

Pass Guaranteed 2026 JN0-637: Reliable Security, Professional (JNCIP-SEC) Certification Book Torrent

What's more, part of that 2Pass4sure JN0-637 dumps now are free: https://drive.google.com/open?id=1Og26n9Fsk-kBBbp_OA8Yfhq29Q47QmaY

Our JN0-637 learning materials prepared by our company have now been selected as the secret weapons of customers who wish to pass the exam and obtain relevant certification. If you are agonizing about how to pass the exam and to get the JN0-637 certificate, now you can try our learning materials. Our reputation is earned by high-quality of our learning materials. Once you choose our training materials, you chose hope. Our learning materials are based on the customer's point of view and fully consider the needs of our customers. If you follow the steps of our JN0-637 Learning Materials, you can easily and happily learn and ultimately succeed in the ocean of learning.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.
Topic 2	<ul style="list-style-type: none">Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.
Topic 3	<ul style="list-style-type: none">Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.
Topic 4	<ul style="list-style-type: none">Advanced Policy-Based Routing (APBR): This topic emphasizes on advanced policy-based routing concepts and practical configuration or monitoring tasks.

Juniper JN0-637 New Study Questions, JN0-637 Exam Registration

By these three versions of JN0-637 practice materials we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of JN0-637 practice materials allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of JN0-637 practice materials, you can learn anywhere at any time with it at your cellphones without the

limits of installation.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q49-Q54):

NEW QUESTION # 49

Exhibit

Referring to the exhibit, which two statements are true? (Choose two.)

- A. You must manually create the suspicious_Endpoint3 feed in the Juniper ATP Cloud interface.
- B. Juniper ATP Cloud automatically creates the suspicious_Endpoints feed after you commit the security policy.
- C. The suspicious_Endpoint3 feed is usable by any SRX Series device that is a part of the same realm as SRX-1
- D. The suspicious_Endpoint3 feed is only usable by the SRX-1 device.

Answer: C,D

NEW QUESTION # 50

You are asked to establish IBGP between two nodes, but the session is not established. To troubleshoot this problem, you configured trace options to monitor BGP protocol message exchanges.

Referring to the exhibit, which action would solve the problem?

- A. Modify the security policy to permit the BGP packets.
- B. Add a firewall filter to lo0 that permits the BGP packets.
- C. Add BGP to the lo0 host-inbound-traffic configuration.
- D. Add the junos-host zone policy to permit the BGP packets.

Answer: C

NEW QUESTION # 51

Exhibit

Referring to the exhibit, which two statements are true? (Choose two.)

- A. You must manually create the suspicious_Endpoint3 feed in the Juniper ATP Cloud interface.
- B. Juniper ATP Cloud automatically creates the suspicious_Endpoints feed after you commit the security policy.
- C. The suspicious_Endpoint3 feed is usable by any SRX Series device that is a part of the same realm as SRX-1
- D. The suspicious_Endpoint3 feed is only usable by the SRX-1 device.

Answer: C,D

NEW QUESTION # 52

Exhibit

Which two statements are correct about the output shown in the exhibit? (Choose two.)

- A. The packet is processed as host inbound traffic.
- B. The packet matches a configured security policy.
- C. The packet matches the default security policy.
- D. The packet is processed in the first path packet flow.

Answer: A,C

NEW QUESTION # 53

In an effort to reduce client-server latency transparent mode was enabled on SRX series device.

Which two types of traffic will be permitted in this scenario? (Choose Two)

- A. Layer 2 non-IP multicast
- B. BGP

- C. ARP
- D. IPsec

Answer: A,C

Explanation:

To answer this question, you need to know what transparent mode is and what types of traffic it permits.

Transparent mode is a mode of operation for SRX Series devices that provides Layer 2 bridging capabilities with full security services. In transparent mode, the SRX Series device acts as a bridge between two network segments and inspects the packets without modifying the source or destination information in the IP packet header. The SRX Series device does not have an IP address in transparent mode, except for the management interface¹.

Therefore, the types of traffic that will be permitted in transparent mode are:

A) ARP (Address Resolution Protocol) traffic. ARP is a protocol that maps IP addresses to MAC addresses. ARP traffic is a type of Layer 2 traffic that does not require an IP address on the SRX Series device. ARP traffic is permitted in transparent mode to allow the SRX Series device to learn the MAC addresses of the hosts on the bridged network segments².

B) Layer 2 non-IP multicast traffic. Layer 2 non-IP multicast traffic is a type of traffic that uses MAC addresses to send data to multiple destinations. Layer 2 non-IP multicast traffic does not require an IP address on the SRX Series device. Layer 2 non-IP multicast traffic is permitted in transparent mode to allow the SRX Series device to forward data to the appropriate destinations on the bridged network segments³.

The other options are incorrect because:

C) BGP (Border Gateway Protocol) traffic. BGP is a protocol that exchanges routing information between autonomous systems. BGP traffic is a type of Layer 3 traffic that requires an IP address on the SRX Series device. BGP traffic is not permitted in transparent mode, because the SRX Series device does not have an IP address in transparent mode, except for the management interface¹.

D) IPsec (Internet Protocol Security) traffic. IPsec is a protocol that provides security and encryption for IP packets. IPsec traffic is a type of Layer 3 traffic that requires an IP address on the SRX Series device.

IPsec traffic is not permitted in transparent mode, because the SRX Series device does not have an IP address in transparent mode, except for the management interface¹.

Layer 2 Non-IP Multicast Traffic Support in Transparent Mode

NEW QUESTION # 54

.....

Life is beset with all different obstacles that are not easily overcome. For instance, JN0-637 exams may be insurmountable barriers for the majority of population. However, with the help of our JN0-637 exam questions, exams are no longer problems for you. The reason why our JN0-637 Training Materials outweigh other JN0-637 study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.
