SAP C-BCBAI-2509試験参考書 & C-BCBAI-2509試験問題解説集

Xhs1991は、他の競合他社とは異なるWebサイトです。すべての受験者に貴重なC-BCBAI-2509試験問題を提供し、C-BCBAI-2509試験に合格するのが難しい人を支援することを目的としています。一部のWebサイトのよう質の悪いC-BCBAI-2509試験資料を提供しないだけでなく、一部のWebサイトと同じ高価格もありません。当社のウェブサイトからC-BCBAI-2509学習問題集を試してみたい場合、それはあなたのお金のための最も効果的な投資でなければなりません。

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C-BCBAI-2509 試験問題 (Q10-Q15):

質問 # 10

(Which URL should you use to find reliable information about existing and planned features of Joule quickly?)

- A. <https://community.sap.com/topics/joule>

- B. <https://learning.sap.com/learning-journeys/Joule>
- C. <https://roadmaps.sap.com/board?range=FIRST-LAST&q=Joule>
- D. <https://developers.sap.com/board?range=FIRST-LAST&q=Joule>

正解: C

解説:

Comprehensive and Detailed Explanation From Exact Extract: The correct URL to quickly find reliable information about existing and planned features of Joule is the SAP Road Map Explorer, as it is the official interactive tool designed for viewing current and future product features and innovations. This aligns with SAP's official resources for product roadmaps, which detail both existing capabilities and planned enhancements for tools like Joule, SAP's generative AI copilot.

Exact extracts supporting this:

From SAP Road Map Explorer description: "The SAP Road Map Explorer is an interactive tool that supports a customer's journey to SAP's future product portfolio and the Intelligent Enterprise." pages.community.sap.com From a specific Joule roadmap asset:

"Preview the road map for the Joule copilot and start planning how to leverage its upcoming enhancements to grow efficiency and engagement across your business." sap.com The URL in option C directly searches the roadmap board for Joule across all time ranges (FIRST-LAST), providing comprehensive details on features.

Other options are incorrect because:

Option A (developers.sap.com) is for developer resources, tutorials, and boards, not specifically for product roadmaps or planned features.

Option B (learning.sap.com) focuses on learning journeys and educational content, such as courses on using Joule, but not on feature roadmaps.

Option D (community.sap.com) is a discussion forum for user topics and experiences, which may not provide official, reliable roadmap information.

質問 # 11

You are asking Joule to create a new purchase requisition. Which interaction pattern does your request represent?

- A. Transactional
- B. Financial
- C. Commercial
- D. Informational

正解: A

解説:

Creating a new purchase requisition with Joule represents a transactional interaction pattern. As per SAP Business AI documentation, transactional interactions involve executing specific business processes, such as creating, updating, or managing records within SAP systems. Joule's ability to handle such tasks streamlines operations by automating workflows and reducing manual effort. Informational interactions focus on retrieving data, commercial and financial are not defined interaction patterns in SAP's framework, and the act of creating a requisition is distinctly transactional. This capability enhances efficiency in procurement processes, allowing users to focus on strategic tasks while Joule manages operational activities seamlessly.

質問 # 12

What types of agents does Joule integrate? Note: There are 2 correct answers to this question.

- A. Product-specific agents
- B. Content-based agents
- C. Code-based agents
- D. Retrieval-augmented agents

正解: A、D

解説:

Joule integrates product-specific agents and retrieval-augmented agents, as outlined in SAP Business AI documentation. Product-specific agents are tailored to specific SAP applications, such as SAP S/4HANA or SAP SuccessFactors, delivering specialized functionality. Retrieval-augmented agents combine generative AI with data retrieval capabilities, enhancing their ability to provide accurate, context-aware responses by accessing enterprise data. Content-based and code-based agents are not explicitly defined in SAP's Joule framework. These integrated agent types ensure Joule delivers targeted, intelligent support across SAP ecosystems,

boosting productivity and decision-making.

質問 # 13

Which of the following are included in SAP's Responsible AI framework? Note: There are 3 correct answers to this question.

- A. Transparency and accountability
- B. ESG reporting
- C. SAP Global Human Rights commitment
- D. Ethical governance

正解: A、C、D

解説:

SAP's Responsible AI framework includes the SAP Global Human Rights commitment, transparency and accountability, and ethical governance, as detailed in SAP documentation. The SAP Global Human Rights commitment ensures AI respects human rights, aligning with global standards. Transparency and accountability mandate clear documentation of AI processes and decision-making, fostering trust. Ethical governance establishes policies and oversight to ensure fairness, mitigate bias, and comply with regulations. ESG reporting, while part of SAP's sustainability efforts, is not a core component of the Responsible AI framework, and human-centered design is a principle but not explicitly listed. These elements ensure SAP's AI solutions are trustworthy and ethical.

質問 # 14

What enables SAP's Suite as a Service approach? Note: There are 3 correct answers to this question.

- A. Harmonized data
- B. Embedded AI
- C. Integrated applications
- D. Scalable intelligence

正解: A、B、C

解説:

SAP's Suite as a Service approach is enabled by integrated applications, harmonized data, and embedded AI, as outlined in SAP Business AI documentation. Integrated applications ensure seamless connectivity across SAP's suite, enabling unified workflows and consistent user experiences. Harmonized data provides a single, standardized data model across applications, ensuring data consistency and enabling AI-driven insights. Embedded AI integrates intelligent capabilities directly into SAP applications, enhancing automation, analytics, and decision-making. These components collectively deliver a cohesive, cloud-based service model that drives efficiency and innovation. Scalable intelligence, while important, is not explicitly listed as a core enabler of this approach, and coordinated automation is a benefit rather than a foundational element.
