### CSI Canadian Securities Course Exam2 Sample Questions (Q150-Q155):

#### NEW QUESTION # 150

A client who seeks advice from an investment advisor but does not require financial planning guidance. Which platform is most appropriate for this client?

- A. Self-directed brokerage.
- B. Family office
- **C. Discount brokerage.**
- D. Exchanged-traded fund.

**Answer: C**

Explanation:

A discount brokerage is an ideal platform for clients who seek professional advice but do not require comprehensive financial planning. Discount brokers allow clients to trade securities with minimal fees, offering tools and resources for investment decision-making without the cost of full-service advisory.

\* Why This Platform is Appropriate:

\* Clients retain control over their portfolios but can access limited advisory services when needed.

\* Suitable for investors who are comfortable with self-directed investing and require occasional guidance.

\* Why Other Options Are Incorrect:

\* A: A family office provides high-end services, including financial planning, making it excessive for this client.

\* B: A self-directed brokerage is entirely self-managed, without access to advisory support.

\* C: ETFs are an investment product, not a platform.

CSC Volume 2, Chapter 25: Overview of Fee-Based and Discount Brokerage Accounts.

#### NEW QUESTION # 151

What is one advantage of implementing indexing investing style?

- A. Offers opportunity to outperform the market at a low cost.
- B. Suitable for short-term investing.

- C. Simple for investors to understand.
- D. Provides preferential tax treatment to distributions in the form of derive-based income.

**Answer: C**

Explanation:

- \* Indexing is an investment strategy that tracks a benchmark index and is simple for investors to understand. This ease of understanding is one of its primary advantages.
- \* Option A: Indexing does not provide preferential tax treatment for derivative-based income.
- \* Option C: While low-cost, indexing does not offer an opportunity to outperform the market-it aims to match the market's performance.
- \* Option D: Indexing is typically suited for long-term investing due to its emphasis on broad market exposure and passive management.

Canadian Securities Course Volume 2, Portfolio Management Section.

#### NEW QUESTION # 152

Which funds have a similar objective to those of balanced funds?

- A. Target-date funds
- B. Asset allocation funds
- C. Fixed-income funds
- D. Dividend funds

**Answer: B**

#### NEW QUESTION # 153

Based on market capitalization, which sector of the SSP.'TSX Composite index has one of the highest weightings within the index?

- A. Health care
- B. Information technology
- C. Utilities
- D. Energy

**Answer: D**

Explanation:

TheEnergy sectoris one of the highest-weighted sectors in theS&P/TSX Composite Indexbased on market capitalization. This reflects Canada's resource-rich economy, where energy companies, including oil, gas, and related services, make up a significant portion of the market.

Other options:

- \* Health care: A relatively small portion of the index.
- \* Utilities: Have a smaller weight compared to energy.
- \* Information technology: While growing, it has not surpassed energy in weight within the Canadian market.

References:

- \* Volume 1, Chapter 8:Equity Securities, section on "Canadian Market Indexes" outlines the composition and sectoral weightings of the S&P/TSX Composite Index.

#### NEW QUESTION # 154

An investor wants to gain exposure to the Canadian stock market with minimal risk exposure. What is the test financial instrument for this investor?

- A. Index exchange-trace fund.
- B. Call option.
- C. Canadian bank preferred shares.
- D. Index-linked guaranteed investment certificate.

**Answer: D**

Explanation:

The investor's goal is to gain exposure to the Canadian stock market while maintaining minimal risk exposure. Among the provided options, an index-linked guaranteed investment certificate (GIC) is the most suitable choice.

Key Characteristics of an Index-Linked GIC:

\* Capital Protection:

\* Index-linked GICs guarantee the principal investment amount, offering the security of a GIC while tying returns to the performance of a stock index (e.g., the S&P/TSX Composite Index).

\* This ensures no loss of capital regardless of market performance.

\* Market Exposure:

\* The return on an index-linked GIC is linked to the performance of the underlying index, providing exposure to the stock market. However, this comes without the downside risk associated with direct stock or fund investments.

\* Low Risk:

\* The combination of principal protection and market exposure makes it ideal for risk-averse investors seeking growth potential.

Review of Other Options:

\* A. Canadian Bank Preferred Shares:

\* While preferred shares provide stable dividends and relatively low volatility compared to common shares, they still carry market risk and are not as secure as GICs.

\* B. Index Exchange-Traded Fund (ETF):

\* ETFs track stock indices and offer diversification, but they expose investors to the full market risk of the underlying index, making them unsuitable for those seeking minimal risk exposure.

\* C. Call Option:

\* Call options are speculative derivatives that provide leverage for market exposure but carry significant risk of loss, making them inappropriate for a low-risk investor.

Why D is Correct:

An index-linked GIC balances the investor's objective of gaining exposure to the Canadian stock market with the need for minimal risk by guaranteeing principal protection while offering potential returns tied to market performance.
