덤프는 구체적인 업데이트 주기가 존재하지 않습니다. 하지만 저희는 수시로 Cyber AB CMMC-CCP 시험문제 변경을 체크하여 Cyber AB CMMC-CCP 덤프를 가장 최신 버전으로 업데이트 하도록 최선을 다하고 있습니다. Cyber AB CMMC-CCP 덤프를 구매하면 1년간 업데이트 될 때 마다 최신 버전을 구매시 사용한 메일로 전송해드립니다.

Cyber AB CMMC-CCP 시험요강:

주제	소개
주제 1	• CMMC Model Construct and Implementation Evaluation: This section of the exam measures the evaluative skills of cybersecurity assessors, focusing on the application and assessment of the CMMC model. It includes understanding its levels, domains, practices, and implementation criteria, and how to assess whether organizations meet the required cybersecurity practices using evidence-based evaluation.

주제 2	• CMMC Assessment Process (CAP): This section of the exam measures the planning and execution skills of audit and assessment professionals, covering the end-to-end CMMC Assessment Process. This includes planning, executing, documenting, reporting assessments, and managing Plans of Action and Milestones (POA&M) in alignment with DoD and CMMC-AB methodology.
주제 3	• CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
주제 4	• CMMC Governance and Source Documents: This section of the exam measures the capabilities of legal or compliance advisors, covering key regulatory frameworks that govern cybersecurity compliance. Topics include Federal Contract Information, Controlled Unclassified Information, the role of NIST SP 800-171, DFARS, FAR, and the structure and requirements of CMMC v2.0, including self-assessments and certification levels.

인기자격증 CMMC-CCP시험패스 가능한 공부 시험 최신 덤프자료

Cyber AB 인증 CMMC-CCP시험이 너무 어려워서 시험 볼 엄두도 나지 않는다구요? KoreaDumps 덤프만 공부하신다면 IT인증 시험공부 고민은 이젠 그만 하셔도 됩니다. KoreaDumps에서 제공해드리는 Cyber AB 인증 CMMC-CCP 시험대비 덤프는 덤프제공사이트에서 가장 최신버전이어서 시험패스는 한방에 갑니다. Cyber AB 인증 CMMC-CCP시험뿐만 아니라 IT인증 시험에 관한 모든 시험에 대비한 덤프를 제공해드립니다. 많은 애용 바랍니다.

최신 Cyber AB CMMC CMMC-CCP 무료 샘플문제 (Q95-Q100):

질문 # 95

During assessment planning, the OSC recommends a person to interview for a certain practice. The person being interviewed MUST be the person who:

- A. implements, performs, or supports that practice.
- B. audits that practice.
- C. supports, audits, and performs that practice.
- D. funds that practice.

정답: A

설명:

Who Should Be Interviewed During a CMMC Assessment? During assessment planning, the Organization Seeking Certification (OSC) may suggest personnel for interviews. However, the person interviewed must be someone who:

#Implements the practice (directly responsible for executing it).

#Performs the practice (carries out day-to-day security operations).

#Supports the practice (provides necessary resources or oversight).

* The assessor needs direct insights from individuals actively involved in the practice.

* Funding (Option A) does not provide technical or operational insight into practice execution.

* Auditing (Option B) focuses on compliance checks, but auditors do not implement the practice.

* Supporting, auditing, and performing (Option C) includes auditors, who are not necessarily the right interviewees.

Why "Implements, Performs, or Supports That Practice" is Correct? Breakdown of Answer Choices Option Description Correct?

A: Funds that practice.

#Incorrect-Funding is important but does not mean direct involvement.

B: Audits that practice.

#Incorrect-Auditors check compliance but do not implement practices.

C: Supports, audits, and performs that practice.

#Incorrect-Auditing is not a requirement for interviewees.

D: Implements, performs, or supports that practice.

#Correct - The interviewee must have direct involvement in execution.

* CMMC Assessment Process Guide (CAP)- Requires that interviewees be directly responsible for implementing, performing, or supporting the practice.

Official References from CMMC 2.0 Documentation Final Verification and Conclusion The correct answer is D. Implements, performs, or supports that practice, as the interviewee must actively contribute to the execution of the practice.

