## CHF M Exam 1

Two things DAP requires - answer 1. meeting children where they are  
2. enabling them to reach goals

When determining the appropriateness of an activity, teachers must consider three things. - answer 1. be appropriate to children's age and developmental status  
2. attuned to them as unique individuals  
3. responsive to the social and cultural contexts in which they live

What are educational researchers referring to when they talk about The Achievement Gap? - answer • Family income and education  
• Ethnicity  
• Language background  
• The exist between demographic groups

What variables are correlated with this gap? - answer

True or false: gaps early in life tend to go away. Explain your answer. - answer

What can early childhood programs do to improve the educational outcomes of at risk children? - answer

What can elementary grade teachers and preschool teachers learn from one another to improve education quality and outcomes substantially? - answer

Should programs provide child guided for teacher guided experiences, or should it be a balance of both. Explain your answer. - answer

True or false: Play the most important activity in a young child's day. Explain your answer. - answer True. Play promotes key abilities that enable children to learn successfully.

Describe an intentional teacher. - answer A variety of approaches and strategies to support children's interest and ability to each learning domain.

Briefly describe six of the 12 principles - answer

To let the clients have an understanding of their mastery degree of our CHF M study materials and get a well preparation for the test, we provide the test practice software to the clients. The test practice software of CHF M study materials is based on the real test questions and its interface is easy to use. The test practice software boosts the test scheme which stimulate the real test and boost multiple practice models, the historical records of the practice of CHF M Study Materials and the self-evaluation function.

The Medical Professional CHF M exam questions are being offered in three different formats. These formats are CHF M PDF dumps files, desktop practice test software, and web-based practice test software. All these three CHF M exam dumps formats contain the Real CHF M Exam Questions that assist you in your Certified Healthcare Facility Manager (CHF M) certification exam practice exam preparation and finally, you will be confident to pass the final Medical Professional CHF M exam easily.

## Achieve your goals with CHF M actual dumps & Medical Professional CHF M exam pdf

Our Medical Professional CHF M exam questions will correct your learning problems with the help of the test engine. All contents of

CHFMs are trained by elites in this area rather than being fudged by laymen. Let alone the reasonable prices which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our Medical Professional CHFMs Quiz guide.

## Medical Professional Certified Healthcare Facility Manager (CHFMs) certification exam Sample Questions (Q92-Q97):

### NEW QUESTION # 92

Which of the following are requirements of a medical equipment management plan?

problem, failure, or user error data collection  
a computerized equipment inventory  
performance standards  
an annual plan review

- A. 2, 3, and 4 only
- **B. 1, 3, and 4 only**
- C. 1, 2, and 3 only
- D. 1, 2, and 4 only

**Answer: B**

Explanation:

A medical equipment management plan must include:

Problem/failure/user error data collection for trending and corrective action.

Performance standards to ensure safe and reliable operation.

Annual review of the plan to maintain compliance and effectiveness.

A computerized inventory system is a useful tool but not mandated by The Joint Commission or CMS; paper-based systems may still be acceptable if compliant.

References: The Joint Commission, Comprehensive Accreditation Manual for Hospitals, EC.02.04.01; AHA /ASHE CHFMs Handbook - Administration domain.

### NEW QUESTION # 93

Which of the following items are allowed to remain in the corridor in an inpatient care area?

- A. laundry hampers
- B. recycle bins
- C. work stations on wheels (WOWs)
- **D. crash carts**

**Answer: D**

Explanation:

According to NFPA 101 Life Safety Code and CMS/TJC corridor obstruction guidance, only certain items deemed essential for immediate patient care may be left unattended in inpatient care corridors. Crash carts are specifically allowed because they are emergency life-saving equipment. Other items, such as hampers, WOWs, and bins, are considered obstructions and must be removed when not in active use.

References:

NFPA 101: Life Safety Code (2012, 2018 editions) - Corridor width and obstruction allowances.

The Joint Commission: Environment of Care Standards - Corridor equipment restrictions.

---

### NEW QUESTION # 94

Life Safety Code® requires which of the following in an on-call sleep room?

- A. emergency call button
- **B. smoke alarm**
- C. rated door
- D. bathroom

**Answer: B**

Explanation:

NFPA 101 (Life Safety Code) requires that on-call sleep rooms provided in healthcare facilities must be protected by single-station smoke alarms or an automatic smoke detection system. This requirement ensures early warning for occupants who may be sleeping and unable to respond as quickly in an emergency.

B: Rated doors may be required in certain hazardous areas but are not the mandated feature for on-call sleep rooms.

C: Emergency call buttons are part of patient care areas, not sleep rooms.

D: Bathrooms are not required by Life Safety Code in on-call rooms.

References: NFPA 101, Section 18/19.7.5.5.

#### **NEW QUESTION # 95**

Which of the following must be considered at the schematic design stage?

- A. general conditions
- B. lighting fixtures
- C. equipment specifications
- **D. egress requirements**

**Answer: D**

Explanation:

In the schematic design phase, the design team establishes overall building configuration, circulation, and code-driven life safety concepts, including means of egress. Life Safety Code requirements (occupant loads, exit access, number and arrangement of exits, travel distances) are fundamental constraints that shape the plan early; they must be set before moving into design development where specific fixtures and detailed equipment specifications are finalized. Contract "general conditions" are part of procurement/contract documents later, not schematic design.

#### **NEW QUESTION # 96**

A primary-secondary chilled water system typically has variable volume pumping on the

- A. open loop.
- B. cooling tower loop.
- C. primary loop.
- **D. secondary loop.**

**Answer: D**

Explanation:

In a primary-secondary chilled water system, the primary loop is constant volume, supplying chilled water from the chiller plant. The secondary loop uses variable volume pumping to match distribution system load demand efficiently.

A). Secondary loop (Correct): Where variable flow is applied.

B). Open loop: Not a recognized term in this context.

C). Primary loop: Constant flow design.

D). Cooling tower loop: Separate condenser water system, not chilled water distribution.
