Topic 4	<ul style="list-style-type: none"> <li>• Productivity and Collaboration: This domain addresses activity management, Chatter collaboration, Salesforce mobile app customization, and AppExchange applications including managed and unmanaged packages.</li> </ul>

## Salesforce Certified Platform Administrator Sample Questions (Q108-Q113):

### NEW QUESTION # 108

A manager wants the sales team to update their opportunities on a regular basis. Which feature should a Platform Administrator implement to help with this?

- A. Scheduled Reports
- B. Big Deal Alerts
- C. Similar Opportunities
- D. Opportunity Update Reminders

**Answer: D**

Explanation:

Opportunity Update Reminders is a specific, automated feature in Salesforce designed exactly for this purpose. When enabled, it allows managers to automatically send an email to their direct reports with a list of their open opportunities. The email serves as a prompt for the reps to review their deals and ensure close dates, amounts, and stages are current. This is more effective than a general Scheduled Report (Option D) because it is a purpose-built notification system that can be configured by the manager. Big Deal Alerts (Option C) are for high-value deal notifications, not general pipeline hygiene. Similar Opportunities (Option A) helps with sales strategy but does not encourage record updates.

### NEW QUESTION # 109

A salesperson complains that the Log a Call button is missing from the highlights panel of an Opportunity page. What is the reason for this?

- A. The Log a Call action will appear within the Activity Component as a standard behavior rather than the highlights panel.
- B. The custom Log a Call permission has been disabled at the org level in Setup.
- C. The Log a Call action has not been added to the Salesforce Mobile and Lightning Experience Actions section of the page layout.
- D. The custom Log a Call permission is missing from the user's profile and assigned permission sets.

**Answer: C**

Explanation:

In the Salesforce Lightning Experience, the buttons and actions that appear in the header (Highlights Panel) of a record are controlled by the Salesforce Mobile and Lightning Experience Actions section of the Page Layout. If a specific action like "Log a Call" is missing, it is usually because it has not been dragged into this specific section in the Page Layout editor. While standard actions sometimes appear in the Activity component (Option A), they are explicitly configured for the header via the Page Layout. There is no specific "Log a Call permission" (Options C and D) that would hide only that button; if a user has permission to create Tasks, they generally have the ability to use the Log a Call feature if it is present on the layout.

### NEW QUESTION # 110

In an approval process, which feature allows a user to temporarily assign their approval responsibilities to another user for a predefined time period?

- A. Queue
- B. Delegated Approver
- C. Manager
- D. Approval Rule

**Answer: B**

Explanation:

A Delegated Approver is a user designated by an individual or an administrator to act on their behalf when an approval request is received. This is particularly useful for planned absences, such as vacations. While the delegated approver has the power to approve or reject a record, they cannot reassign the request to someone else. This is a temporary manual assignment and is different from a Manager (Option D), who is part of the permanent role hierarchy, or a Queue (Option B), which allows a group of people to share approval tasks. There is no feature called an "Approval Rule" (Option A) that handles temporary user reassignment in this manner.

#### NEW QUESTION # 111

Cloud Kicks has an administrator team that manages the org. The company has asked for a small subset of leadership users to have Modify All access, like the administrators have. How should the administrator team accomplish this?

- A. Assign the standard Platform User profile to the leadership users and edit the permissions to Modify All access.
- **B. Assign the standard User profile to the leadership users and add a custom permission set with Modify All access.**
- C. Clone the standard User profile to the leadership users and assign a Modify All role to grant access.
- D. Assign the standard System Administrator profile to the leadership users that includes the Modify All access.

**Answer: B**

Explanation:

Salesforce best practices dictate the Principle of Least Privilege, which means users should only be given the minimum level of access required to do their jobs. Assigning leadership users the "System Administrator" profile (Option B) is dangerous because it grants them the ability to change the system configuration, delete fields, and manage users. Instead, the administrator should keep the leadership users on their standard functional profile and grant the "Modify All Data" permission via a Permission Set. This approach provides the users with the data visibility they need (the ability to view and edit all records across the org) without giving them administrative control over the backend setup. Option A is incorrect because you cannot edit standard profiles directly. Option D is incorrect because "Roles" control record visibility and hierarchy, but they do not grant administrative permissions like "Modify All Data." Using a Permission Set is the most secure and flexible way to elevate data access for a specific group.

#### NEW QUESTION # 112

A Platform Administrator wants to customize the navigation menu for users in the Salesforce mobile app. The organization has not yet implemented any Lightning apps for mobile use. Which statement about the Mobile Only app navigation is correct?

- A. Lightning pages and Visualforce pages automatically appear in the Mobile Only navigation menu without requiring tabs to be created first.
- B. The Mobile Only app automatically includes all standard Salesforce objects in the navigation menu based on user permissions.
- **C. The first four items in the Mobile Only navigation menu appear both in the navigation menu and in the navigation bar at the bottom of the screen.**
- D. The Mobile Only app can be customized to show different navigation menus for different user profiles and permission sets.

**Answer: C**

Explanation:

The Mobile Only app is the default navigation experience in the Salesforce mobile app when no other Lightning apps have been assigned to a user for mobile use. In this configuration, the navigation menu is controlled globally via the "Salesforce Navigation" setup page. A key behavior of this interface is that the first four items placed in the navigation list become the "persistent" icons that appear in the navigation bar at the bottom of the mobile screen for quick access. These same items also appear at the top of the "Menu" tab. Option A is incorrect because pages must have a corresponding Tab created before they can be added to the navigation menu. Option B is incorrect because the "Mobile Only" navigation is a single global setting for the entire org; if you need different menus for different profiles, you must create and deploy specific Lightning Apps.

Option D is incorrect because standard objects do not appear automatically; the administrator must explicitly add them to the navigation list in Setup. Understanding this behavior is essential for ensuring mobile users have a streamlined and intuitive interface

#### NEW QUESTION # 113

.....

We not only do a good job before you buy our Plat-Admn-201 test guides, we also do a good job of after-sales service. Because we are committed to customers who decide to choose our Plat-Admn-201 study tool. We put the care of our customers in an important position. We provide you with global after-sales service. If you have any questions that need to be consulted, you can contact our staff at any time to help you solve problems related to our Plat-Admn-201 qualification test. Our thoughtful service is also part of your choice of buying our learning materials. Once you choose to purchase our Plat-Admn-201 test guides, you will enjoy service.
