TestPassed JN0-336 dumps for free: https://drive.google.com/open?id=1pEmMxFaWboYP-KL9uqSmbrG_AhX3VtpX

If you want to be familiar with the real exam before you take it, you should purchase our Software version of the JN0-336 learning guide. With our software version of JN0-336 exam material, you can practice in an environment just like the real examination. And please remember this version can only apply in the Windows system. You can install the JN0-336 Study Material test engine to different computers as long as the computer is in Windows system.

Of course, when you are seeking for exam materials, it is certain that you will find many different materials. However, through investigation or personal experience, you will find TestPassed questions and answers are the best ones for your need. The candidates have not enough time to prepare the exam, while TestPassed certification training materials are to develop to solve the problem. So, it can save much time for us. What's more important, 100% guarantee to pass Juniper JN0-336 Exam at the first attempt. In addition, TestPassed exam dumps will be updated at any time. If exam outline and the content change, TestPassed can provide you with the latest information.

Juniper JN0-336 Dumps Material Formats

In order to serve you better, we have a complete system for JN0-336 exam materials. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. If you want the JN0-336 exam dumps after trying, just add to cart and pay for it. You will receive the downloading link and password within ten minutes and you can start your learning right now. If you don't receive, contact us, and we will check it for you. After you purchasing JN0-336 Exam Materials, we also have after-sales, and if you have any questions, you can consult us.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q22-Q27):

NEW QUESTION # 22
Which two statements are correct about a reth LAG? (Choose two.)

- A. Links must use the same cable type
- B. You should have two or more interfaces.
- C. You must have a "minimum-links" statement value of two.
- D. Links must have the same speed and duplex setting.

Answer: B,D

Explanation:

A reth LAG is a redundant Ethernet link aggregation group that combines multiple physical interfaces into a single logical interface in a chassis cluster. A reth LAG provides load balancing and redundancy for traffic within or between redundancy groups. Two statements that are correct about a reth LAG are:

Links must have the same speed and duplex setting: To form a reth LAG, the physical interfaces must have the same speed and duplex setting. This ensures that the links can operate at the same capacity and avoid performance issues or errors.

You should have two or more interfaces: To create a reth LAG, you need to have at least two physical interfaces. One interface should be connected to node 0 and the other interface should be connected to node 1. You can also have more than two interfaces in a reth LAG for increased bandwidth and redundancy.

Reference: = Configuring Redundant Ethernet Interfaces, [Understanding Redundant Ethernet Interfaces]

NEW QUESTION # 23

While working on an SRX firewall, you execute the show security policies policy-name <name> detail command.
Which function does this command accomplish?

- A. It displays details about the default security policy.
- B. It shows the system log files for the local SRX Series device.
- C. It shows policy counters for a configured policy.
- D. It identifies the different custom policies enabled.

Answer: C

Explanation:

The function that the show security policies policy-name <name> detail command accomplishes is showing policy counters for a configured policy. Policy counters are statistics that indicate how many times a policy has been matched by traffic and what actions have been taken by the policy. Policy counters can help you monitor and troubleshoot the performance and effectiveness of your security policies. The show security policies policy-name <name> detail command displays detailed information about a specific policy, such as its source zone, destination zone, description, state, hit count, byte count, packet count, action count, and session count.

Reference: = show security policies, show security policies information, [SRX] How to troubleshoot a security policy that is not passing data

NEW QUESTION # 24

Exhibit

When trying to set up a server protection SSL proxy, you receive the error shown.
What are two reasons for this error? (Choose two.)

- A. The SSL proxy certificate ID is part of a blocklist.
- B. The SSL proxy certificate ID does not exist.
- C. The SSL proxy certificate ID is for a forwarding proxy.
- D. The SSL proxy certificate ID does not have the correct renegotiation option set.

Answer: B,D

Explanation:

The error message shown in the exhibit regarding the SSL proxy setup indicates an issue with the type of server certificate being used. The error explicitly states, "Unsupported cert type of server certid." Here are two plausible reasons for this error based on the options provided:

Option B. The SSL proxy certificate ID does not have the correct renegotiation option set.

This option points to a configuration issue related to the properties or capabilities of the certificate, such as renegotiation, which if not set correctly according to the expected requirements of the SSL proxy, might lead to the certificate being unsupported.

Renegotiation settings are critical in ensuring secure connections, and mismatches in configuration can result in errors.

Option D. The SSL proxy certificate ID does not exist.
If the certificate ID being referred to in the SSL proxy profile does not exist in the device's certificate store or is incorrectly referenced, the system will be unable to apply the configuration, leading to an error during the commit operation. This situation would typically result in an error indicating that the system can't find or recognize the specified certificate ID.

NEW QUESTION # 25

You want to use IPS signatures to monitor traffic.
Which module in the AppSecure suite will help in this task?

- **A. AppFW**
- B. AppTrack
- C. AppQoS
- D. APPID

Answer: A

Explanation:
The AppFW module in the AppSecure suite provides IPS signatures that can be used to monitor traffic and detect malicious activities. AppFW also provides other security controls such as Web application firewall, URL filtering, and application-level visibility.

NEW QUESTION # 26

Which two statements about SRX Series device chassis clusters are true? (Choose two.)

- A. Redundancy group 0 is only active on the cluster backup node.
- **B. Each chassis cluster member device can host active redundancy groups**
- C. Each chassis cluster member requires a unique cluster ID value.
- **D. Chassis cluster member devices must be the same model.**

Answer: B,D

Explanation:
In a chassis cluster, both nodes can host active redundancy groups. The active redundancy groups can be distributed between the two nodes, depending on the configuration and failover status, allowing each node to handle traffic for different sets of services or interfaces.
For the chassis clustering to function correctly, both nodes in the cluster must be of the same model.
This requirement ensures that the hardware capabilities, such as processing power and interface compatibility, are identical, which is crucial for maintaining consistent performance and behavior between cluster nodes.

NEW QUESTION # 27

......

Only by regular practice can you ingest more useful information than others, Success Ensured with JN0-336 100% Money Back Guarantee, It is universally acknowledged that everyone JN0-336 yearns for passing the exam in the first time if he/she participates in the exam.

High-Efficient JN0-336 Exam Dumps: Security, Specialist (JNCIS-SEC) and preparation materials - TestPassed

Each buyer can share close and warm customer service all year round if purchasing our JN0-336: Security, Specialist (JNCIS-SEC) dumps.