질문 # 96

Which statement BEST describes an assessor's evidence gathering activities?

- A. Test certain assessment objectives to determine findings.
- **B. Use examinations, interviews, and tests to gather sufficient evidence.**
- C. Use interviews for assessing a Level 2 practice.
- D. Test all practices or objectives for a Level 2 practice

정답: B

질문 # 97

In many organizations, the protection of FCI includes devices that are used to scan physical documentation into digital form and print physical copies of digital FCI. What technical control can be used to limit multi- function device (MFD) access to only the systems authorized to access the MFD?

- A. Single administrative account
- B. Access lists only known to the IT administrator
- C. Documentation showing MFD configuration
- **D. Virtual LAN restrictions**

정답: D

설명:

Understanding Multi-Function Device (MFD) Security in CMMC Multi-function devices (MFDs), such as scanners, printers, and copiers, process, store, and transmit FCI, making them a potential attack surface for unauthorized access.

The best technical control to limit MFD access to only authorized systems is Virtual LAN (VLAN) restrictions, which segment and isolate network traffic.

VLAN Restrictions Provide Network Segmentation

VLANs isolate the MFD from unauthorized systems, ensuring only approved devices can communicate with it.

Prevents unauthorized network access by limiting connections to specific IPs or subnets.

Meets CMMC 2.0 Network Security Controls

Aligns with CMMC System and Communications Protection (SC) Practices for network segmentation and access control.

Reduces the risk of unauthorized access to scanned and printed FCI.

B). Single administrative account #Incorrect

A single admin account does not restrict access between devices, only controls who can configure the MFD.

C). Documentation showing MFD configuration #Incorrect

Documentation helps with compliance but does not actively restrict access.

D). Access lists only known to the IT administrator #Incorrect

Access lists should be system-enforced, not just "known" to the administrator.

CMMC Practice SC.3.192 (Network Segmentation)- Requires restricting access using network segmentation techniques such as VLANs.

NIST SP 800-171 (SC Family)- Supports isolation of sensitive devices using VLANs and other segmentation controls.

Why the Correct Answer is "A. Virtual LAN (VLAN) Restrictions"? Why Not the Other Options? Relevant CMMC 2.0

References: Final Justification: Since Virtual LAN (VLAN) restrictions enforce access control at the network level, the correct answer is A. Virtual LAN (VLAN) restrictions.

질문 # 98

During assessment planning, the OSC recommends a person to interview for a certain practice. The person being interviewed MUST be the person who:

- **A. implements, performs, or supports that practice.**

- B. audits that practice.
- C. supports, audits, and performs that practice.
- D. funds that practice.

정답: A

질문 # 99

While determining the scope for a company's CMMC Level 1 Self-Assessment, the contract administrator includes the hosting providers that manage their IT infrastructure. Which asset type BEST describes the third- party organization?

- A. Facilities
- B. People
- C. Technology
- D. ESPs

정답: D

설명:

When a company uses third-party IT providers to manage their infrastructure, these organizations are classified as External Service Providers (ESPs) under CMMC scoping guidelines.

Step-by-Step Breakdown #1. What is an ESP?

* External Service Providers (ESPs) are third-party organizations that:

* Provide IT services, cloud hosting, and managed security solutions.

* Process, store, or transmit FCI or CUI on behalf of a contractor.

* Must meet the same security requirements as the OSC if they handle FCI or CUI.

* If a company relies on a hosting provider to manage IT infrastructure, that provider is an ESP under CMMC scoping guidelines.

#2. Why the Other Answer Choices Are Incorrect:

* (B) People #

* Incorrect: ESPs are organizations, not individual people.

* (C) Facilities #

* Incorrect: Facilities refer to physical locations like office buildings or data centers, not third-party service providers.

* (D) Technology #

* Incorrect: While ESPs provide technology services, the correct term for third-party IT providers under CMMC is ESPs, not just "Technology."

* The CMMC Level 1 Scoping Guide defines External Service Providers (ESPs) as third-party organizations that manage IT infrastructure and security services.

Final Validation from CMMC Documentation: Thus, the correct answer is:

#A. ESPs (External Service Providers).

질문 # 100
