

# 100% Pass Perfect Appian - ACD101 Valid Dumps Questions

Our practice exams are designed solely to help you get your ACD101 certification on your first try. A Appian ACD101 practice test will help you understand the exam inside out and you will get better marks overall. It is only because you have practical experience of the exam even before the exam itself. Actualtests4sure offers authentic and up-to-date study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Appian Associate Developer (ACD101) exam on the first try. The key to passing the ACD101 exam on the first try is vigorous practice. And that's exactly what you'll get when you prepare from our material. Each format excels in its own way and helps you get success on the first attempt.

## Appian ACD101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Data Persistence:</b> Here, the Appian Associate Developer test examines your skills in managing data and relational databases, including the use of CDTs and query entities. You will need to demonstrate proficiency in handling records, querying data, and updating data models.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Appian Development: Expression Rules:</b> The ACD101 exam evaluates the ability of aspiring Appian developers to interpret and build expression rules, implement functions, and use test cases to ensure rule quality. It also assesses your understanding of best practices for expression rules.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Appian Development: Process Models:</b> This topic of the ACD101 exam focuses on your ability to create, debug, and publish process models within Appian. It includes configuring workflow nodes, Smart Services, and understanding data flow in processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Introduction to the Appian Platform:</b> The Appian Associate Developer exam tests the familiarity of aspiring Appian developers with essential Appian resources like online docs and Appian Max, and their abilities to organize application structures. It measures your understanding of how to utilize the capabilities of Appian, such as process mining and RPA, to address business challenges effectively.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>General Appian Principles:</b> This topic of the ACD101 Exam assesses the knowledge of Appian developers about Appian platform permissions, including role-based security, and differentiates between various design objects like processes and records. It evaluates your understanding of Appian environments as well.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Appian Development: Interface Design:</b> The exam evaluates capabilities of Appian developers to design and construct interfaces, configure local variables, and use interface components like drop-downs and grids. The ACD101 exam also tests your adherence to best practices in interface design, as well as your skills in testing and troubleshooting interfaces.</li> </ul>

## ACD101 Latest Dumps Files - New ACD101 Test Simulator

The pass rate reaches 98.95%, and if you choose us, we can ensure you pass the exam. ACD101 study materials are edited by

skilled professionals, and they are quite familiar with the dynamics of the exam center, therefore ACD101 study materials can meet your needs for exam. What's more, we offer you free demo to try before purchasing ACD101 Exam Dumps, so that you can know the mode of the complete version. If you have any questions about ACD101 study materials, you can ask for our service staff for help.

## Appian Associate Developer Sample Questions (Q107-Q112):

### NEW QUESTION # 107

Which step can be critical in passing information from a form back to a process model?

- **A. Configure inputs on the Data tab of a User Input Task.**
- B. Configure the Data Management tab.
- C. Configure the activity class parameters of a Write to Data Store Entity node, a

**Answer: A**

Explanation:

The critical step in passing information from a form back to a process model is to configure inputs on the Data tab of a User Input Task. When you create a User Input Task, it includes a form for users to interact with. The data entered into this form can be mapped to process variables via the Data tab configuration. This ensures that the information collected in the form is available to the process for further use.

References: Appian Documentation - User Input Tasks

### NEW QUESTION # 108

You need to pass data into a process from other parts of your Appian application. Which configuration is required in your process model?

- A. Add an interface as a Process Start Form
- **B. Toggle the Parameter field to ' True ' on the configuration of a process variable.**
- C. Create process variables on the Data Management tab of Process Model Properties.

**Answer: B**

### NEW QUESTION # 109

You are creating a new interface object to display a pie chart.

The data for the chart is stored in a local variable in the parent interface object which references your child interface. In terms of performance, what is the most efficient method to access the data required for the pie chart?

- A. Query the data separately in the child interface to avoid passing it from the parent interface.
- B. Reference the local variable directly from the child Interface using a process report.
- **C. Create a rule input on the child interface and pass the local variable data from the parent interface.**

**Answer: C**

Explanation:

The most efficient method to access data for a pie chart in a child interface is to create a rule input on the child interface and pass the local variable data from the parent interface. This method avoids redundant data queries and takes advantage of Appian's pass-by-reference mechanism, which does not duplicate data in memory when passing it to the child interface.

Reference: Appian Documentation - Interface Design

### NEW QUESTION # 110

Match each scenario to the correct relationship type in your data model design.

Note: Each relationship type will be used once. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

**Answer:**
