SCA-C01 Customized Lab Simulation | SCA-C01 Valid Dump

Perhaps you have no choice and live unhappily now because you cannot change your current situation. Our SCA-C01 exam materials will remove your from the bad condition. Life needs to be colorful and meaningful. We must realize our own values and make progress. Do not worry. Our SCA-C01 Study Guide will help you regain confidence. we can claim that with our SCA-C01 practice engine for 20 to 30 hours, you will be quite confident to pass the exam.

Tableau SCA-C01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identify the considerations for running in the cloudDescribe how license types map to site roles

Topic 2	<ul style="list-style-type: none"> • Manage workbook and datasource revision history • Describe the impact of the automatic-login options
Topic 3	<ul style="list-style-type: none"> • Processes in distributed and high-availability environments • Understand user-based licensing
Topic 4	<ul style="list-style-type: none"> • Explain the purpose and benefits of a dedicated server • How to identify the current version of Tableau Server
Topic 5	<ul style="list-style-type: none"> • Explain the benefits of published data sources • Explain the risks of Dynamic-IP addressing
Topic 6	<ul style="list-style-type: none"> • List the supporting Operating Systems • Describe the different license types

Tableau Server Certified Associate Exam Sample Questions (Q170-Q175):

NEW QUESTION # 170

Select the correct option below that represents the correct URL structure for a Tableau view with the following filter criteria:
"Toys in the West region"

- A. <http://10.36.0.30/#/views/Superstore/Performance?Region=West/Category=Toys>
- B. <http://10.36.0.30/#/views/Superstore/Performance?Region=West&Category=Toys>
- C. <http://10.36.0.30/#/views/Superstore/Performance?Region=WestANDCategory=Toys>

Answer: B

Explanation:

Explanation

https://help.tableau.com/current/desktopdeploy/en-us/desktop_deploy_reporting_admin.htm

NEW QUESTION # 172

Select all the correct ways in which you can determine and view your Tableau Server version:

- A. From the REST API, using `tabcmd tabserv version`
- B. From the TSM command line, using `tsm version`
- C. From the Tableau Server web UI, from the help menu and clicking the information icon

Answer: B,C

Explanation:

Explanation

Link to Tableau Server documentation: https://help.tableau.com/current/server/en-us/version_server_view.htm

NEW QUESTION # 173

What process decides when a Repository failover is required?

- A. Coordination Service
- B. Gateway
- C. Cluster Controller
- D. Backgrounder

Answer: C

Explanation:

In a high-availability (HA) Tableau Server setup, the Repository (PostgreSQL) has an active and passive instance. Failover occurs if the active Repository fails. Let's dive into the process:

* HA Setup:

* Two Repository instances across nodes (active/passive).

* Failover switches to the passive instance if the active one becomes unavailable (e.g., crash, network issue).

* Cluster Controller:

* Role: Monitors all processes (e.g., Repository, File Store) across nodes, detecting failures via heartbeats and status checks.

* Failover Decision: If the active Repository stops responding, Cluster Controller initiates failover, promoting the passive instance to active.

* Coordination: Works with Coordination Service (ZooKeeper) to update topology but makes the initial detection call.

* Option A (Cluster Controller): Correct.

* Why: It's the watchdog process, constantly monitoring Repository health and triggering failover when needed.

* Option B (Coordination Service): Incorrect.

* Role: ZooKeeper maintains cluster state and coordinates topology updates post-failover, but doesn't detect the failure-Cluster Controller does.

* Option C (Gateway): Incorrect.

* Role: Routes client requests-unrelated to internal process monitoring or failover.

* Option D (Backgrounder): Incorrect.

* Role: Executes background tasks-no involvement in Repository failover decisions.

Why This Matters: Understanding failover ensures HA reliability-Cluster Controller is the linchpin for resilience.

NEW QUESTION # 174

What Tableau Server authentication method should you configure to use OpenID Connect?

- A. Local Authentication
- B. SAML
- C. Active Directory
- D. Kerberos

Answer: B

Explanation:

Tableau Server supports multiple authentication methods, including Local Authentication, Active Directory, Kerberos, SAML, and OpenID Connect. OpenID Connect (OIDC) is an identity layer built on OAuth 2.0, commonly used for single sign-on (SSO). In Tableau Server, OIDC is implemented as a variant of SAML (Security Assertion Markup Language) authentication because both are SSO protocols managed through the same configuration workflow.

To use OpenID Connect:

* Configure Tableau Server for SAML/SSO.

* Provide an OIDC-compatible identity provider (IdP) configuration (e.g., Google, Okta).

* Set up the IdP metadata and certificates in TSM.

* Option D (SAML): Correct. Tableau Server treats OIDC as a subset of its SAML authentication framework, so you configure it under the SAML settings in TSM.

* Option A (Local Authentication): Incorrect. Local Authentication uses Tableau's internal user database, not an external SSO protocol like OIDC.

- * Option B (Kerberos): Incorrect. Kerberos is a network authentication protocol for Windows environments, unrelated to OIDC.
- * Option C (Active Directory): Incorrect. AD uses LDAP or Kerberos, not OIDC, for authentication.

NEW QUESTION # 175

.....

With the development of IT technology in recent, many people choose to study IT technology which lead to lots of people join the IT industry. So, the competition is in fierce in IT industry. With working in IT industry and having IT dream, you don't expect to be caught up by other people which need you to improve your IT skills to prove your ability. How do you want to prove your ability? More and more people prove themselves by taking IT certification exam. Do you want to get the certificate? You must first register Tableau SCA-C01 Exam. SCA-C01 test is the important exam in Tableau certification exams which is well recognized.
