

Free F5CAB4 Download - F5CAB4 Valid Mock Exam

Mock Exam

Read each question carefully and select the most appropriate answer.

Name

Description (Optional)

First Name

Last Name

Grade/Section *

Description (Optional)

Section I. General Knowledge

1. What is the primary purpose of a contract in business transactions? *

Description (Optional)

- a) To outline the terms of a partnership
- b) To establish legal obligations between parties
- c) To define employee responsibilities
- d) None of the above

2. Which of the following is a valid reason for terminating an employment contract? *

Description (Optional)

- a) Employee's personal health issues

Owing to our high-quality F5CAB4 real dump and high passing rate, our company has been developing faster and faster and gain good reputation in the world. Our education experts are adept at designing and researching exam questions and answers of F5CAB4 study materials. What's more, we can always get latest information resource. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to Pass F5CAB4 Exam and acquire the certification.

Once you have any questions about our F5CAB4 actual exam, you can contact our staff online or send us an email. We have a dedicated all-day online service to help you solve problems. Before purchasing, you may be confused about what kind of F5CAB4 Guide questions you need. You can consult our staff online. After the consultation, your doubts will be solved and you will choose the F5CAB4 learning materials that suit you.

>> **Free F5CAB4 Download** <<

100% Pass Quiz 2026 High Hit-Rate F5 Free F5CAB4 Download

Our F5CAB4 learning prep boosts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our F5CAB4 exam torrent before they purchase our product and can download our F5CAB4 study materials immediately after the client pay successfully. And if there is the update of our F5CAB4 learning guide the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed

that our F5CAB4 latest question is absolutely good choices for you.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q42-Q47):

NEW QUESTION # 42

A BIG-IP Administrator needs to update the list of configured NTP servers. In which area of the Configuration Utility should the BIG-IP Administrator perform this update?

- A. System > Services
- B. System > Platform
- C. System > Configuration
- D. System > Preferences

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: NTP (Network Time Protocol) is vital for management connectivity and HA state synchronization. Correct time is required for log timestamping and device trust group communication⁴⁶. To manage these settings, the administrator navigates to System > Configuration, where general system-level services like NTP and DNS are defined to ensure the Control Plane remains synchronized with the network environment.

NEW QUESTION # 43

A BIG-IP Administrator needs to restore a UCS file to an F5 device using the Configuration Utility. Which section of the Configuration Utility should the BIG-IP Administrator access to perform this task?

- A. System > Configuration
- B. Local Traffic > Policies
- C. System > Archives
- D. Local Traffic > Virtual Servers

Answer: C

Explanation:

Managing the state of a device often involves restoring configuration backups known as User Configuration Set (UCS) files. These archives contain the full system configuration, including licenses and SSL certificates. The Control Plane provides a dedicated management area for these files under System > Archives, where administrators can upload, create, and restore configuration snapshots.

NEW QUESTION # 44

A BIG-IP Administrator needs to restore an encrypted UCS archive from the command line using the TMSH utility. Which TMSH command should the BIG-IP Administrator use to accomplish this?

- A. load /sys config file <filepath>
- B. load /sys ucs <filepath> passphrase <password>
- C. load /sys ucs <filepath> no-license
- D. load /sys config file <filepath> passphrase <password>

Answer: B

Explanation:

Restoring system states from backups is a fundamental Control Plane administrative task². When a User Configuration Set (UCS) archive is created with encryption, it requires the correct passphrase to be decrypted and loaded during the restoration process.

* UCS Command Structure: The `tmsl load /sys ucs` command is the specific utility for restoring these comprehensive configuration archives.

* Encrypted Restores: If the archive was encrypted during creation, the passphrase argument must be appended to the command followed by the actual password used to encrypt the file.

* Comparison with Other Options:

* load /sys config file is used for loading text-based configuration files (like bigip.conf), not full UCS archives.

* The no-license flag is used when you want to restore a configuration without overwriting the existing license (common during RMA replacements), but it does not provide the mechanism for entering an encryption passphrase.

NEW QUESTION # 45

A node is a member of various pools and hosts different web applications. If a web application is unavailable, the BIG-IP appliance needs to mark the pool member down for that application pool. What should a BIG-IP Administrator deploy at the pool level to accomplish this?

- A. An HTTP monitor with custom send/receive strings
- B. A UDP monitor with a custom interval/timeout
- C. A combination of ICMP + TCP monitor
- D. A TCP monitor with a custom interval/timeout

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

To accurately report the current status of specific web applications hosted on the same server (node), the Control Plane must use a monitor that operates at the application layer.

* Application-Specific Monitoring: While a node (the IP address) might be up and responding to ICMP (ping) or TCP handshakes, a specific web service or path on that server could be failing.

* Custom Send Strings: An HTTP monitor allows the administrator to define a "Send String" to request a specific page or URI related to the application in that pool.

* Receive Strings: The "Receive String" identifies a unique value that the application must return to be considered "Available".

* Granular Status Reporting: By deploying these monitors at the pool level, the Control Plane can mark a pool member "Offline" for one application pool if the receive string is missing, while keeping it "Available" in another pool where the service is still healthy.

NEW QUESTION # 46

Users are unable to reach an application. The BIG-IP Administrator checks the Configuration Utility and observes that the Virtual Server has a red diamond in front of the status.

What is causing this issue? (Choose one answer)

- A. The Virtual Server is receiving HTTPS traffic over an HTTP virtual
- B. All pool members have been disabled
- C. The Virtual Server is disabled
- D. All pool members are down

Answer: C

Explanation:

In the BIG-IP Configuration Utility, status icons provide immediate health information. A red diamond specifically indicates that the object itself is administratively disabled. When a virtual server is disabled, BIG-IP will not accept or process traffic for that virtual server, regardless of pool or node state.

* If all pool members were down, the virtual server would typically show a yellow triangle (available but no resources).

* If all pool members were disabled, the virtual server would usually still be enabled but unavailable due to pool status, not shown as a red diamond.

* Protocol mismatch (HTTPS sent to HTTP) does not change the administrative status icon of the virtual server.

Therefore, the red diamond clearly indicates the virtual server is disabled, making D the correct answer.

NEW QUESTION # 47

.....

Our company conducts our F5CAB4 real questions as high quality rather than unprincipled company which just cuts and pastes content into their materials and sells them to exam candidates. We have always been the vanguard of this field over ten years. It means we hold the position of supremacy of F5CAB4 practice materials by high quality and high accuracy. Besides, all exam
