With these adjustable Microsoft Dynamics 365 Supply Chain Management Functional Consultant (MB-330) mock exams, you can focus on weaker concepts that need improvement. This approach identifies your mistakes so you can remove them to master the MB-330 exam questions of ExamDumpsVCE give you a comprehensive understanding of MB-330 Real Exam format. Self-

evaluation by taking practice exams makes your Microsoft MB-330 exam preparation flawless and strengthens enough to crack the test in one go.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q84-Q89):

NEW QUESTION # 84

A company is designing a new bicycle by using a dimension-based Bill of materials (BOM).

The configuration groups have been defined and created.

You need to set up a BOM for the new bicycle.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Create dimension-based configurations.
- Define configuration routes.
- Define configuration rules.
- Create a BOM for the dimension-based product master.
- Create and release a predefined variant product master.
- Create and release a dimension-based product master.

Answer Area

Answer:

Explanation:

Actions

- Create dimension-based configurations.
- Define configuration routes.
- Define configuration rules.
- Create a BOM for the dimension-based product master.
- Create and release a predefined variant product master.
- Create and release a dimension-based product master.

Answer Area

- Create a BOM for the dimension-based product master.
- Define configuration routes.
- Define configuration rules.
- Create dimension-based configurations.

Explanation

Create a BOM for the dimension-based product master.

Define configuration routes.

Define configuration rules.

Create dimension-based configurations.

NEW QUESTION # 87

You need to configure the products in Dynamics 365 Supply Chain Management for the requirements.

Which system objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	System object
Configure the clothing items for the different sizes and colors.	<input type="checkbox"/> Packing dimension <input type="checkbox"/> Storage dimension <input type="checkbox"/> Tracking dimension <input type="checkbox"/> Product dimension
Configure the dimension for the sizes and colors.	<input type="checkbox"/> Product <input type="checkbox"/> Product master <input type="checkbox"/> Product variant <input type="checkbox"/> Released products
Configure the items for the health and safety review process.	<input type="checkbox"/> Packing dimension <input type="checkbox"/> Storage dimension <input type="checkbox"/> Tracking dimension <input type="checkbox"/> Product dimension

Answer:

Explanation:

Requirement

Configure the clothing items for the different sizes and colors.

System object

Packing dimension
Storage dimension
Tracking dimension
Product dimension

Configure the dimension for the sizes and colors.

Product
Product master
Product variant
Released products

Configure the items for the health and safety review process.

Packing dimension
Storage dimension
Tracking dimension
Product dimension

Explanation

Box 1: Product dimension

There are five product dimensions: color, configuration, size, style, and version.

Box 2: Product variant

Product variants are also referred to as items. An item is a tangible product, which isn't the same as a service.

A product variant can be generated based on the product dimension values.

Example

A company sells denim jeans. The item, Jeans, uses the color and size product dimensions. The jeans are sold in three different colors and six different sizes. The colors are blue, black, and brown. The sizes are XS, S, M, L, XL, and XXL. Not all sizes are available in all three colors. If all combinations were available, there would be 18 different types of jeans. However, in this example, only the following nine product variant combinations are produced.

Table Description automatically generated

Color	Microsoft	Size
Blue		XS
Blue		S
Blue		M
Black		M
Black		L
Black		XL
Brown		L
Brown		XL
Brown		XXL

Box 3: Tracking dimension

Scenario: If products in the warehouse must be blocked from transactions for a specific reason, such as a health and safety review, warehouse users should be able to block the products quickly from the ERP system.

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/pim/product-dimensions>

NEW QUESTION # 88

A company uses Dynamics 365 Supply Chain Management in one legal entity that contains one site, which contains Warehouse1 and Warehouse2. A customer routinely orders an item that the company usually stocks in Warehouse1.

The customer requires the company to ship orders from Warehouse2 due to shipping cost agreements.

You need to configure the system to meet the request.

Which configuration should you set up?

- A. Set the customer default to Warehouse2 and the item default order settings to Warehouse1.
- B. Set the customer default to Warehouse1 and set the item default order settings to Warehouse2.
- C. Set the customer default to Warehouse1 and set the item default order settings to Warehouse1.
- **D. Set the customer default to Warehouse2 only.**
- E. Set the item default order settings to Warehouse1 only.

Answer: D

Explanation:

Explanation

Default order settings in Dynamics 365 Supply Chain Management define the site and warehouse where items will be sourced from or stored, the minimum, maximum, multiple and standard quantities that will be used for trading or inventory management, the lead times, the stop flag, and the order promising method. Default order settings are used when creating purchase orders, sales orders, transfer orders, inventory journals, and by master planning for generating planned orders. Default order settings can be item specific, site specific, product variant specific, or product dimension specific.
