

Valid 312-50v13 Exam Syllabus - Online 312-50v13 Test

2026 Latest Pass4guide 312-50v13 PDF Dumps and 312-50v13 Exam Engine Free Share: https://drive.google.com/open?id=1zX9ylk-dkY3HT17Kay_arvujk1SA2GwT

Our company is widely acclaimed in the industry, and our 312-50v13 learning dumps have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the 312-50v13 real questions, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our 312-50v13 practice guide is devoted to research on which methods are used to enable users to pass the test faster. Therefore, through our unremitting efforts, our 312-50v13 Real Questions have a pass rate of 98% to 100%. Therefore, our company is worthy of the trust and support of the masses of users, our 312-50v13 learning dumps are not only to win the company's interests, especially in order to help the students in the shortest possible time to obtain qualification certificates.

As the labor market becomes more competitive, a lot of people, of course including students, company employees, etc., and all want to get 312-50v13 authentication in a very short time, this has developed into an inevitable trend. Each of them is eager to have a strong proof to highlight their abilities, so they have the opportunity to change their current status, including getting a better job, have higher pay, and get a higher quality of material, etc. It is not easy to qualify for a qualifying exam in such a short period of time. Our company's 312-50v13 learning material is very good at helping customers pass the exam and obtain a certificate in a short time, and now I'm going to show you our 312-50v13 Learning materials.

>> Valid 312-50v13 Exam Syllabus <<

100% Pass 312-50v13 - Accurate Valid Certified Ethical Hacker Exam (CEHv13) Exam Syllabus

Once you have practiced on our Certified Ethical Hacker Exam (CEHv13) test questions, the system will automatically memorize and analyze all your practice. You must finish the model test in limited time. There have a timer on the right of the interface. Once you begin to do the exercises of the 312-50v13 test guide, the timer will start to work and count down. If you don't finish doing the exercises, all your exercises of the 312-50v13 Exam Questions will be delivered automatically. Then the system will generate a report according to your performance. You will clearly know where you are good at or not. Then you can make your own learning plans based on the report of the 312-50v13 test guide. Also, you will do more practices that you are not good at until you completely have no problem

ECCouncil Certified Ethical Hacker Exam (CEHv13) Sample Questions (Q219-Q224):

NEW QUESTION # 219

An organization is performing a vulnerability assessment for mitigating threats. James, a pen tester, scanned the organization by building an inventory of the protocols found on the organization's machines to detect which ports are attached to services such as an

email server, a web server or a database server. After identifying the services, he selected the vulnerabilities on each machine and started executing only the relevant tests. What is the type of vulnerability assessment solution that James employed in the above scenario?

- **A. inference-based assessment**
- B. Service-based solutions
- C. Product-based solutions
- D. Tree-based assessment

Answer: A

Explanation:

In an inference-based assessment, scanning starts by building an inventory of the protocols found on the machine. After finding a protocol, the scanning process starts to detect which ports are attached to services, such as an email server, web server, or database server. After finding services, it selects vulnerabilities on each machine and starts to execute only those relevant tests.

NEW QUESTION # 220

During a red team exercise at a financial services firm in Phoenix, Arizona, an ethical hacker sends a phishing email with a disguised attachment to employees. The purpose is to transmit the payload into the environment so later attack steps can proceed. In the cyber kill chain model, which phase does this represent?

- **A. Delivery**
- B. Weaponization
- C. Exploitation
- D. Reconnaissance

Answer: A

Explanation:

In the Cyber Kill Chain, Delivery is the phase where the attacker transmits the weaponized payload to the target. The scenario states the red teamer "sends a phishing email with a disguised attachment" specifically "to transmit the payload into the environment so later attack steps can proceed." That is precisely the purpose of Delivery: getting the malicious content to the victim through a chosen vector such as email attachments, links, drive-by downloads, USB drops, or other transfer mechanisms.

This is distinct from Weaponization, which occurs earlier. Weaponization is when the attacker prepares the payload—combining an exploit with a malware/RAT or crafting the malicious document/attachment. Once weaponized, the attacker must deliver it. The phishing email itself is the delivery vehicle, and the attachment is the delivered object. The next phases would typically include Exploitation (triggering the exploit when the user opens the attachment), Installation (establishing malware/persistence), Command and Control, and Actions on Objectives.

Why the other options do not match:

Reconnaissance (A) is gathering information about the target (people, infrastructure, technologies) before sending anything.

Weaponization (D) is building/preparing the malicious attachment and exploit, not sending it.

Exploitation (B) is the moment the delivered content successfully triggers a vulnerability or executes code (e.g., when the victim opens the attachment and the exploit runs).

Because the described action is the actual transmission of the payload via phishing email, the kill chain phase is C. Delivery.

NEW QUESTION # 221

The configuration allows a wired or wireless network interface controller to pass all traffic it receives to the Central Processing Unit (CPU), rather than passing only the frames that the controller is intended to receive.

Which of the following is being described?

