Oracle GoldenGate 19c Implementation Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

User exits can be used for tables processed by a data pump Extract in passthru mode.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

User exits don't work in passthru mode (no transformation).

NEW QUESTION # 26

What detailed information does the Network Statistics tab of the Receiver Server provide for the Data Path configured?

- A. The IP Address of the sender and the Distribution Path
- **B. The host of the sender and the Distribution Path**
- C. The transfer network protocol
- D. The total write time

Answer: B

Explanation:

The Network Statistics tab in the Receiver Server UI displays details about the host of the sender and the configured Distribution Path, which helps in monitoring and troubleshooting replication data flow paths in Oracle GoldenGate Microservices.

NEW QUESTION # 27

Which of these can you not do from the main page of the MA Administration Server web page?

- **A. Fix the situation of what caused the Extract or Replicat to be down from the Critical Event box.**
- B. See the lag time of currently configured Extracts and Replicats.
- C. Create an Extract or Replicat.
- D. Restart configured Extracts and Replicats.

Answer: A

Explanation:

From the main page of the Oracle GoldenGate 19c Microservices Architecture (MA) Administration Server web interface, you can do the following: ? Restart configured Extracts and Replicats ? Create Extract or Replicat processes ? View lag time and status of running processes ? But you cannot directly "fix" the underlying issue causing an Extract or Replicat to fail from the Critical Event box. You may be alerted to the issue there, but resolving it typically requires additional diagnosis or configuration changes via other tools or pages.

NEW QUESTION # 28

DDL can be used in conjunction with filter options. What would be the correct DDL parameter if you need DDL for specific objects?

- **A. DDL Exclude All, Include ObjName <objectname>**
- B. DDL Include All, Exclude ObjName <objectname>
- C. DDL Include. <objectname>
- D. DDL <objectname>

Answer: A

Explanation:

This configuration first excludes all DDL operations (EXCLUDE ALL) and then selectively includes DDL for specific objects using INCLUDE OBJNAME. This approach ensures that only the desired DDL operations are replicated, providing precise control over DDL replication.

NEW QUESTION # 29

You have configured and added the Extract and Replicat tasks by using the Direct Load method. What do you need to do to get the processes up and running?

- A. Start the Extract task
- **B. Start the Extract task, wait for it to stop, and then start the Replicat task**
- C. Start the Replicat task
- D. Start the Extract task and then start the Replicat task

Answer: B

Explanation:

In the Direct Load method, the Extract performs a one-time data load and then stops. Only after that should the Replicat be started to apply the loaded data. Starting both simultaneously is not valid for this method.

NEW QUESTION # 30

.....

Perhaps your ability cannot meet the requirement of a high salary job. So you cannot get the job because of lack of ability. You must really want to improve yourself. Now, our 1Z1-947 exam questions can help you realize your dreams.
