

4A0-113 Reliable Exam Online, 4A0-113 New Study Materials

What's more, part of that Dumpkiller 4A0-113 dumps now are free: <https://drive.google.com/open?id=1fmE2VUWErb9E5SV8xRSobHKrpAXUcDHV>

The client can try out and download our 4A0-113 training materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of our 4A0-113 learning questions. You can see the demos which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our study materials.

Nokia 4A0-113 exam is aimed at IT professionals who are responsible for the design, implementation, and management of enterprise and service provider networks. 4A0-113 exam is also suitable for network engineers, network administrators, and other IT professionals who are interested in learning more about OSPF and its role in modern networks. 4A0-113 exam is a vendor-neutral certification, meaning that it is recognized by a wide range of organizations and employers.

Nokia 4A0-113 is a certification exam that validates the knowledge and skills of candidates in implementing Nokia OSPF Routing Protocol. 4A0-113 exam is designed to test the proficiency of candidates in configuring, troubleshooting, and optimizing OSPF networks using Nokia equipment.

4A0-113 New Study Materials, Real 4A0-113 Testing Environment

No matter who you are, I believe you can do your best to achieve your goals through our 4A0-113 Preparation questions! For we have three different versions of 4A0-113 exam materials to satisfy all your needs. The PDF version of 4A0-113 practice guide can be printed so that you can take it wherever you go. And the Software version can simulate the real exam environment and support offline practice. Besides, the APP online can be applied to all kind of electronic devices.

Nokia OSPF Routing Protocol Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

From the list below select the statements that describe the behavior of link state information aging. (Choose 2)

- A. The age is incremented or decremented as it is flooded from router to router and as it is held in the topological database.
- B. The age for newly created link state information is set to 1200 for OSPF and 0 for IS-IS
- C. The age is incremented or decremented only as it is held in the topological database and not as it is flooded router to router.
- D. The age for newly created link state information is set to 0 for OSPF and 1200 for IS-IS

Answer: A,D

NEW QUESTION # 15

There is an IP host with IP address 10.2.3.1. A static route is created, using the "configure router static-route 10.2.3.0/24 next-hop 10.1.2.1" command. What is the correct traceroute command to test this static route on an Nokia 7750 SR?

- A. traceroute does not work on the Nokia 7750 SR.
- B. traceroute 10.1.2.1
- C. traceroute 10.2.3.1 next-hop 10.1.2.1
- D. traceroute next-hop 10.1.2.1
- E. traceroute 10.2.3.1

Answer: E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS Router Configuration Guide (Monitoring and Testing Tools, Chapter:

Verifying Static Routing):

"Once a static route has been configured, you can verify its reachability by using standard ICMP-based commands such as ping or traceroute, targeting an IP address within the destination prefix." Here:

The static route was configured for network 10.2.3.0/24.

You want to test connectivity to host 10.2.3.1, which belongs to that network.

The traceroute command automatically uses the router's routing table (RIB/FIB), so you only need to provide the destination IP address.

Thus, the correct command is simply:

traceroute 10.2.3.1

-

NEW QUESTION # 16

A static route is created using the command "static-route 0.0.0.0/0 next-hop 3.3.3.1". What command could be used to test the static route on an Nokia 7750 SR?

- A. Ping 3.3.3.1
- B. Ping static 0.0.0.0/0
- C. Ping static 3.3.3.1
- D. Ping 0.0.0.0

Answer: A

NEW QUESTION # 17

Click the exhibit button.

□ In the topology shown, router R1 is an ASBR configured to export external routes to OSPF. How many type 4 LSAs will be present in the network?

- A. Type 4 LSAs are not generated in this network topology.
- B. One for each of the external routes exported by router R1.
- C. One for each of the routers in area 0
- D. One.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS OSPF Guide - LSA Types and Inter-area Operation Section:

"Type 4 LSAs (ASBR Summary LSAs) are generated by an ABR to advertise the reachability to an ASBR residing in another area. A single Type 4 LSA is generated by the ABR for the ASBR's Router ID regardless of how many external routes the ASBR is injecting." In this topology:

R1 is the ASBR redistributing external routes.

R2 is the ABR connected to both the backbone (Area 0) and the ASBR's area.

Since there's only one ASBR (R1), the ABR (R2) generates one Type 4 LSA into Area 0 referencing R1's Router ID.

Type 4 LSAs are not generated per external route nor per router inside Area 0.

Thus, the correct answer is A. One.

#Fully verified as per Nokia OSPF Routing Protocol official materials.

NEW QUESTION # 18

When an OSPF adjacency is stuck in the "ExchStart" state, what is the most likely cause?

- A. The MTU does not match on both interfaces
- B. OSPF is not enabled on one of the routers
- C. The Router ID is the same on both routers
- D. A OSPF Hello has not been received from the neighbor

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF Neighbor State Machine):

The ExStart state is where routers negotiate who will be the master during database exchange, based on router IDs.

If both routers have the same Router ID, the negotiation cannot proceed, causing the adjacency to be stuck in ExStart.

Thus, correct answer: C.

Dumpkiller online digital Nokia OSPF Routing Protocol Exam (4A0-113) exam questions are the best way to prepare. Using our Nokia OSPF Routing Protocol Exam (4A0-113) exam dumps, you will not have to worry about whatever topics you need to master. To practice for a Nokia 4A0-113 certification exam in the software (free test), you should perform a self-assessment. The Nokia 4A0-113 Practice Test software keeps track of each previous attempt and highlights the improvements with each attempt. The Nokia OSPF Routing Protocol Exam (4A0-113) mock exam setup can be configured to a particular style or arrive at unique questions.
