

# 100-160 Simulation Questions, 100-160 Test Dates

## TEXES 160 PPR Exam Questions and Answers 100% Pass

Which of the following rationales would a supporter of block scheduling provide to convince others to support the organizational structure?

- A. Teachers can focus on more subjects in a shorter time
- B. There is an emphasis on mastering facts and skills
- C. Students' time in quality learning situations is increased
- D. The responsibility for learning is shifted to the teachers ✓✓C. Students' time in quality learning situations is increased

Which of the following strategies best supports a teacher's goal to incorporate critical thinking skills into language arts lessons?

- A. Providing students with opportunities to seek additional content knowledge
- B. Creating a forum for students to debate points of view ✓✓B. Creating a forum for students to debate points of view
- C. Having students individually summarize various literature read
- D. Asking students to create practice questions as a review activity

The modern Cisco world is changing its dynamics at a fast pace. To stay updated and competitive you have to learn these technological changes. With the one Cisco Certified Support Technician (CCST) Cybersecurity (100-160) certification exam you can do this easily. The Cisco Certified Support Technician (CCST) Cybersecurity (100-160) certification exam offers a unique and quick way to learn new in-demand expertise and enhance your knowledge.

## Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection prevention systems, providing insight into how threats are mitigated within network environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems</li> </ul>

## Cisco 100-160 Test Dates, 100-160 Latest Exam Pass4sure

People always tend to neglect the great power of accumulation, thus the 100-160 study materials can not only benefit one's learning process but also help people develop a good habit of preventing delays. We have full confidence to ensure that you will have an enjoyable study experience with our 100-160 Study Materials, which are designed to arouse your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages.

## Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q196-Q201):

### NEW QUESTION # 196

Which of the following is an example of a passive vulnerability identification technique?

- A. Vulnerability scanning
- B. Incident response
- C. Intrusion detection system (IDS)
- D. Penetration testing

**Answer: A**

Explanation:

Vulnerability scanning is a passive technique used to identify vulnerabilities in a system or network. It involves the use of automated tools that scan the system for known vulnerabilities without actively exploiting them.

### NEW QUESTION # 197

Which of the following is NOT a typical phase of the planning process in cybersecurity?

- A. Policy development
- B. Vulnerability scanning
- C. Risk assessment
- D. Incident response planning

**Answer: B**

Explanation:

The planning process in cybersecurity typically includes several phases, such as risk assessment, policy development, and incident response planning. Vulnerability scanning, although an important activity in cybersecurity, is considered a technical control rather than a specific phase of the planning process.

### NEW QUESTION # 198

Which of the following options is an example of a cybersecurity news and subscription service?

- A. VPN (Virtual Private Network)
- B. SIEM (Security Information and Event Management) system
- C. Email filtering software

- D. Firewall

**Answer: B**

Explanation:

A SIEM system is an example of a cybersecurity news and subscription service. It collects and analyzes security event data from various sources and provides real-time alerts and reports to enhance threat detection and management. It provides valuable insights into the cybersecurity landscape, including news and updates related to security incidents, vulnerabilities, and emerging threats.

#### NEW QUESTION # 199

Which of the following is NOT a component of an incident response policy?

- A. Roles and responsibilities
- B. Escalation procedures
- C. Backup and recovery processes
- D. Incident handling procedures

**Answer: C**

Explanation:

Backup and recovery processes are typically part of an organization's data backup and disaster recovery plan, which is separate from the incident response policy. The incident response policy focuses on defining roles, responsibilities, escalation procedures, and incident handling procedures for responding to cybersecurity incidents.

#### NEW QUESTION # 200

You need a software solution that performs the following tasks:

Compiles network data

Logs information from many sources

Provides orchestration in the form of case management

Automates incident response workflows

What product should you use?

- A. SOAR
- B. Snort
- C. SIEM
- D. NextGen IPS

**Answer: A**

Explanation:

The CCST Cybersecurity Study Guide explains that SOAR (Security Orchestration, Automation, and Response) platforms integrate data from multiple tools and sources, support case management, and automate security workflows for faster incident response.

"SOAR solutions provide orchestration, automation, and response capabilities. They collect security data from multiple systems, enable analysts to manage incidents, and automate repetitive tasks in the response process." (CCST Cybersecurity, Incident Handling, Security Automation Tools section, Cisco Networking Academy) A (SIEM) collects and correlates security logs but lacks full orchestration and automated response capabilities.

B is correct: SOAR adds orchestration, case management, and automated incident response.

C (NextGen IPS) focuses on intrusion prevention, not orchestration.

D (Snort) is an open-source intrusion detection/prevention tool, not an orchestration platform.

#### NEW QUESTION # 201

.....

Many job-hunters want to gain the competition advantages in the labor market and become the hottest people which the companies rush to get. But if they want to realize that they must boost some valuable 100-160 certificate to raise their values and positions in the labor market. our 100-160 Study Guide is becoming increasingly obvious degree of helping the exam candidates with passing rate up to 98 to 100 percent. All details of the 100-160 exam questions are developed to aim squarely at improving your chance of success.
