## ISACA Certified Information Security Manager Sample Questions (Q379-Q384):

### NEW QUESTION # 379

An IS manager has decided to implement a security system to monitor access to the Internet and prevent access to numerous sites. Immediately upon installation, employees flood the IT helpdesk with complaints of being unable to perform business functions on Internet sites. This is an example of:

- A. proving information security's protective abilities.
- B. implementing appropriate controls to reduce risk.
- C. conflicting security controls with organizational needs.
- D. strong protection of information resources.

**Answer: C**

Explanation:

The needs of the organization were not taken into account, so there is a conflict. This example is not strong protection, it is poorly configured. Implementing appropriate controls to reduce risk is not an appropriate control as it is being used. This does not prove the ability to protect, but proves the ability to interfere with business.

### NEW QUESTION # 380

The BEST method for detecting and monitoring a hacker's activities without exposing information assets to unnecessary risk is to utilize:

- A. decoy files.
- B. firewalls.
- C. screened subnets.
- D. bastion hosts.

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

Decoy files, often referred to as honeypots, are the best choice for diverting a hacker away from critical files and alerting security of the hacker's presence. Firewalls and bastion hosts attempt to keep the hacker out, while screened subnets or demilitarized zones (DMZs) provide a middle ground between the trusted internal network and the external untrusted Internet.

### NEW QUESTION # 381

To justify the need to invest in a forensic analysis tool, an information security manager should FIRST:

- A. review the functionalities and implementation requirements of the solution.
- B. provide examples of situations where such a tool would be useful.
- C. review comparison reports of tool implementation in peer companies.
- **D. substantiate the investment in meeting organizational needs.**

**Answer: D**

Explanation:

Section: INFORMATION SECURITY GOVERNANCE

Explanation:

Any investment must be reviewed to determine whether it is cost effective and supports the organizational strategy. It is important to review the features and functionalities provided by such a tool, and to provide examples of situations where the tool would be useful, but that comes after substantiating the investment and return on investment to the organization.

### NEW QUESTION # 382

Which of the following is the GREATEST benefit of a centralized approach to coordinating information security?

- A. Reduction in the number of policies
- B. Integration with business functions
- C. Business user buy-in
- **D. Optimal use of security resources**

**Answer: D**

### NEW QUESTION # 383

An information security team has been tasked with identifying confidential data within the organization to formalize its asset classification scheme. The MOST relevant input would be provided by:

- A. database administrators (DBAs).
- **B. business process owners.**
- C. the legal department.
- D. the chief information officer (CIO),

**Answer: B**

### NEW QUESTION # 384
