Practice AZ-305 Exam, AZ-305 Reliable Exam Cram

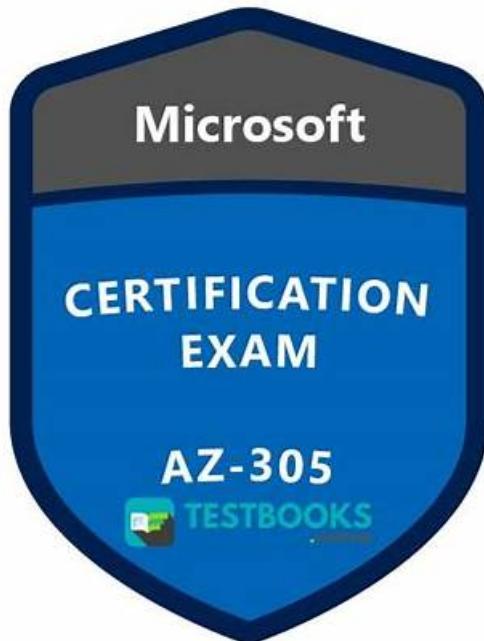

What's more, part of that Prep4cram AZ-305 dumps now are free: https://drive.google.com/open?id=1KOTa7q4e2qbVJWij03PJPXN91VSeLyJJ

It is universally accepted that the exam is a tough nut to crack for the majority of candidates, but the related AZ-305 certification is of great significance for workers in this field so that many workers have to meet the challenge. Fortunately, you need not to worry about this sort of question any more, since you can find the best solution in this website--our AZ-305 Training Materials. With our continued investment in technology, people and facilities, the future of our company has never looked so bright. There are so many advantages of our AZ-305 practice test and I would like to give you a brief introduction now.

Achieving the Microsoft AZ-305 certification demonstrates that a professional has the skills and knowledge required to design Azure solutions that meet business needs. Designing Microsoft Azure Infrastructure Solutions certification is recognized worldwide and is highly valued by employers. It can lead to better job opportunities, higher salaries, and more challenging projects.

Microsoft AZ-305 Exam Syllabus Topics:

Topic	Details
Design Identity, Governance, and Monitoring Solutions (25-30%)	

Design a solution for logging and monitoring	- design a log routing solution - recommend an appropriate level of logging - recommend monitoring tools for a solution
Design authentication and authorization solutions	- recommend a solution for securing resources with role-based access control - recommend an identity management solution - recommend a solution for securing identities
Design governance	- recommend an organizational and hierarchical structure for Azure resources - recommend a solution for enforcing and auditing compliance
Design identities and access for applications	- recommend solutions to allow applications to access Azure resources - recommend a solution that securely stores passwords and secrets - recommend a solution for integrating applications into Azure Active Directory (Azure AD) - recommend a user consent solution for applications

Design Data Storage Solutions (25-30%)

Design a data storage solution for relational data	- recommend database service tier sizing - recommend a solution for database scalability - recommend a solution for encrypting data at rest, data in transmission, and data in use
Design data integration	- recommend a solution for data integration - recommend a solution for data analysis
Recommend a data storage solution	- recommend a solution for storing relational data - recommend a solution for storing semi-structured data - recommend a solution for storing non-relational data
Design a data storage solution for non-relational data	- recommend access control solutions to data storage - recommend a data storage solution to balance features, performance, and cost - design a data solution for protection and durability

Microsoft AZ-305: Designing Microsoft Azure Infrastructure Solutions is a certification exam that is designed for IT professionals who want to validate their skills in designing and implementing solutions on Microsoft Azure. AZ-305 Exam is a part of the Microsoft Certified: Azure Solutions Architect Expert certification and assesses the knowledge and expertise of the candidate in designing and implementing solutions that are secure, scalable, and highly available.

AZ-305 Reliable Exam Cram | New AZ-305 Exam Answers

Our website Prep4cram provide the AZ-305 test guide to clients and help they pass the test AZ-305 certification which is highly authorized and valuable. Our company is a famous company which bears the world-wide influences and our AZ-305 test prep is recognized as the most representative and advanced study materials among the same kinds of products. Whether the qualities and functions or the service of our AZ-305 Exam Questions, are leading and we boost the most professional expert team domestically.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q44-Q49):

NEW QUESTION # 44
You have the Azure resources shown in the following table.
You need to design a solution that provides on-premises network connectivity to SQLDB1 through PE1. How should you configure name resolution? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

NEW QUESTION # 45

You have an Azure subscription. The subscription has a blob container that contains multiple blobs. Ten users in the finance department of your company plan to access the blobs during the month of April. You need to recommend a solution to enable access to the blobs during the month of April only. Which security solution should you include in the recommendation?

- A. access keys
- B. certificates
- C. conditional access policies
- D. shared access signatures (SAS)

Answer: D

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/storage/common/storage-sas-overview This allows for limited-time fine grained access control to resources. So you can generate URL, specify duration (for month of April) and disseminate URL to 10 team members. On May 1, the SAS token is automatically invalidated, denying team members continued access.

NEW QUESTION # 46

You plan to deploy a custom database solution that will have multiple instances as shown in the following table.
Client applications will access database servers by using db.contoso.com.
You need to recommend load balancing services for the planned deployment. The solution must meet the following requirements:
* Access to at least one database server must be maintained in the event of a regional outage.
* The virtual machines must not connect to the internet directly.
What should you include in the recommendation? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation
Graphical user interface, text, application Description automatically generated
Box 1: Azure Traffic Manager
Traffic Manager is a DNS-based traffic load balancer that enables you to distribute traffic optimally to services across global Azure regions, while providing high availability and responsiveness. Because Traffic Manager is a DNS-based load-balancing service, it load balances only at the domain level. For that reason, it can't fail over as quickly as Front Door, because of common challenges around DNS caching and systems not honoring DNS TTLs.

NEW QUESTION # 47

You plan to deploy a network-intensive application to several Azure virtual machines.
You need to recommend a solution that meets the following requirements:
Minimizes the use of the virtual machine processors to transfer data
Minimizes network latency
Which virtual machine size and feature should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
References:
https://docs.microsoft.com/en-us/azure/virtual-machines/windows/sizes-hpc#h-series

NEW QUESTION # 48

You have an Azure subscription that contains an Azure SQL database.
You are evaluating whether to use Azure reservations on the Azure SQL database.
Which tool should you use to estimate the potential savings?

- A. The SQL database blade in the Azure portal
- B. The Purchase reservations blade in the Azure portal
- C. The Advisor blade in the Azure portal

Answer: B

Explanation:
Buy reserved capacity
* Sign in to the Azure portal.
* Select All services > Reservations.
* Select Add and then in the Purchase Reservations pane, select SQL Database to purchase a new reservation for SQL Database.
* Fill in the required fields. Existing databases in SQL Database and SQL Managed Instance that match the attributes you select qualify to get the reserved capacity discount. The actual number of databases or managed instances that get the discount depends on the scope and quantity selected.
* Review the cost of the capacity reservation in the Costs section.
* Select Purchase.
* Select View this Reservation to see the status of your purchase.
