

C_BCBTP_2502최고덤프샘플 - C_BCBTP_2502인기자격증인증시험자료

 **Get the Top SAP C_BCBTP_2502 Exam PDF Questions — Achieve on Your First Effort!**

Are you aiming to succeed the SAP C_BCBTP_2502 exam questions on your very first try? Certification exams in 2025 are demanding than ever, demanding extensive knowledge and practical experience. To increase your chances of accomplishment, you need exact and current learning guides. HelloDumps provides [SAP C_BCBTP_2502 dumps](#) and expert-reviewed study materials to help you practice effectively. The greatest part? You can now enjoy an exclusive 35% deal on all study materials!

Why Choose HelloDumps for Your C_BCBTP_2502 Exam Preparation?

 **Valid C_BCBTP_2502 Exam Questions – Obtain an Lead Over Others**
HelloDumps offers actual exam-like questions, closely corresponding with the latest C_BCBTP_2502 composition, difficulty level, and syllabus of the SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite certification. Practicing these questions helps you understand the test structure and enhances your achievement.

 **Obtain SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Exam Questions 2025 Here: <https://hellodumps.com/c-bcbtp-2502-pdf-dumps.html>**

 **Three Practical Learning Formats**
We provide study materials in various formats to suit different learning styles:

-  **PDF Layout** – Study on any device, anytime, anywhere.
-  **Desktop Preparation Test** – Simulates real exam conditions with customizable mock tests.
-  **Web-Based Drill Test** – No installation required—practice directly from

KoreaDumps에서 출시한 SAP인증 C_BCBTP_2502덤프는 실제시험문제 커버율이 높아 시험패스율이 가장 높습니다. SAP인증 C_BCBTP_2502시험을 통과하여 자격증을 취득하면 여러방면에서 도움이 됩니다. KoreaDumps에서 출시한 SAP인증 C_BCBTP_2502덤프를 구매하여SAP인증 C_BCBTP_2502시험을 완벽하게 준비하지 않으실래요? KoreaDumps의 실력을 증명해드릴게요.

SAP C_BCBTP_2502 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP’s portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

주제 2	<ul style="list-style-type: none"> • Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

C_BCBTP_2502최고덤프샘플 퍼펙트한 덤프공부

C_BCBTP_2502인증시험은SAP사의 인증시험입니다.SAP인증사의 시험을 패스한다면 it업계에서의 대우는 달라집니다. 때문에 점점 많은 분들이SAP인증C_BCBTP_2502시험을 응시합니다.하지만 실질적으로C_BCBTP_2502시험을 패스하시는 분들은 너무 적습니다.전분적인 지식을 터득하면서 완벽한 준비하고 응시하기에는 너무 많은 시간이 필요합니다.하지만 우리KoreaDumps는 이러한 여러분의 시간을 절약해드립니다.

최신 SAP Certified Associate C_BCBTP_2502 무료 샘플문제 (Q25-Q30):

질문 # 25

How does SAP LeanIX enhance business IT governance when integrated with SAP BTP?

- A. By preventing cloud-based integrations.
- **B. By providing IT landscape analysis and risk management.**
- C. By restricting governance frameworks to manual tracking.
- D. By eliminating enterprise architecture visualization.

정답: B

설명:

IT governance is often a challenge during rapid digital expansion. As more services are deployed on SAP BTP, maintaining a clear overview of the "who, what, and where" becomes critical. SAP LeanIX enhances business IT governance by providing a structured framework for IT landscape analysis and risk management. It acts as a "single source of truth" for the enterprise architecture, documenting all applications, their dependencies, and the business capabilities they support. When integrated with SAP BTP, LeanIX helps organizations avoid "SaaS sprawl" (the unmanaged growth of cloud applications). It provides visibility into which BTP services are being used and identifies potential security risks, such as applications running on outdated versions or services that lack proper data privacy controls. This level of transparency is essential for compliance and cost management. By analyzing the "Technical Fit" and "Business Fit" of the IT landscape, LeanIX allows executives to make informed decisions about decommissioning legacy systems and investing in new BTP-driven innovations. This strategic positioning ensures that the evolution of the SAP Business Suite is governed by data rather than guesswork, reducing operational risk and ensuring that the IT infrastructure is robust, secure, and fully aligned with the organization's long-term goals.

질문 # 26

Which SAP BTP service enables businesses to orchestrate and monitor enterprise-wide workflows?

