We know deeply that a reliable C-ACDET-2506 exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. Compared with the other products in the market, our C-ACDET-2506 latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite study training dumps guarantee our candidates to pass the test easily. Passing exam won't be a problem anymore as long as you are familiar with our C-ACDET-2506 Exam Material (only about 20 to 30 hours practice). High accuracy and high quality are the reasons why you should choose us.

## SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>

Latest C-ACDET-2506 Cram Materials & C-ACDET-2506 Test Dumps Pdf

As a busy working person it will cost a lot of time and energy to prepare for upcoming test, what's to be done? You can try our latest SAP C-ACDET-2506 practice exam online materials. You can know more about exam information and master all valid exam key knowledge points. C-ACDET-2506 Practice Exam Online is excellent product of all examination questions with high passing rate. It will improve your studying efficiency and low exam cost.

## **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q25-Q30):**

### **NEW QUESTION # 25**

Which of the following applies to Suite Integration?

- A. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.
- B. Suite Integration represents the out-of-the-box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud.
- **C. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated.**
- D. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution.

### **Answer: C**

Explanation:

Suite Integration in SAP Ariba refers to the native, out-of-the-box integration among SAP Ariba Strategic Sourcing Suite components such as sourcing, contracts, and supplier lifecycle. This integration ensures seamless workflows, shared master data (suppliers, users, commodity codes), and a unified user experience without manual intervention. It is a key benefit differentiating SAP Ariba from fragmented solutions. Manual third-party integrations or ERP integrations like S/4HANA are separate and not referred to as Suite Integration.

### **NEW QUESTION # 26**

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Enablement Workbook
- B. Solution Design Matrix
- C. Deployment Overview
- **D. Delivery Engagement Readiness Checklist**

### **Answer: D**

Explanation:

The Delivery Engagement Readiness Checklist is a critical gatekeeper document that confirms all prerequisites and readiness criteria have been met before SAP assigns a Deployment Lead to a project. This checklist ensures project scope, resourcing, access, and other foundational elements are in place to proceed.

Other documents like Deployment Overview and Enablement Workbook are informative or internal project management tools but do not formally trigger Deployment Lead assignment. The Solution Design Matrix is a design artifact and not a staffing gating document.

This process supports structured project governance and resource allocation within SAP.

### **NEW QUESTION # 27**

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. Only the data of the flex master data templates is migrated; templates must be created manually.
- B. Both the templates and their data are fully migrated by the tool.
- C. Neither the templates nor the data is migrated using the tool
- **D. The templates are migrated by the tool, but the data must be loaded manually later.**

### **Answer: D**

### **NEW QUESTION # 28**

You are performing a Brownfield migration for a customer with live transactions in their SAP Ariba Production environment. The customer plans to introduce new required fields for contract workspaces that are associated with flex master data templates and enumeration lists. Based on the correct Brownfield process, what is the correct sequence of activities to avoid system errors or user disruption?

- A.
- B.
- C.
- D.

**Answer: B**

#### **NEW QUESTION # 29**

You need to revise a published form template. What steps do you follow?

- A. Clone and change ID
- B. **Create a new version, edit, test, and publish**
- C. Edit directly in production
- D. Delete and recreate

**Answer: B**

Explanation:

SAP Ariba requires that revisions to published form templates be handled through creating a new version of the template, then editing and testing the draft version before publishing it. The system maintains the prior published version active while you work on the new draft, ensuring no disruption. Cloning and changing IDs is unnecessary and not best practice. Direct edits on published templates are not permitted, and deleting and recreating loses version history and control. This versioning mechanism supports safe, auditable template changes.

#### **NEW QUESTION # 30**

.....

The SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) certification is a requirement if you want to succeed in the SAP industry quickly. But after deciding to take the C-ACDET-2506 exam, the next challenge you face is the inability to find genuine C-ACDET-2506 Questions for quick preparation.
