Valid ISO-IEC-27001-Foundation Test Pattern & Exam Dumps ISO-IEC-27001-Foundation Provider

TestPassed knows the importance of the APMG-International ISO-IEC-27001-Foundation certification exam in the field of information technology. That is why it has prepared the remarkable APMG-International ISO-IEC-27001-Foundation exam questions to help the aspirants pass it on the first go. The desiring candidates for the APMG-International ISO-IEC-27001-Foundation certificate need help to find reliable ISO-IEC-27001-Foundation Exam Questions study material.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q23-Q28):

NEW QUESTION # 23

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?
* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process
* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Neither 1 or 2 is true
- B. Only 2 is true
- C. Both 1 and 2 are true
- D. Only 1 is true

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:
ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC
27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them. However, ISO/IEC 27002 does not provide a process for risk management-that is covered by ISO/IEC
27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).
Therefore, statement 1 is true, but statement 2 is false. Correct answer:A.

NEW QUESTION # 24
Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct an audit of a Certification Body
- B. Conduct an audit of an Accredited Training Organization
- C. Conduct an internal audit of the organization
- D. Conduct a surveillance audit of their own area of the organization

Answer: C

Explanation:
ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 25
Which of the following is required to be considered when selecting appropriate information security risk treatment options?

- A. Criteria for performing risk assessments
- B. Only risk controls in ISO/IEC 27002
- C. Only risk controls in Annex A of ISO/IEC 27001
- D. Criteria for accepting identified risks

Answer: D

Explanation:
Clause 6.1.3 (c) requires organizations to:
"compare the controls determined in 6.1.3 b) with those in Annex A and verify that no necessary control has been omitted; and prepare a Statement of Applicability." It also requires organizations to select risk treatment options considering "the organization's risk acceptance criteria." This shows that risk acceptance criteria are a fundamental factor when selecting risk treatment options.
Options C and D are incorrect because Annex A and ISO/IEC 27002 are reference sets, not the sole sources of controls - organizations can design their own. Criteria for performing risk assessments (B) are part of 6.1.2 (risk assessment process), not risk

treatment.
Thus, the correct requirement isA: Criteria for accepting identified risks.

NEW QUESTION # 26
Which statement describes Annex A of ISO/IEC 27001?

- A. Provides measures to determine risk treatment effectiveness
- B. Defines the criteria for accepting risks
- C. Provides a reference list of information security controls and their requirements
- D. Defines a mandatory list of controls that shall be implemented

Answer: C

Explanation:
Annex A of ISO/IEC 27001:2022 is titled:
"Reference control objectives and controls." It provides areference list of information security controls, structured into 4 themes: organizational, people, physical, and technological.
The standard explicitly states in Clause 6.1.3: "Organizations can design controls as required or identify them from any source. Annex A contains a list of possible information security controls." This means controls in Annex A are not mandatory (eliminating option C). Risk acceptance criteria (A) are defined in Clause 6.1.2, not Annex A. Annex A also does not provide measures for treatment effectiveness (D).
Thus, Annex A is best described as areference list of information security controls. Correct answer:B.

NEW QUESTION # 27
Identify the missing word(s) in the following sentence.
"Information security, cybersecurity and privacy protection - [?]" is the title of ISO/IEC 27005.

- A. Information security management systems - Requirements
- B. Guidance on managing information security risks
- C. Information security controls
- D. Guidelines for information security management systems auditing

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:
ISO/IEC 27005:2022 is titled:
"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).
Thus, the correct answer isC: Guidance on managing information security risks.

NEW QUESTION # 28
......

The desktop ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice test software is similar to the web-based ISO-IEC-27001-Foundation format as far as its features are concerned. But it works offline only on the Windows operating system. The offline ISO-IEC-27001-Foundation practice exam can be taken easily just by just installing the software on your Windows laptop or computer. All three ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) formats of TestPassed are according to the latest content of the APMG-International ISO-IEC-27001-Foundation examination.
