The clients at home and abroad can both purchase our 350-401 study tool online. Our brand enjoys world-wide fame and influences so many clients at home and abroad choose to buy our Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) guide dump. Our company provides convenient service to the clients all around the world so that the clients all around the world can use our 350-401 study materials efficiently. Our company boosts an entire sale system which provides the links to the clients all around the world so that the clients can receive our products timely. Once the clients order our 350-401 cram training materials we will send the products quickly by mails. The clients abroad only need to fill in correct mails and then they get our products conveniently. Our 350-401 cram training materials provide the version with the language domestically and the version with the foreign countries' language so that the clients at home and abroad can use our 350-401 study tool conveniently.

The Cisco 350-401 exam covers a broad range of topics, including network architecture, automation, security, routing, switching, and wireless technologies. It tests the ability of IT professionals to design, implement, and troubleshoot complex enterprise network solutions in a variety of scenarios. 350-401 exam also evaluates their proficiency in using industry-standard protocols and technologies to optimize network performance and ensure network security.

Opportunities for Managing Industrial Networks with Cisco 350-401 Certification Covers All Key Points.

1. You can get access to 350-401 Exam questions and answers in the reliable Demo Version of **Cisco 350-401 exam dumps**. But VCE files are unavailable. Courses are updated regularly to make sure that it covers the latest information.
2. Try the free 350-401 Test Software to see how it works.
3. If you can pass the free 350-401 Demo test, you are ready to go with a live product.
4. If you fail the 350-401 free Demo test, the Cisco 350-401 Exam product is refundable.
5. If you are not ready to take the test after using the free 350-401 Demo Test, you can get a full refund of your money.

6. If you are not satisfied with 350-401 Test Software quality, you can still get a 100% money-back guarantee.
7. IT Certification real and actual questions are sometimes different from the ones in the free 350-401 Demo test. Customers are invited to try the free sample questions before they purchase the Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam product. CCAR-400 Exam Questions is an example of the Managing Industrial Networks with Cisco Networking Technologies (IMINS) 350-401 product.

Cisco 350-401, also known as Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR), is a certification exam that tests candidates' knowledge of enterprise networking technologies. 350-401 exam is designed to validate a candidate's skills in implementing and troubleshooting core enterprise network technologies. Passing 350-401 exam will help candidates to earn the Cisco Certified Network Professional (CCNP) Enterprise certification.

Try Approved Cisco 350-401 Exam Questions To Pass 350-401 Exam

It-Tests has made the Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) exam dumps after consulting with professionals and getting positive feedback from customers. The team of It-Tests has worked hard in making this product a successful Cisco 350-401 Study Material. So we guarantee that you will not face issues anymore in passing the Cisco 350-401 certification test with good grades.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q65-Q70):

NEW QUESTION # 65

```
R1
router bgp 1000
address-family ipv4 unicast
neighbor 209.165.201.2 remote-as 2000
network 10.0.0.0 mask 255.255.255.0
description Peer Router B

R2
router bgp 2000
address-family ipv4 unicast
neighbor 209.165.201.1 remote-as 1000
network 10.0.0.0 mask 255.255.255.0
description Peer Router A
```

Refer to the exhibit. Which two commands are needed to allow for full reachability between AS 1000 and AS 2000? (Choose two)

- A. R1#no network 10.0.0.0 255.255.255.0
- B. R2#network 209.165.201.0 mask 255.255.192.0

- C. R1#network 192.168.0.0 mask 255.255.0.0
- D. R2#no network 10.0.0.0 255.255.255.0
- E. R2#network 192.168.0.0 mask 255.255.0.0

Answer: B,C

Explanation:

For full reachability between AS 1000 and AS 2000, R1 needs to advertise network 192.168.0.0 (option A) and R2 needs to advertise network 209.165.201.0 (option D). These commands ensure that both Autonomous Systems are aware of each other's networks, enabling full reachability between them as per the BGP routing protocol's operation. NEW QUESTION # 66

Refer to the exhibit.

```
>>> netconf_data["GigabitEthernet"][0]["enabled"]
u'false'
>>> netconf_data["GigabitEthernet"][1]["enabled"]
u'true'
>>> netconf_data["GigabitEthernet"][2]["enabled"]
u'false'
>>> netconf_data["GigabitEthernet"][0]["description"]
u'my description'
```

Which Python code snippet prints the descriptions of disabled interfaces only?

