This is due to the fact that our PDII Learning Materials are very user-friendly and express complex information in easy-to-understand language. We assure you that once you choose our PDII practice materials, your learning process is very easy.

Salesforce Platform Developer II Sample Questions (Q151-Q156):

NEW QUESTION # 151

A developer is debugging an Apex-based order creation process that has a requirement to have three savepoints, SP1, SP2, and SP3 (created in order), before the final execution of the process.

During the final execution process, the developer has a routine to roll back to SP1 for a given condition. Once the condition is fixed, the code then calls a roll back to SP3 to continue with final execution. However, when the roll, back to SP3 is called, a runtime error occurs.

Why does the developer receive a runtime error?

- A. The developer has too many DML statements between the savepoints.
- B. The developer used too many savepoints in one trigger session.
- C. SP3 became invalid when SP1 was rolled back.
- D. The developer should have called SP2 before calling SP3.

Answer: C

NEW QUESTION # 152

When developing a Visualforce page that will be used by a global organization that does business in many languages and many currencies, which feature should be used? Choose 3 answers

- A. Custom Labels
- B. Global Labels
- C. ConvertCurrency()
- D. Translation Workbench
- E. GetLocalCurrency()

Answer: A,C,D

NEW QUESTION # 153

A developer creates an application event that has triggered an infinite loop. What may have caused this problem?

- A. The event has multiple handlers registered in the project.
- B. The event handler calls a trigger.
- C. An event is fired 'ontouchend" and is unhandled.
- D. The event is fired from a custom renderer.

Answer: A

Explanation:

The infinite loop in the application event could be caused by multiple handlers registered in the project. If the event is fired and then handled in such a way that the handling leads to the event being fired again, this can create a loop. Care must be taken to ensure that the handling of the event does not re-trigger the same event unintentionally. References: Aura Components Developer Guide - Application Events

NEW QUESTION # 154

A company wants to create a dynamic survey that navigates users through a different series of questions based on their previous responses. What is the recommended solution to meet this requirement?

- A. Lightning Process Builder
- B. Custom Lightning application
- C. Dynamic Record Choice
- D. Visualforce and Apex

Answer: D

NEW QUESTION # 155

An environment has two Apex triggers: an after-update trigger on Account and an after-update trigger on Contact.

The Account after-update trigger fires whenever an Account's address is updated, and it updates every associated Contact with that address. The Contact after-update trigger fires on every edit, and it updates every Campaign Member record related to the Contact with the Contact's state.

Consider the following: A mass update of 200 Account records' addresses, where each Account has 50 Contacts. Each Contact has one Campaign Member. This means there are 10,000 Contact records across the Accounts and 10,000 Campaign Member records across the contacts.

What will happen when the mass update occurs?

- A. There will be no error, since each trigger fires within its own context and each trigger does not exceed the limit of the number of records processed by DML statements.
- B. The mass update will fail, since the two triggers fire in the same context, thus exceeding the number of records processed by DML statements.
- C. The mass update of Account address will succeed, but the Contact address updates will fail due to exceeding number of records processed by DML statements.

- D. There will be no error and all updates will succeed, since the limit on the number of records processed by DML statements was not exceeded.

Answer: A

NEW QUESTION # 156

.....

It may be a contradiction of the problem, we hope to be able to spend less time and energy to take into account the test PDII certification, but the qualification examination of the learning process is very wasted energy, so how to achieve the balance? The PDII Exam Prep can help you make it. With the high-effective PDII exam questions, we can claim that you can attend the exam and pass it after you focus on them for 20 to 30 hours.