- A. Multi-cast mode
- B. Port forwarding
- **C. Promiscuous mode**
- D. WEM

Answer: C

Explanation:

Promiscuous mode is a configuration for a network interface card (NIC) that allows it to pass all network traffic to the CPU for processing, not just the traffic addressed to that NIC. It is commonly used in:

Network sniffing and monitoring

Packet analysis tools like Wireshark

IDS/IPS systems

Reference - CEH v13 Official Study Guide:

Module 8: Sniffing

Quote:

"Promiscuous mode allows a NIC to capture all packets on the network segment, regardless of the destination MAC address."

Incorrect Options:

A). Multicast mode handles group address traffic, not all frames

C). WEM is not a valid network mode term

D). Port forwarding redirects traffic to specific internal IPs

=

NEW QUESTION # 222

A penetration tester needs to map open ports on a target network without triggering the organization's intrusion detection systems (IDS), which are configured to detect standard scanning patterns and abnormal traffic volumes. To achieve this, the tester decides to use a method that leverages a third-party host to obscure the origin of the scan. Which scanning technique should be employed to accomplish this stealthily?

- A. Perform a TCP SYN scan using slow-timing options
- B. Execute a UDP scan with packet fragmentation
- C. Conduct a TCP FIN scan with randomized port sequences
- **D. Use an Idle scan by exploiting a "zombie" host**

Answer: D

Explanation:

CEH v13 identifies the Idle Scan as one of the most stealthy and advanced reconnaissance techniques due to its ability to avoid generating any traffic directly between the attacker and the target. Using a "zombie host," which has predictable IP ID sequencing, the attacker forges packets so that all scan traffic appears to originate from the zombie. The IDS sees communication only between the zombie and the target, not the attacker. This allows evasion of network monitoring tools, traffic correlation systems, and intrusion detection signatures.

CEH highlights Idle Scanning as a core technique for bypassing sophisticated detection controls because it leaves no direct fingerprint of the attacker. Options A and B still originate from the attacker's IP. Option C can evade some filters but remains detectable due to packet anomalies. Only Idle Scanning provides full origin obfuscation, making it the most appropriate method for stealth port enumeration.

NEW QUESTION # 223

Josh has finished scanning a network and has discovered multiple vulnerable services. He knows that several of these usually have protections against external sources but are frequently susceptible to internal users. He decides to draft an email, spoof the sender as the internal IT team, and attach a malicious file disguised as a financial spreadsheet. Before Josh sends the email, he decides to investigate other methods of getting the file onto the system. For this particular attempt, what was the last stage of the cyber kill chain that Josh performed?

- **A. Delivery**
- B. Weaponization
- C. Exploitation
- D. Reconnaissance

Answer: A

Explanation:

Josh is preparing to send the payload (malicious file) to the target, which clearly maps to the Delivery phase of the Cyber Kill Chain. According to CEH v13 and the Cyber Kill Chain model (developed by Lockheed Martin and used in ethical hacking methodology):

* Delivery is the third phase of the kill chain.

* It involves transmitting the weaponized payload to the target via phishing emails, USB drops, or malicious links.

* In this case, Josh is preparing the email with a spoofed identity and malicious attachment - representing an act of delivery.

Incorrect options:

- * A. Exploitation occurs after delivery, when the payload is executed.
- * B. Weaponization is the phase where the malicious file is created (combining exploit with a backdoor or trojan).
- * D. Reconnaissance involves information gathering, completed earlier in the scenario.

NEW QUESTION # 224

.....

ECCouncil 312-50v13 certification exam is very important for every IT person. With this certification you will not be eliminated, and you will be a raise. Some people say that to pass the ECCouncil 312-50v13 exam certification is tantamount to success. Yes, this is true. You get what you want is one of the manifestations of success. Pass4guide of ECCouncil 312-50v13 Exam Materials is the source of your success. With this training materials, you will speed up the pace of success, and you will be more confident.

Online 312-50v13 Test: <https://www.pass4guide.com/312-50v13-exam-guide-torrent.html>

With 312-50v13 Ppt practice materials, you don't need to spend a lot of time and effort on reviewing and preparing. It is an explicit advantage of our 312-50v13 : Certified Ethical Hacker Exam (CEHv13) free download torrent, We have been dedicated in ECCouncil Online 312-50v13 Test industry for over a decade, you can trust our professional technology and all efforts we have made, ECCouncil Valid 312-50v13 Exam Syllabus Now it is your opportunity.

The third category consists of programming 312-50v13 libraries, Keep in mind that lighting should enhance performances without being overly noticed, With 312-50v13 Ppt practice materials, you don't need to spend a lot of time and effort on reviewing and preparing.

Pass 312-50v13 Exam with Flying Colors Using ECCouncil's Exam Questions and Achieve Success

It is an explicit advantage of our 312-50v13 : Certified Ethical Hacker Exam (CEHv13) free download torrent, We have been dedicated in ECCouncil industry for over a decade, you can trust our professional technology and all efforts we have made.

Now it is your opportunity, With Pass4guide ECCouncil 312-50v13 exam certification training, you can sort out your messy thoughts, and no longer twitchy for the exam.