A)

```
for interface in netconf_data["GigabitEthernet"]:
    if interface["disabled"] != 'true':
        print(interface["description"])
```

B)

```
for interface in netconf_data["GigabitEthernet"]:
    print(interface["enabled"])
    print(interface["description"])
```

C)

```
for interface in netconf_data["GigabitEthernet"]:
    if interface["enabled"] != 'false':
        print(interface["description"])
```

D)

```
for interface in netconf_data["GigabitEthernet"]:
    if interface["enabled"] != 'true':
        print(interface["description"])
```

- A. Option C
- B. Option B
- C. Option A
- D. Option D

Answer: D

NEW QUESTION # 67

Which function does a fabric edge node perform in an SD-Access deployment?

- A. Connects endpoints to the fabric and forwards their traffic
- B. Provides reachability border nodes in the fabric underlay
- C. Encapsulates end-user data traffic into LISP.

- D. Connects the SD-Access fabric to another fabric or external Layer 3 networks

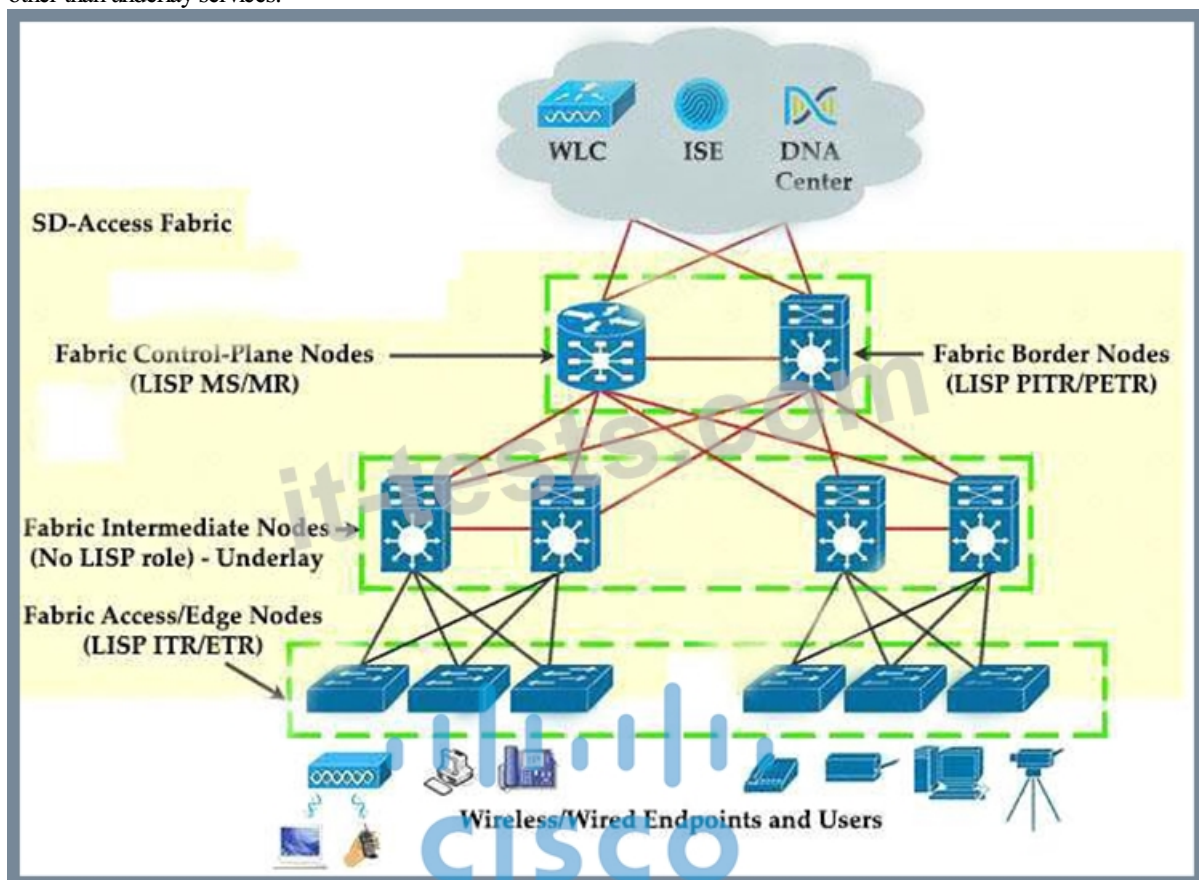

Answer: A

Explanation:

Explanation

There are five basic device roles in the fabric overlay:

