The ServiceNow CIS-SPM mock exam setup can be configured to a particular style and arrive at unique questions.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q62-Q67):

NEW QUESTION # 62
What information are users required to enter on a cost plan for a demand?

- A. Functional currency
- B. Total planned cost
- C. Cost type
- D. Discount Rate %

Answer: C

Explanation:
According to the Cost plan breakdown document, users are required to enter the cost type for each cost plan line item. Cost type is a mandatory field that specifies the type of cost, such as labor, software, hardware, etc. The other options are not required fields for a cost plan for a demand. Discount Rate % is an optional field that applies a discount rate to the cost plan. Total planned cost is a read-only field that displays the sum of the planned cost for all the cost plan breakdowns. Functional currency is a system property that defines the currency used for cost management.

NEW QUESTION # 63
Which of the following defines a parent-child relationship?

Choose 2 answers

- A. Parent-child task relationships do not have any effect on task time constraints.
- B. Any number of child tasks can be nested under a parent task with or without any dependencies.
- C. A parent-child task must finish before another begins.
- D. A parent-child relationship is not saved as a record in any table.

Answer: B,D

NEW QUESTION # 64

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. im_idea_core
- B. im_module
- C. dmn_demand
- D. im_category

Answer: D

Explanation:
According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn_demand table stores the demand records that are created from the approved ideas. The im_module table stores the idea modules that are used to group ideas by different criteria. The im_idea_core table stores the core fields of the idea records.

NEW QUESTION # 65

Which role is needed to group related projects and demands?

- A. it_demand_manager
- B. it_project_manager
- C. it_program_manager
- D. it_project_user

Answer: C

Explanation:
According to the ServiceNow documentation1, the it_program_manager role is needed to group related projects and demands. This role can create and manage programs, which are containers for projects and demands that share a common goal or objective. The other options are incorrect because:
B . it_project_manager: The it_project_manager role can create and manage projects, but not group them into programs2.
C . it_demand_manager: The it_demand_manager role can create and manage demands, but not group them into programs3.
D . it_project_user: The it_project_user role can view and edit project tasks, but not create or manage projects, demands, or programs4.
