

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales test dumps & exam questions for SAP C_TS462_2023

SAP CERTIFICATION

BONUS!!! Download part of PracticeMaterial C_TS462_2023 dumps for free: <https://drive.google.com/open?id=1HKi5OMkiTl1W-NTy5Wl41i3w96fj35n>

Our company provides the free download service of C_TS462_2023 test torrent for all people. If you want to understand our C_TS462_2023 exam prep, you can download the demo from our web page. You do not need to spend money; because our C_TS462_2023 test questions provide you with the demo for free. You just need to download the demo of our C_TS462_2023 Exam Prep according to our guiding; you will get the demo for free easily before you purchase our products. By using the demo, we believe that you will have a deeply understanding of our C_TS462_2023 test torrent. We can make sure that you will like our products; because you will it can help you a lot.

SAP C_TS462_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Master Data: It includes setting up and maintaining relevant master data to ensure accurate sales and billing processes.
Topic 2	<ul style="list-style-type: none">Billing Process and Customizing: This topic covers the basics of the billing process and the necessary customization settings, ensuring a smooth billing procedure.
Topic 3	<ul style="list-style-type: none">Organizational Structures: This topic discusses the role of organizational structures and how they relate to basic functions within the sales process.
Topic 4	<ul style="list-style-type: none">Sales Process and Analytics: Sales process and analytics is a topic that involves explaining and performing various tasks related to the sales process.
Topic 5	<ul style="list-style-type: none">Pricing and Condition Technique: The section on pricing and condition technique falls under the broader topic of sales documents and customizing, covering related tasks and explanations.

Topic 6	<ul style="list-style-type: none"> • Basic Functions (Customizing): It focuses on explaining and performing tasks related to basic functions (customizing).
Topic 7	<ul style="list-style-type: none"> • Managing Clean Core: The topic of Managing Clean Core is about applying principles to ERP to enhance business process agility and reduce adaptation efforts.
Topic 8	<ul style="list-style-type: none"> • Sales Documents: This topic covers the explanation and performance of tasks related to sales document customization, including pricing and condition techniques. It also encompasses the shipping process and its associated customization settings.

TOP Valid Dumps C_TS462_2023 Files - SAP SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales - Valid Detailed C_TS462_2023 Answers

The C_TS462_2023 latest exam torrents have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. The C_TS462_2023 exam questions offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. Our reasonable price and C_TS462_2023 Latest Exam torrents supporting practice perfectly, as well as in the update to facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the C_TS462_2023 test torrent can be said to have high quality performance, let users spend the least money to meet their maximum needs.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales Sample Questions (Q33-Q38):

NEW QUESTION # 33

You sell a product for which there is a bill of material.

What must you set to ensure that the components automatically appear as sub-items in the order?

- A. The material entry type in the sales document type
- B. The delivery group in the item category of the sub-item
- C. The structure scope in the item category of the main item
- D. The item usage during the item category determination of each sub-item

Answer: C

NEW QUESTION # 34

In your pricing procedure you have several condition types for a price such as PROO, PR02, PN00 and HM00. Only one of these prices is taken into account Which setting causes this behavior?

- A. Exclusion indicator
- B. Header condition
- C. Condition function
- D. Condition class

Answer: A

Explanation:

In SAP S/4HANA, apricing proceduredetermines how pricing conditions (e.g., PROO, PR02, PN00, HM00) are applied to calculate the final price in a sales document, such as a sales order. The question states that only one of several condition types for a price is taken into account, meaning that only one price condition is selected or applied, while the others are ignored. This behavior is controlled by theExclusion indicatorin the pricing procedure configuration.

Let's break down the question and analyze each option to understand why theExclusion indicatoris the correct choice:

Understanding Pricing in SAP S/4HANA

* Pricing procedure is a sequence of steps that determines how prices, discounts, surcharges, and taxes are calculated in a sales document.

* Condition types (e.g., PROO, PR02, PN00, HM00) represent individual pricing elements, such as base prices, promotional prices, or net prices. Each condition type has specific settings that control its behavior.

* When multiple condition types for prices exist in a pricing procedure (e.g., multiple price conditions), SAP allows configuration to ensure only one price is applied to avoid conflicts or double pricing.

* The question implies that the system selects only one price condition from PROO, PR02, PN00, or HM00, which suggests a mechanism is in place to exclude the others.

Analysis of Options

* A. Condition function:

* The Condition function is not a standard term in SAP S/4HANA pricing configuration. It may refer to the role of a condition type (e.g., price, discount, surcharge), but it is not a specific setting that controls whether only one condition is applied. Instead, the condition function is determined by settings like the condition class and calculation type, which define the purpose and calculation logic of a condition type.

* Why incorrect: There is no "Condition function" setting that directly causes only one price condition to be selected among multiple price conditions.

* B. Exclusion indicator:

* The Exclusion indicator is a setting in the pricing procedure configuration that controls condition type exclusivity. It is used to define condition exclusion groups, which determine which condition types are mutually exclusive. If multiple price condition types (e.g., PROO, PR02, PN00, HM00) are assigned to an exclusion group, the system applies a rule (e.g., selecting the condition with the best price, most specific condition, or first valid condition) to ensure only one condition is active.