- **A. SAP Workflow Management**
- B. SAP Business Network
- C. SAP Conversational AI
- D. SAP Ariba

정답: A

설명:

In the context of the Intelligent Enterprise, business processes often span multiple departments and different software systems. SAP Workflow Management (now largely integrated into the SAP Build Process Automation suite) is the specific BTP service designed to bridge these gaps. It allows organizations to digitize, manage, and operate business processes with high levels of transparency. The service provides a centralized platform to define process flows, set approval limits, and ensure that tasks are routed to the correct stakeholders in a timely manner.

The importance of this service lies in its ability to provide "live process visibility." Unlike traditional siloed workflows, SAP Workflow Management on BTP can pull data from various SAP Business Suite components-like Finance, Procurement, or HR-to create an end-to-end view of a business operation. This orchestration is critical for identifying bottlenecks and improving operational efficiency. While SAP Business Network and SAP Ariba facilitate external collaboration and procurement respectively, they do not provide the underlying technical framework for custom workflow orchestration across the entire enterprise landscape. By utilizing BTP's workflow capabilities, companies can achieve a higher level of automation and governance, ensuring that business rules are consistently applied across all digital touchpoints, whether the underlying systems are cloud-based or on-premise.

질문 # 27

Why is SAP BTP considered a strategic platform for digital transformation?

- A. It centralizes integration, automation, and data-driven decision-making.
- B. It eliminates the need for external data management solutions.
- C. It provides a one-size-fits-all solution without customization options.
- D. It allows enterprises to move all workloads to SAP on-premise solutions.

정답: A

설명:

SAP BTP is the strategic foundation for the "Intelligent, Sustainable Enterprise." Its primary value lies in its ability to centralize integration, automation, and data-driven decision-making into a single, unified platform. In a modern IT landscape, data is often fragmented across multiple cloud and on-premise systems.

BTP acts as the unified technical layer that breaks down these silos. By providing a common set of services for data management (SAP HANA Cloud), analytics (SAP Analytics Cloud), and integration (SAP Integration Suite), BTP ensures that business leaders have a holistic view of their operations.

Digital transformation requires more than just moving to the cloud; it requires the ability to innovate quickly.

BTP's strategic positioning allows businesses to extend their core SAP applications (like S/4HANA) using side-by-side extensions. This keeps the "core" clean and stable while allowing for rapid innovation at the edge. Furthermore, the platform's automation capabilities (like SAP Build Process Automation) enable companies to optimize their workflows, reducing manual effort and increasing accuracy. By choosing BTP, enterprises are not just buying a set of tools; they are adopting a platform strategy that supports continuous improvement and agility, ensuring they can adapt to market changes more effectively than they could with fragmented, legacy architectures.

질문 # 28

Which of the following are key products of SAP Business Technology Platform (SAP BTP)? (Choose two).

- A. SAP HANA Cloud
- B. SAP SuccessFactors
- C. SAP Integration Suite
- D. SAP Ariba

정답: A,C

설명:

SAP Business Technology Platform (SAP BTP) is organized into four primary functional pillars: Database and Data Management, Analytics, Application Development and Integration, and Intelligent Technologies.

SAP HANA Cloud serves as the foundation of the Database and Data Management pillar, providing a single, integrated powerhouse for all enterprise data. It offers the speed of in-memory processing combined with the scalability of the cloud, allowing businesses to manage large volumes of data while providing a "single source of truth." On the other hand, SAP Integration Suite is the cornerstone of the Integration pillar. It is an integration platform-as-a-service (iPaaS) that allows organizations to seamlessly connect SAP and non-SAP applications, whether they reside on-premise or in the cloud. It provides pre-built content and connectors that significantly reduce the complexity of landscape orchestration. In contrast, SAP Ariba and SAP SuccessFactors are specialized Software-as-a-Service (SaaS) applications. While they are part of the broader SAP ecosystem and often run on or integrate via BTP, they are considered line-of-business (LoB) solutions rather than core components of the technology platform itself. Understanding this distinction is vital for positioning BTP as the underlying "glue" that enables the "Intelligent Enterprise" strategy by providing the technical tools necessary to extend and integrate these LoB applications.

질문 # 29

Which SAP BTP services support AI-driven automation? (Choose two).

- A. SAP Business Process Intelligence
- B. SAP Business Network
- C. SAP Concur
- D. SAP AI Core

정답: A,D

설명:

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models-from training to deployment- at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.

질문 # 30
