Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which of the following is accurate regarding the Einstein Vision model?

- A. The model needs to be created as part of the development process using a base set of images
- B. The model is created via crowdsourcing of images available via public copyright licenses
- C. The model is created automatically by Einstein based on uploading the perfect image
- D. The model is created in store as reps perform their daily tasks during phase 1 rollout

Answer: A

Explanation:

The Einstein Vision model is a representation of how objects are detected and counted in an image. The model needs to be created as part of the development process using a base set of images. The base set of images should contain images of the products that need to be detected on the shelf, as well as labels and annotations for each product. The model is then trained and tested using these images and can be improved by adding more images or adjusting the parameters. NEW QUESTION # 69

How can an Account Manager visualize store visits in their territory for the day by their current status?

- A. By creating a map layer using visits as the base object and color code the markers by status
- B. By creating a Map Layer using retail store search filters by status and color code the markers by status
- C. By creating a map layer using accounts as a base object and color code the markers by status
- D. By creating a map layer using retail store as the base object and represent the markers by shape

Answer: A

Explanation:

To visualize store visits in their territory for the day by their current status, an Account Manager can create a map layer using visits as the base object and color code the markers by status. A map layer is a visual representation of data on a map that can be filtered and customized. A visit is an object that represents a scheduled or unscheduled interaction between a field rep and a retail store. The status of a visit indicates whether it is planned, in progress, completed, or canceled. Verified References: [Salesforce Consumer Goods Cloud Implementation Guide], page 34.

NEW QUESTION # 70

How can a Field Sales Manager access a photo taken by a Field Rep of a defective In-store asset

- A. The photo is sent directly to the manager's email
- B. The photo is linked to the asset check task
- C. The photo is linked to the visit record
- D. The photos Inked to the asset record

Answer: D

Explanation:

Field Sales Managers can access photos taken by Field Reps of defective in-store assets through the asset record to which the photos are linked. This provides a direct association between the asset and its condition.
