

Latest HPE7-A03 Exam Experience | HPE7-A03 Latest Dumps Book

BONUS!!! Download part of Pass4sures HPE7-A03 dumps for free: <https://drive.google.com/open?id=1vsvl9JSpV2GxMjglFazgxhNHm4UCqC5>

Sometimes a small step is possible to be a big step in life. HPE7-A03 exam seems just a small exam, but to get the HPE7-A03 certification exam is to be reckoned in your career. Such an international certification is recognition of your IT skills. In addition, except HPE7-A03, many other certification exams are also useful. The latest information of these tests can be found in our Pass4sures.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 2	<ul style="list-style-type: none">Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Topic 3	<ul style="list-style-type: none">Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Topic 4	<ul style="list-style-type: none">Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.

HP HPE7-A03 Latest Dumps Book & HPE7-A03 Download Fee

Pass4sures have a professional IT team to do research for practice questions and answers of the HP HPE7-A03 exam certification exam. They provide a very effective training tools and online services for your. If you want to buy Pass4sures products, Pass4sures will provide you with the latest, the best quality and very detailed training materials as well as a very accurate exam practice questions and answers to be fully prepared for you to participate in the HP Certification HPE7-A03 Exam. Safely use the questions provided by Pass4sures's products. Selecting the Pass4sures is equal to be 100% passing the exam.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q69-Q74):

NEW QUESTION # 69

The customer recently found out that Aruba OS-CX switches are capable of Application Recognition. What requirements should be fulfilled in order to do this? (Select two.)

- A. 6400 with Aruba CX Advanced License
- B. 6200F/M with Aruba CX Advanced License
- C. 6300F/M with Aruba CX Advanced License
- D. 8360 with Aruba CX Advanced License

Answer: A,C

NEW QUESTION # 70

Identify the stakeholders when gathering information for the network design and new IDF/MDF design. (Select two.)

- A. Facility manager
- B. Network Operations manager
- C. Chief Financial Officer
- D. Help desk manager

Answer: B,D

Explanation:

When designing a network and considering new Intermediate Distribution Frame/Main Distribution Frame (IDF/MDF) deployments, it's essential to gather information from various stakeholders to ensure the design meets all operational and organizational requirements. According to Aruba Campus Access learning resources, the Help Desk Manager and Network Operations Manager are crucial stakeholders in this process.

The Help Desk Manager provides insights into common issues, user complaints, and service requests, which can influence network design decisions to improve user experience and operational efficiency. The Network Operations Manager, on the other hand, offers a technical perspective on network management, maintenance requirements, and operational challenges. Engaging with these stakeholders ensures that the network design is aligned with both user needs and technical operational standards, contributing to a more resilient, efficient, and user-friendly network infrastructure.

NEW QUESTION # 71

What are the advantages of using a vSX-pair instead of two discrete switches to connect servers, storage, firewalls, and other workloads?

- A. The setup is much easier since both switches are sharing the same configuration.
- B. You can save half the number of licenses needed for AFC.
- C. Both members in a VSX-pair can be upgraded without any downtime for the workload.
- D. VMWare-Most can be connected with or without using LACP. regardless of their license.

Answer: C

Explanation:

One of the key advantages of using a Virtual Switching Extension (VSX) pair instead of two discrete switches for connecting servers, storage, firewalls, and other workloads is that both members in a VSX pair can be upgraded without any downtime for the workload (Option C). VSX technology provides advanced high availability features that allow for non-disruptive software upgrades, meaning that one switch in the VSX pair can be upgraded while the other continues to handle network traffic, thereby maintaining continuous operation of the connected workloads. This seamless failover capability ensures that there is no interruption to the critical services running on the network, making VSX an ideal solution for environments where uptime is paramount.

NEW QUESTION # 72

A customer wants to have the ability to show network usage. Which product would allow them to have this visibility?

- A. ArubaOS 8.x
- B. HPE Aruba Networking Central
- C. UXI

- D. HPE Aruba Networking ClearPass

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* Aruba Central: Aruba Central is the cloud-native management and monitoring platform within the Aruba ESP architecture. It provides:

* Network usage visibility: dashboards and reports on client, application, and device traffic across wired, wireless, and WAN.

