One such trustworthy point about exam preparation material is that it first gains your trust, and then asks you to purchase it. Everyone can get help from ExamTorrent's free demo of ISTQB CTAL\_TM\_001 exam questions. Our ISTQB Certified Tester Advanced Level - Test Manager exam questions never remain outdated! Take a look at our Free ISTQB CTAL\_TM\_001 Exam Questions And Answers to check how perfect they are for your exam preparation. Once you buy it, you will be able to get free updates for ISTQB Certified Tester Advanced Level - Test Manager exam questions for up to 1 year.

## ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q120-Q125):

### NEW QUESTION # 120

You are testing a new product that will turn on the windshield wipers of a car when the sensors detect there is moisture on the windshield. Depending on the information returned from the sensors, the wipers will be turned on at one of the following speeds: slow intermittent, medium intermittent, fast intermittent, slow constant, medium constant, fast constant. Your team has identified the following test condition:

Test Condition 1.1.1 - Verify that the windshield wipers can go from slow constant to fast constant speed when the amount of

moisture increases appropriately.

Your team has defined the following steps for a test case for this test condition:

1. Set the moisture sensor to request slow constant
2. Increase the moisture to set the sensor to request fast constant
3. Verify that the wipers respond with fast constant speed

Given this information, which of the following statements is correct? [2]

- **A. The test case is traceable to the test condition and provides 100% statement coverage of the defined test condition.**
- B. There is not enough information in the test condition to define a test case.
- C. This test case is not traceable to the test condition.
- D. This test case is traceable to the test condition and provides 100% requirements coverage of the defined test condition.

**Answer: A**

Explanation:

The correct answer is D. The test case is traceable to the test condition and provides 100% statement coverage of the defined test condition. This is because the test case is derived from the test condition, and it covers all the possible outcomes of the test condition, such as the initial state, the input, and the expected output.

Statement coverage is a metric that measures the percentage of executable statements that are exercised by a test case. In this case, the test case exercises all the statements in the test condition, thus achieving 100% statement coverage. Statement Coverage - ISTQB not-for-profit association References: Certified Tester Advanced Level Test Manager (CTAL-TM) - ISTQB not-for-profit association, ISTQB Test Manager Certification - ISTQB Exams Worldwide - ISTQB Official Registration, Statement Coverage - ISTQB not-for-profit association

#### NEW QUESTION # 121

What occurs In the retrospective closing?

- A. Everyone shakes hands
- **B. The strengths and opportunities for improvement in the retrospectives are discussed**
- C. A brainstorming session is held to discuss the solutions to the root causes of the most significant issues
- D. The data collection methods are reviewed

**Answer: B**

Explanation:

\* Purpose of Retrospectives:

\* Retrospectives are team meetings aimed at reflecting on the work process to identify what went well (strengths) and areas that can be improved (opportunities).

\* This aligns with continuous process improvement practices.

\* Evaluation of Options:

\* A(Everyone shakes hands) is trivial and not a core activity.

\* B(Reviewing data collection methods) may be part of broader discussions but is not the primary focus.

\* C is correct because it directly reflects retrospective goals.

\* D(Brainstorming solutions) typically occurs in follow-up sessions, not during the retrospective itself.

References and Syllabus Alignment:

\* Retrospective practices are emphasized in "Improving the Test Process" (TM-1.5.4) in the syllabus.

#### NEW QUESTION # 122

If you are monitoring code coverage during testing to determine what areas still need testing what type of testing is likely occurring?

- **A. White-box**
- B. Non-functional
- C. Functional
- D. Black-box

**Answer: A**

Explanation:

Context Analysis:

Monitoring code coverage is inherently tied to knowledge of the internal structure of the software, a characteristic of white-box testing.

Evaluation of Options:

A . Black-box:

Incorrect. Black-box testing focuses on functionality without knowledge of internal structures.

B . White-box:

Correct. White-box testing uses internal code knowledge to determine areas that need more coverage.

C . Functional:

Incorrect. Functional testing assesses functionality without inspecting internal code.

D . Non-functional:

Incorrect. Non-functional testing focuses on performance, usability, etc., not code coverage.

Syllabus Alignment:

ISTQB associates code coverage monitoring with white-box testing techniques (TM-1.2.6).

ISTQB Advanced Level Test Management Syllabus (TM-1.2.6)

### NEW QUESTION # 123

You are about to release a test progress report to a senior manager, who is not a test specialist. Which of the following topics should NOT be included in the test progress report? 1 credit

- A. Recommendations for taking controlling actions
- **B. Detailed overview of the risk-based test approach being used to ensure the exit criteria to be achieved**
- C. Status compared against the started exit criteria
- D. Product risks which have been mitigated and those which are outstanding.

**Answer: B**

### NEW QUESTION # 124

Which of the following statements is true regarding documentation standards?

- A. Documentation standards are a lower priority than testing standards.
- **B. Documentation standards can vary depending on the test level.**
- C. Agile projects consistently use level test plans and documentation standards.
- D. Documentation standards are determined by the Project Manager.

**Answer: B**

Explanation:

Documentation standards are not uniform across all test levels; they can differ based on the specific requirements of each level. For instance, unit testing may have different documentation needs compared to system testing. The ISTQB documentation standards recognize this variability and allow for flexibility to suit the context of the test level. This ensures that the documentation is appropriate for the objectives and constraints of each test level, providing clarity and efficiency in the testing process.

References: The ISTQB Advanced Level Test Manager syllabus and the ISTQB Glossary provide detailed information on documentation standards and their application across different test levels. These resources are essential for understanding the principles and practices of effective test documentation in various testing scenarios.

### NEW QUESTION # 125

.....

Free demos offered by ExamTorrent gives users a chance to try the product before buying. Users can get an idea of the ISTQB CTAL\_TM\_001 exam dumps, helping them determine if it's a good fit for their needs. The demo provides access to a limited portion of the CTAL\_TM\_001 dumps material to give users a better understanding of the content. Overall, CTAL\_TM\_001 free demo is a valuable opportunity for users to assess the value of the ExamTorrent study material before making a purchase.
