- A. Use the Business Accounts and Contacts with Sharing Sets to grant additional record access as needed.
- B. Enable the External Account Hierarchy setting departments as child accounts.
- C. Extend the Standard Role Hierarchy setting departments as child accounts.
- D. Since NTO has person accounts, it cannot use the External Account Hierarchy and will need to use groups and sharing rules to grant the required record access.

Answer: B

Universal Containers (UC) has a customer portal so that customers can manage their shipping. UC has several sharing rules in place and leverages the External Account Hierarchy to assist with data access. One of UC's large customers, Cloud Kicks, has recently acquired Northern Trail Outfitters. Sales wants to merge these two accounts, but they are getting an error.
What could be the cause of the error?

- B. The user trying to merge the accounts does not have the Merge Portal Roles permission.
- C. The user trying to merge the accounts does not have the System Administrator profile.