* In SAP, condition exclusion is configured via condition exclusion groups (transaction V/08 or SPRO > Sales and Distribution > Basic Functions > Pricing > Condition Exclusion). For example:

* You create an exclusion group and assign condition types PROO, PR02, PN00, and HM00 to it.

* You define an exclusion rule, such as "select the condition with the lowest price" or "select the first valid condition."

* During pricing, the system evaluates the conditions in the exclusion group and applies only one based on the rule, deactivating the others.

* This mechanism perfectly explains the behavior described in the question, where only one price condition is taken into account.

* Why correct: The Exclusion indicator (via condition exclusion groups) ensures that only one of the price condition types is applied, based on the defined exclusion rule.

* C. Condition class:

* The Condition class is a setting in the condition type configuration (transaction V/06) that categorizes the condition type's purpose, such as:

* B: Prices (e.g., PROO, PR02 for base prices).

* A: Discounts or surcharges.

* C: Taxes, etc.

* While the condition class determines whether a condition is treated as a price, discount, or tax, it does not control whether multiple price conditions are mutually exclusive. For example, multiple condition types can have the condition class "B" (Prices) and still coexist unless an exclusion rule is applied.

* Why incorrect: The Condition class defines the type of condition but does not enforce the selection of only one price condition among multiple price conditions.

* D. Header condition:

* A Header condition is a setting in the condition type configuration that determines whether a condition is applied at the header level (affecting the entire document) or the item level (affecting specific items). For example, a header condition might apply a flat surcharge to the entire sales order, while item conditions like PROO or PR02 apply to specific materials.

* While header conditions affect how a condition is applied, they do not control whether only one price condition is selected from multiple price conditions at the item level.

* Why incorrect: The Header condition setting is unrelated to ensuring that only one price condition (e.g., PROO, PR02, PN00, or HM00) is applied.

Why Exclusion Indicator is the Correct Choice

* The Exclusion indicator is part of the condition exclusion configuration in the pricing procedure. It is used to manage scenarios where multiple price condition types (e.g., PROO for standard price, PR02 for promotional price, PN00 for net price, HM00 for manual price) are defined, but only one should be applied to avoid conflicting prices.

* For example:

* In the pricing procedure (transaction V/08), you define a condition exclusion group and assign PROO, PR02, PN00, and HM00 to it.

* You set an exclusion rule, such as:

* Rule A: Select the condition with the lowest price.

* Rule B: Select the condition with the highest price.

* Rule C: Select the first valid condition in the sequence.

* During sales order processing, the system evaluates the conditions in the exclusion group, applies the rule, and deactivates all other conditions in the group, ensuring only one price is used.

* This is a common setup in SAP S/4HANA to handle scenarios with multiple price conditions, such as standard prices, promotional prices, or customer-specific prices, ensuring clarity and consistency in pricing.

Practical Context

* In the SAP system, condition exclusion is configured in the following path:

* SPRO > Sales and Distribution > Basic Functions > Pricing > Condition Exclusion > Condition Exclusion for Groups of Conditions.

* Alternatively, use transaction VOK8 to maintain condition exclusion groups and assign condition types.

* During sales order creation, the system checks the pricing procedure, identifies the exclusion group, and applies the exclusion rule to select one condition type (e.g., PROO) while deactivating others (e.g., PR02, PN00, HM00).

* For example, if PROO has a price of \$100, PR02 has \$90, and the exclusion rule is "select the lowest price," the system will apply PR02 and exclude the others.

Why Other Options Don't Fit

* Condition function: Not a standard SAP term or setting for controlling exclusivity.

* Condition class: Defines the type of condition (e.g., price vs. discount) but doesn't manage exclusivity between multiple price conditions.

* Header condition: Controls the level of application (header vs. item) but doesn't determine which price condition is selected.

NEW QUESTION # 35

Which settings do the cash sales process and the rush order process have in common? Note: There are 2 correct answers to this question.

- A. The immediate delivery setting
- B. The lead time in days
- C. The billing type settings
- D. The item category determination

Answer: A,C

Explanation:

Cash sales and rush order processes share the following settings:

B . The billing type settings: Both processes typically involve immediate billing upon order creation or delivery.

D . The immediate delivery setting: Both processes are designed for rapid processing, often including immediate or very quick delivery after order placement.

NEW QUESTION # 36

Which of the following is a use case for a billing plan type?

- A. Convergent billing
- B. Milestone billing
- C. Invoice lists
- D. Settlement management

Answer: B

Explanation:

Organizational Structures

NEW QUESTION # 37

You are a consultant on an SAP S/4HANA Cloud greenfield project.

Which of the following aspects should you focus on to achieve and maintain clean core data quality? Note:

There are 2 correct answers to this question.

- A. Stability
- B. Timeliness
- C. Efficiency

- Answer: A,C**
