Based on high-quality products, our FCP\_FSA\_AD-5.0 guide torrent has high quality to guarantee your test pass rate, which can achieve 98% to 100%. FCP\_FSA\_AD-5.0 study tool is updated online by our experienced experts, and then sent to the user. So you don't need to pay extra attention on the updating of study materials. The data of our FCP\_FSA\_AD-5.0 exam torrent is forward-looking and can grasp hot topics to help users master the latest knowledge. If you fail the exam with FCP\_FSA\_AD-5.0 Guide Torrent, we promise to give you a full refund in the shortest possible time. Of course, if you are not reconciled and want to re-challenge yourself again, we will give you certain discount.

## Fortinet FCP\_FSA\_AD-5.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Results analysis: This section involves understanding common attack vectors, analyzing malware behavior, and interpreting scan job reports to assess threats and make informed security decisions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Scanning and rating components: This section focuses on FortiSandbox scanning mechanisms, including scanning components, managing guest virtual machines, and configuring scan options to properly analyze and rate suspicious files.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• Deployment and system settings: This domain covers understanding FortiSandbox deployment within different stages of the Cyber Kill Chain, along with configuring system settings, high availability (HA) clusters, and troubleshooting system-related issues.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Integration: This domain explains how to integrate FortiSandbox within the Fortinet Security Fabric and with third-party tools, as well as identifying ATP deployments and resolving integration-related issues.</li> </ul>

We even guarantee our customers that they will pass Fortinet FCP\_FSA\_AD-5.0 Exam easily with our provided study material and if they failed to do it despite all their efforts they can claim a full refund of their money (terms and conditions apply). The third format is the desktop software format which can be accessed after installing the software on your Windows computer or laptop. The FCP - FortiSandbox 5.0 Administrator has three formats so that the students don't face any serious problems and prepare themselves with fully focused minds.

## Fortinet FCP - FortiSandbox 5.0 Administrator Sample Questions (Q25-Q30):

### NEW QUESTION # 25

Which two products integrated with FortiSandbox work to protect against the lateral movement stage of the Cyber Kill Chain? (Choose two answers)

- A. FortiGate
- B. FortiMail
- C. FortiADC
- D. FortiDeceptor

**Answer: A,D**

Explanation:

From the Attack Methodologies lesson, the Study Guide explicitly states:

"During the lateral movement stage, the attacker is trying to compromise and infect other computers in the network. If these computers are protected with FortiClient, FortiClient can send any file that the computer downloads, to FortiSandbox for analysis."

"FortiDeceptor creates a network of decoys, to lure attackers and monitor their activities on the network. When attackers attack a decoy, an alert is generated. FortiDeceptor engages FortiSandBox to get a verdict on the suspected malware."

"If you deploy FortiGate as an ISFW firewall, FortiGate can analyze the traffic moving across subnets and send any files to FortiSandbox for analysis to prevent propagation." Both FortiDeceptor (Option B) and FortiGate (Option D) are specifically identified as protecting against the lateral movement stage through their FortiSandbox integration.

### NEW QUESTION # 26

Refer to the CLI configuration below.

```
set device-authorization -a
```

How will FortiSandbox authorize new FortiClient devices after this command? (Choose one answer)

- A. When a Fabric device is not authorized, FortiSandbox will authorize it automatically.
- B. When a new FortiClient registers, it inherits authorization status from the managing EMS or FortiGate.
- C. When a new FortiClient registers, FortiSandbox will authorize it automatically.
- D. When a new device other than FortiClient registers, FortiSandbox will authorize it automatically.

**Answer: C**

Explanation:

The Study Guide explains the default behavior first: "You must authorize FortiClient EMS on FortiSandbox. FortiSandbox automatically authorizes all FortiClient endpoints managed by an authorized FortiClient EMS." It then adds the key point for this

question: "To change the default FortiClient authorization behavior, use the command shown on this slide to authorize FortiClient endpoints using FortiSandbox CLI. By default, FortiClient inherits its authorization status from the managing EMS or FortiGate." Because the question specifically shows the CLI command set device-authorization -a, it is asking about the behavior after changing the default. The default inheritance model described in option A applies before the override. After this command, FortiSandbox is set to authorize FortiClient endpoints directly and automatically, which makes C the correct answer. Option B is incorrect because the command is specifically about FortiClient endpoints, not other devices in general. Option D is too broad and does not match the Study Guide's explanation, which is limited to FortiClient authorization behavior.

#### NEW QUESTION # 27

You are configuring an integration between FortiWeb and FortiSandbox. On FortiWeb, where must you define the settings to submit files to FortiSandbox? (Choose one answer)

- A. Web anti-defacement
- B. Attack signature
- C. File security
- D. Antivirus

**Answer: C**

Explanation:

From the FortiWeb Integration lesson, the Study Guide explicitly states:

"You can configure FortiSandbox file submission in a file security policy. Any files not detected by the FortiGuard antivirus engine will be uploaded to FortiSandbox."

"You can configure FortiWeb to send attachments to FortiSandbox for additional scans to detect advanced persistent threats or zero-day attacks." From the Lab Guide (Exercise 1 - FortiWeb Integration):

"Click Web Protection > Input Validation > File Security. In the File Security Policy section, click Create New. Configure Send Files to FortiSandbox: Enabled." This confirms that File Security (Option A) is the correct location on FortiWeb to configure FortiSandbox file submission settings.

#### NEW QUESTION # 28

A security analyst is reviewing a scan job report that indicates a true positive match. The job report displays that the malware attempts to replace vital system executables. Which type of malware is the analyst observing? (Choose one answer)

- A. Rootkit
- B. Trojan
- C. Dropper
- D. Exploit

**Answer: A**

#### NEW QUESTION # 29

There is a connectivity problem between FortiSandbox and the FortiGuard distribution servers. You observe that a firewall located between FortiSandbox and the internet allows traffic on ports TCP/4443, UDP/8888, and UDP/53. What is the cause of the issue? (Choose one answer)

- A. They must allow TCP 8890 out
- B. They must allow UDP 514 out
- C. They must allow UDP 443 out
- D. They must allow TCP 443 out

**Answer: D**

Explanation:

From the Deployment and System Settings lesson, the Study Guide states:

"The test-network command checks FortiGuard services as its last set of validation tests. These include the FortiGuard distribution network (FDN) accessibility, FDN contract expiration, web filtering service, and the community cloud service. All these FortiGuard services should be reachable and valid for FortiSandbox to be effective."

"The diagnose-debug fdn command provides details around FortiSandbox and the FortiGuard Distribution Network (FDN)
