## New CAD Test Fee & CAD Authorized Exam Dumps

Most of the experts in our company have been studying in the professional field for many years and have accumulated much experience in our CAD practice questions. Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our CAD Exam Materials and to be our long-term partner.

## ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q144-Q149):

### NEW QUESTION # 144

When configuring a module, what does the Override application menu roles configuration option do?

- A. Admin is given access to the module even if Access Controls would ordinarily prevent access
- B. Users with access to the application menu can see the module even if they don't have the module role
- C. Self-Service users can access the module even though they do not have roles
- D. Users with the module role but without access to the application menu access the module

Answer: B

### NEW QUESTION # 145

Assume a table called table exists and contains 3 fields: field1, field2, field3. Examine the Access Control list for table:

- table.None read Access Control for users with the admin and itil roles
- table.\* read Access Control for users with the admin role
- table.field3 read Access Control for users with the itil role

Which field or fields can a user with the itil role read?

- A. field1, field2, and field3
- B. field3 only
- C. field 1 and field3
- D. All fields except field3

**Answer: B**

Explanation:

An Access Control list (ACL) defines what data users can access and how they can access it in ServiceNow tables<sup>1</sup>. The ACL evaluates the user roles and the conditions defined in the ACL rules to determine the user's access level<sup>2</sup>. In this case, the ACL rules for the table are as follows:

\* table.None read Access Control for users with the admin and itil roles: This means that users with the admin or itil roles cannot read any field in the table unless there is a more specific rule that grants them access<sup>3</sup>.

\* table.\* read Access Control for users with the admin role: This means that users with the admin role can read all fields in the table.

\* table.field3 read Access Control for users with the itil role: This means that users with the itil role can read only the field3 in the table.

Therefore, a user with the itil role can read only the field3 in the table, and not the other fields.

### NEW QUESTION # 146

When creating an application through the Guided Application Creator, what are the options for creating a table? (Choose 3 answers)

- A. Run import jobs
- B. Use API calls
- C. Create a table from scratch
- D. Link to external tables
- E. Create a table from a template
- F. Upload a spreadsheet
- G. Extend a table

**Answer: C,E,G**

Explanation:

Options for Creating Tables in Guided Application Creator:

Create a table from scratch: This option allows you to define a completely new table with custom fields and configurations.

Create a table from a template: You can use predefined table templates to speed up table creation. Templates often include pre-configured fields and settings.

Extend a table: This allows you to create a new table by inheriting fields and functionality from an existing table, enabling reuse and consistency.

Why Other Options Are Incorrect:

Option A (Link to external tables): Linking to external tables is not an option provided in the Guided Application Creator; external data is typically accessed through integration methods.

Option D (Run import jobs): Import jobs are used for data migration, not for table creation in the Guided Application Creator.

Option E (Upload a spreadsheet): While uploading a spreadsheet can create tables, this is a feature of Import Sets, not the Guided Application Creator.

Option F (Use API calls): API calls are for integration and not an option for creating tables directly in the Guided Application Creator.

#### NEW QUESTION # 147

Which of the following objects does a Display Business Rule NOT have access to?

- A. previous
- B. g\_scratchpad
- C. current
- D. GlideSystem

**Answer: A**

Explanation:

A Display Business Rule has access to the current, g\_scratchpad, and GlideSystem objects, but not the previous object. The previous object is only available to Before Business Rules4. Reference: Business Rule API

[https://docs.servicenow.com/bundle/tokyo-application-development/page/script/business-rules/concept/c\\_BusinessRules.html](https://docs.servicenow.com/bundle/tokyo-application-development/page/script/business-rules/concept/c_BusinessRules.html)

#### NEW QUESTION # 148

Identify the ways an application can respond to an Event generated by the gs.eventQueue() method. (Choose 2 answers)

- A. Email Notification
- B. Script Action
- C. Client Script
- D. UI Policy
- E. Scheduled Script Execution (Scheduled Job)

**Answer: A,B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In ServiceNow, when an event is generated using the gs.eventQueue() method, the system can respond in several ways:

\* B. Email Notification: Events can trigger email notifications. By associating an event with a notification, the system can send emails to specified recipients when the event occurs.

\* E. Script Action: Script Actions are server-side scripts that execute in response to events. They allow developers to define custom behaviors that should occur when specific events are fired.

The other options are not appropriate responses to events generated by gs.eventQueue():

\* A. UI Policy: UI Policies are used to dynamically change the behavior of fields on forms in the user interface and are not triggered by events.

\* C. Client Script: Client Scripts run on the client side (in the user's browser) and are not directly triggered by server-side events.

\* D. Scheduled Script Execution (Scheduled Job): Scheduled Jobs are scripts that run at specified times or intervals and are not triggered by events.

For more detailed information, refer to the official ServiceNow documentation on Responding to Events.

#### NEW QUESTION # 149

.....

There are a lot of the advantages for you to buy our CAD exam questions safely. First, our CAD study braindumps are free from computer virus. You can download or install our CAD study material without hesitation. Second, we will protect your private information. No other person or company will get your information from us. You won't get any telephone harassment or receiving junk E-mails after purchasing our CAD training guide. You don't have to worry about anything with our CAD learning quiz.

**New CAD Test Fee:** <https://www.pass4training.com/CAD-pass-exam-training.html>

Software version--Simulation of ServiceNow CAD exam to help you get familiar with atmosphere, no restriction of installation on condition that you may lose the software and can install it again, ServiceNow Test CAD Assessment And in this way, your effort and time spend on the practicing will be rewarded, ServiceNow Test CAD Assessment To make your review more comfortable and effective, we made three versions as well as a series of favorable benefits for you.

For anyone who has been frustrated with other beginning programming CAD books or courses, So the second important rule is this: When building pipelines, you need to be aware of the events or data flow.

Software version---Simulation of ServiceNow CAD Exam to help you get familiar with atmosphere, no restriction of installation on condition that you may lose the software and can install it again!

The valid On-line test is intelligent and interesting. Are you preparing for the CAD learning materials recently?