* Application visibility and deep packet inspection (DPI): showing how much bandwidth is consumed by each app or category.

* Historical and real-time analytics: enabling IT to monitor utilization trends and demonstrate network usage to stakeholders.

* Why not the other options?

* UXI (User Experience Insight): Provides end-user experience monitoring by using sensor devices to simulate client behavior (e.g., connectivity tests, SaaS performance), but it does not give full network usage visibility in terms of traffic volume or bandwidth utilization.

* ArubaOS 8.x: This is the operating system for Aruba mobility controllers and APs, enabling advanced WLAN features, but not a dedicated platform for traffic visibility dashboards or long-term usage reporting.

* ClearPass: Provides policy-based access control and security (authentication, authorization, accounting, device profiling), but it is not designed to show network traffic usage or utilization statistics.

* Aruba Design Guidance Alignment: According to Aruba's Campus Access Design Guides and Aruba Central documentation, the correct tool for showing and reporting network usage visibility is Aruba Central, which integrates AI Insights, traffic monitoring, and reporting capabilities as part of the ESP cloud platform.

Final Justification:

Option B is correct because only HPE Aruba Networking Central provides the ability to monitor and display network usage visibility in a centralized, graphical, and reportable way.

Reference Extracts (Aruba Official Study & Design Guides):

* Aruba ESP Campus Design Guide: Aruba Central as the management and visibility layer.

* Aruba Central Technical Overview: built-in dashboards for bandwidth utilization, client traffic, and application visibility.

* Aruba Central AI Insights: usage trends and capacity monitoring.

NEW QUESTION # 73

A global furniture retail company called 'No-Stair Inc.' requests you design their new WLAN infrastructure for a global footprint. Each location of 'No-Stair Inc.' has a similar layout: three small manager offices, a warehouse, and a 'retail' area. The 'retail' area and the warehouse together amount to 95% of the location. The IT department of the company is minimally engaged in their LAN refresh so the CTO of the company has shared the information below.

Current WLAN Infrastructure is based on the 802.11n "WIFI4Less" access-points series (both model 2013-INT (2.4 only internal antenna) and model 2019-EXT (dual-band external antenna only). These AP models are standalone without any centralized management. Last year 'No-Stair Inc.' ran a project called 'secure-it' ensuring that all needed network security was implemented to be fully compliant with their security standards. During this project, they also upgraded the AAA.

Infrastructure to handle the increased AAA requests. No additional Wi-Fi or security requirements are listed for this WLAN refresh, which means that 'No-Stair Inc.' will continue to use bridged SSIDs, with local breakout into different VLANs.

The CTO of 'No-Stair Inc.' understands the need for you to ask additional questions to deliver the design. The questions may be sent in written form and will be answered within two weeks.

Which additional question is correct in order to collect needed information for the WLAN design?

- A. Who is the campus switch vendor?
- **B. Is there a current RF survey report that you can share?**
- C. What type of fiber connection is used between the core and access layer switches?
- D. Is there enough cooling in the MDF?

Answer: B

Explanation:

An RF (Radio Frequency) survey report is crucial for WLAN design as it provides detailed information about the current wireless environment, including signal strengths, interference sources, coverage gaps, and the effectiveness of the existing WLAN infrastructure. For a company like 'No-Stair Inc.' that is planning to refresh its WLAN across a global footprint, understanding the current RF conditions in each location is essential. This information helps in designing a WLAN infrastructure that can meet the specific needs of different areas within the locations, such as the retail area and warehouse, ensuring optimal coverage, performance, and user experience. An RF survey report would allow the designer to make informed decisions regarding the placement of new access points, the selection of appropriate antennas, and the configuration of WLAN parameters to improve coverage and capacity.

while minimizing interference.

NEW QUESTION # 74

.....

The passing rate of our HPE7-A03 test torrent is high but if you fail in the exam we will refund you in full immediately. Some people may worry that the refund procedure is complicate but we guarantee to the client that the refund procedure is very simple. If only you provide the screenshot or the scanning copy of HPE7-A03 exam failure marks list we will refund you immediately and the process is really simple. It is very worthy for you to buy our HPE7-A03 Guide questions and we can help you pass the exam successfully. If you have any problems please contact us by the online customer service or the mails, and we will reply and solve your problem immediately.
