- C. 10 or fewer.
- D. 7 plus or minus 3.

**Answer: C**

The recommended size for a Scrum Team is 10 or fewer people, as stated in the Scrum Guide: "The recommended size of a Scrum Team is small enough to remain nimble and large enough to complete significant work within a Sprint, typically 10 or fewer people."

### NEW QUESTION # 273

- D. What went wrong in the last Sprint and what to do differently this Sprint.
- E. Who is on the team and what team member roles will be.

### NEW QUESTION # 274

### NEW QUESTION # 275

Multiple Scrum Teams working on the same project must have the same Sprint start date.

- A. False
- B. True

**Answer: A**

Explanation:

The correct answer is B, because multiple Scrum Teams working on the same project do not have to have the same Sprint start date. The Scrum Guide states that "multiple Scrum Teams often work together on the same product. One product goal unites them. Therefore, they must mutually define and comply with a definition of 'Done' that applies to their combined work product." Therefore, the synchronization of multiple Scrum Teams is based on their shared product goal and definition of 'Done', not on their Sprint start date.

### NEW QUESTION # 276

Cross-functional teams are optimized to work on one technical layer of a system only (e.g. GUI, database, middle tier, interfaces).

- A. False
- B. True

**Answer: A**

Explanation:

According to the Scrum Guide 1, the Development Team consists of professionals who do the work of delivering a potentially releasable Increment of "Done" product at the end of each Sprint. Development Teams are structured and empowered by the organization to organize and manage their own work. The resulting synergy optimizes the Development Team's overall efficiency and effectiveness. Cross-functional teams have all competencies needed to accomplish the work without depending on others not part of the team.

The team model in Scrum is designed to optimize flexibility, creativity, and productivity.