- + Control plane node: This node contains the settings, protocols, and mapping tables to provide the endpoint-to-location (EID-to-RLOC) mapping system for the fabric overlay.
- + Fabric border node: This fabric device (for example, core layer device) connects external Layer 3 networks to the SDA fabric.
- + Fabric edge node: This fabric device (for example, access or distribution layer device) connects wired endpoints to the SDA fabric.
- + Fabric WLAN controller (WLC): This fabric device connects APs and wireless endpoints to the SDA fabric.
- + Intermediate nodes: These are intermediate routers or extended switches that do not provide any sort of SD-Access fabric role other than underlay services.

NEW QUESTION # 68

Which tunnel type allows clients to perform a seamless Layer 3 roam between a Cisco AireOS WLC and a Cisco IOS XE WLC?

- A. IPsec
- B. Ethernet over IP
- C. VPN
- **D. Mobility**

Answer: D

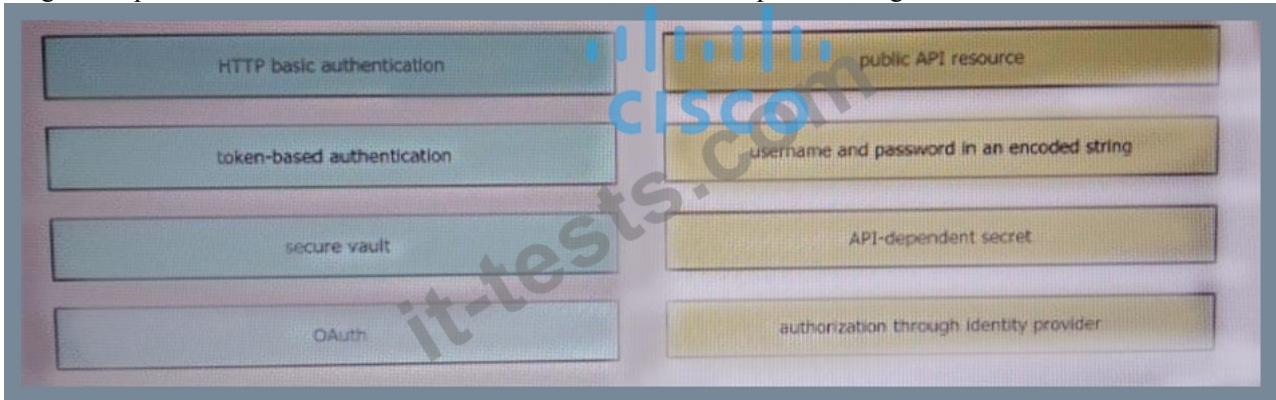

Explanation:

The Mobility tunnel type allows for seamless Layer 3 roaming between different wireless LAN controllers, such as Cisco AireOS WLC and Cisco IOS XE WLC. This tunnel type enables clients to maintain their IP address and session continuity while moving across different access points managed by these controllers.
