It focuses on optimizing performance, resolving issues, and ensuring data security in data visualization environments.</li> </ul>

## SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q24-Q29):

### NEW QUESTION # 24

You have a dimension with members for product groups and products. Each product group has associated products. You want to plan by product group without disaggregating into the products. How can you do this?

- A. Dis-able distribution
- B. Dis-able allocations
- C. Use two properties
- D. Use two hierarchies

**Answer: D**

Explanation:

When you have a dimension with members for product groups and associated products and want to plan by product group without disaggregating into the individual products, using two hierarchies is the best approach. One hierarchy can represent the product groups at a higher level, allowing for planning and analysis at the group level. The second hierarchy can include both the product groups and their associated individual products for more detailed analysis when needed. This approach provides flexibility in planning and analyzing data at different levels of detail without the necessity of disaggregating data at the product group level.

SAP Analytics Cloud User Guide: Managing Hierarchies for Planning

### NEW QUESTION # 25

You are using a live connection for a model. Where can you define data security?

- A. SAP Analytics Cloud model
- B. SAP Analytics Cloud role
- C. Source system
- D. Data access control

**Answer: C**

Explanation:

When using a live connection in SAP Analytics Cloud, data security is defined and managed within the source system. This approach leverages the existing security protocols and permissions set up in the source system, ensuring that data governance and access controls remain consistent and are centrally managed. Users accessing data through SAP Analytics Cloud with a live connection will be subject to the same security constraints and permissions as if they were accessing the data directly from the source system. This integration ensures a unified security model, simplifying administration and ensuring data security and compliance.

### NEW QUESTION # 26

Which SAP Analytics Cloud feature uses natural language processing?

- A. Data analyzer
- B. Just Ask feature
- C. Digital boardroom
- D. Smart insight

**Answer: B**

#### NEW QUESTION # 27

You are entering values for several expense accounts in a data table. Which data entry mode must you use to process the data with a delay defined in System Administration?

- A. Fluid
- B. Mass
- C. Single

**Answer: A**

#### NEW QUESTION # 28

To which story elements can you apply conditional formatting? Note: There are 2 correct answers to this question.

- A. Composite
- B. Chart
- C. Lane
- D. Table

**Answer: B,D**

Explanation:

In SAP Analytics Cloud stories, conditional formatting can be applied to Table and Chart elements. This feature allows users to visually highlight data points based on specific conditions, such as thresholds, ranges, or comparisons, making it easier to identify trends, outliers, or areas of interest within the data presented in tables and charts.
