

# NSE6\_FSR-7.3 Official Practice Test & NSE6\_FSR-7.3 Test King

**FULL GED PRACTICE TEST QUESTIONS WITH COMPLETE SOLUTIONS**

. If heat is added to a liquid which of the following occurs?  
 A. The viscosity of liquid increases  
 B. The size of liquid molecules expand  
 C. The molecular motion in the liquid increases  
 D. The state of liquid changes to solid  
 E. Heat has no effect on liquids Correct Answers C

1. Find a positive number which when increased by 11 is equal to 60 times the reciprocal of the number?  
 A. 15  
 B. 4  
 C. 11  
 D. 7 Correct Answers B

A circle is inscribed in a square of area 4. What will be the area of the circle?  
 A.  $2\pi$   
 B.  $\pi$   
 C.  $16\pi$   
 D.  $\pi/2$  Correct Answers B

A ladder of a certain fixed length leans against a wall forming a  $60^\circ$  angle between the ground and the ladder. If the bottom of the ladder is 10 feet away from the wall, how long is the ladder?

## Why the Fortinet NSE6\_FSR-7.3 Certification Matters

Under the help of our NSE6\_FSR-7.3 exam questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future. As we all know, to make something right, the most important thing is that you have to find the right tool. Our NSE6\_FSR-7.3 study quiz is the exact study tool to help you pass the NSE6\_FSR-7.3 exam by your first attempt.

## Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q38-Q43):

### NEW QUESTION # 38

Several users have informed you that the FortiSOAR GUI Is not reachable. When troubleshooting, which step should you take first?

- A. Enter the `csadm license --show-details` command to check if there is a duplicate license.
- **B. Enter the `systemctl status nginx` command to gather more information.**
- C. Review the `connectors.log` file to see what is happening to the HTTPS connections.
- D. Enter the `csadm services --restart nginx` command to restart only the Nginx process.

**Answer: B**

Explanation:

When troubleshooting the issue of the FortiSOAR GUI not being reachable, the first step should be to check the status of the `nginx` service, which is responsible for managing web requests. Using the command `systemctl status nginx` will provide information on whether the service is running and any potential issues or errors related to it. This approach is more efficient as it directly addresses the service responsible for the web interface, making it possible to diagnose and resolve common issues such as service failure, configuration errors, or connectivity problems.

### NEW QUESTION # 39

An administrator wants to collect and review all FortiSOAR log files to troubleshoot an issue. Which two methods can they use to accomplish this? (Choose two.)

- A. Review the contents of `/var/log/messages`.
- B. Enter the `csacta services -status` command, and then copy the output.
- **C. Download the logs from the GUI.**
- **D. Enter the `caacta log -collect` directory command.**

**Answer: C,D**

Explanation:

Administrators can collect and review FortiSOAR logs for troubleshooting in two primary ways. First, they can download logs directly from the GUI, which provides access to various logs through an intuitive interface. Secondly, using the command-line interface, the `csacta log --collect` command can be used to gather all logs within a specified directory, enabling more detailed offline analysis. Both methods offer comprehensive log collection to aid in diagnosing and resolving issues.

**NEW QUESTION # 40**

Which edition of license, when deployed, will serve as a primary node in a distributed deployment?

- A. MT\_Tenant
- B. Enterprise
- **C. MT**
- D. MT\_RegionalSOC

**Answer: C**

**NEW QUESTION # 41**

Which two statements about appliance users are true? (Choose two.)

- **A. Appliance users represent non-human users.**
- B. Appliance users use two-factor authentication for messages sent to the API.
- C. Appliance users use time-expiring tokens for primary authentication.
- **D. Appliance users do not have a login ID and do not add to the license count.**

**Answer: A,D**

Explanation:

In FortiSOAR, appliance users are accounts that represent non-human entities, such as system processes or integrations. These users do not require login IDs and therefore do not contribute to the licensing user count. Appliance users are configured for backend tasks or to interact with external systems, enabling automated processes without consuming standard user licenses. This approach optimizes system resources and keeps licensing costs manageable.

**NEW QUESTION # 42**

Refer to the exhibit.

Node Name	Status	Role	License Details
primary.internal.lab	Faulted	Secondary	Serial Number: FSRVPTM20000484 Total Users: 2 Device UUID: 520e3f3badcd9647b829c8905fec465b
secondary.internal.lab	Active	Primary	Serial Number: FSRVPTM21000105 Total Users: 2 Device UUID: 929ee24c7eabd15e684c996bd04ea968

The former primary node was relegated to the secondary role but is stuck in the Faulted state.

Which two steps must you take to restore operation in the high availability (HA) cluster? (Choose two.)

- **A. Enter the `csadm ha join-cluster` command to have the node that is in the Faulted state rejoin the HA cluster as a secondary node.**
- **B. On the node that is in the Faulted state, enter the `csadm ha leave-cluster` command.**
- C. Restart the node that is in the Faulted state to trigger another election.
- D. Perform a fire drill to test the database integrity of the node that is in the Faulted state.

**Answer: A,B**

Explanation:

In a FortiSOAR HA cluster, if the former primary node is relegated to a secondary role but is stuck in a Faulted state, it indicates that the node has lost sync or faced a failure during a role change. To restore its functionality, first, you should remove it from the cluster using the `csadm ha leave-cluster` command. Once it has left the cluster, you can use the `csadm ha join-cluster` command to re-add the node as a secondary node. This process will allow it to sync back up with the cluster and resume its role as intended.

**NEW QUESTION # 43**

.....

If you are preparing for the NSE6\_FSR-7.3 Questions and answers, and like to practice it in your spare time, then you should

consider the NSE6\_FSR-7.3 exam dumps of our company. NSE6\_FSR-7.3 Online test engine is convenient and easy to study, it supports all web browsers. Besides you can practice online anytime. With all the benefits like this, you can choose us bravely. With this version, you can pass the exam easily, and you don't need to spend the specific time for practicing, just your free time is ok.
