What's more, part of that TestPDF ADX-211 dumps now are free: https://drive.google.com/open?id=1DBNYuOkMl1pj3ClFde7E4135x6l_3PYs

TestPDF are specialized in providing our customers with the most reliable and accurate ADX-211 exam guide and help them pass their ADX-211 exams by achieve their satisfied scores. With our ADX-211 study materials, your exam will be a piece of cake. We have a lasting and sustainable cooperation with customers who are willing to purchase our ADX-211 Actual Exam. We try our best to renovate and update our ADX-211 study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate.

The ADX-211 certification exam has become increasingly popular in recent years, particularly among Salesforce administrators and developers. This is because Salesforce is one of the fastest-growing cloud-based customer relationship management (CRM) platforms globally, and more and more organizations are adopting it. With the Salesforce ADX-211 certification, professionals can demonstrate their expertise and stand out in a competitive job market. Additionally, this certification exam can help professionals gain recognition and credibility in the Salesforce community.

Salesforce ADX-211 is an exam designed to validate the knowledge and skills of professionals who are responsible for administering, extending, and automating Salesforce solutions. ADX-211 exam is designed for individuals who have experience working as a Salesforce administrator or developer and are looking to enhance their expertise in the platform.

Exam Questions For Salesforce ADX-211 [Revised] - The Best Method To Pass The Exam

To study and pass the Salesforce ADX-211 Certification Exam on the first attempt, our Salesforce ADX-211 practice test software is your best option.

Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q166-Q171):

NEW QUESTION # 166
The administrator at Cloud Kicks recently replaced several case workflow rules with a single before save flow. Since this change, some cases are routing In unexpected ways.
What could be the cause or the charges to routing?

- A. The old workflow rules are still active and impacting routing.
- B. The flow precedes assignment rules; workflow rules are after assignment rules.
- C. Assignment rules no longer reference the correct fields.
- D. Multiple automation tools have been used and the automation is executed in a different order.

Answer: D

Explanation:
Multiple automation tools have been used and the automation is executed in a different order. This could cause some cases to route in unexpected ways, because the before save flow might override or conflict with the assignment rules or other automation tools that run after the record is saved. The administrator should review the order of execution and ensure that the flow logic is consistent with the other automation tools. Reference: https://help.salesforce.com/s/articleView?id=sf.flow_concepts_trigger_order.htm&type=5 https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_triggers_order_of_execution.htm

NEW QUESTION # 167
The sales manager at Universal Containers would like a dashboard to view each of the sales representative's opportunities, accounts, and related cases.
What is a recommended solution?

- A. Create a dashboard and add filters for users, opportunities, accounts, and cases.
- B. Create an individual dashboard for each sales representative with opportunity, account, and case components.
- C. Create a dynamic dashboard and ensure the sales manager has the view My Team's Dashboard permission.
- D. Create a dynamic dashboard and add fitters for opportunities, accounts, and cases.

Answer: C

NEW QUESTION # 168
At Ursa Major Solar, several different planetary teams handle leads depending on which planet the lead is coming from. While most of the teams only need a few fields filled out to work the lead, the Jupiter team requires additional information to be filled out, such as which moon the lead is coming from. The administrator needs to automate which team is allocated the lead record based on the planet and ensure that every team has all of the information they need.
Which two features will satisfy these requirements?
Choose 2 answers

- A. Matching Rules
- B. Validation Rules
- C. Workflow Rules
- D. Assignment Rules

Answer: B,D

Explanation:
Assignment rules and validation rules are two features that can satisfy these requirements:
Assignment rules are used to automatically assign leads or cases to users or queues based on certain criteria. In this case, an assignment rule can be used to assign leads to different planetary teams depending on which planet the lead is coming from.
Validation rules are used to validate the data entered by users and prevent records from being saved if they do not meet certain criteria. In this case, a validation rule can be used to ensure that every team has all of the information they need by making certain fields required or dependent on other fields.
The other two options are incorrect because:
Matching rules are used to identify duplicate records based on certain fields or fuzzy logic. They do not assign records or validate data.
Workflow rules are used to automate tasks or actions based on certain criteria. They do not assign records or validate data.

NEW QUESTION # 169
An administrator has been asked to enable permissions for users on the account services team to be able to edit and change ownership of Accounts owned by any of the team members.
What should the administrator configure?

- A. Enable Account Teams and grant Read record-level access to account team members for the Account object
- B. Set organization-wide sharing for Account as Public Read Only.
- C. Update the profile Account object to Modify All.
- D. Create a Sharing Rule on the Account object for all members of the account services role to have Read/Write access.

Answer: D

Explanation:
Sharing rules are automatic exceptions to organization-wide sharing settings that grant additional access to records based on record ownership or criteria. By creating a sharing rule on the Account object for all members of the account services role to have Read/Write access, the administrator can allow users in that role to edit and change ownership of Accounts owned by any of their team members, regardless of the organization-wide sharing setting for Account. Reference: https://help.salesforce.com/s/articleView?id=sf.security_sharing_rules.htm&type=5

NEW QUESTION # 170
Cloud Kicks has been tracking how many participants wear the company's shoes in each marathon. The administrator creates two custom objects: Races and Runners. There is a master-detail relationship between them as well as a Roll-up Summary field on the Races object to show the count of runners in each race. Requirements have changed, and the administrator wants to delete the Master-detail Relationship field without deleting the Runners records.
What action should an administrator take before the Relationship field can be deleted?

- A. Change the field type to a Lookup Relationship.
- B. Delete the Roll-up Summary field on the parent.
- C. Select the Allow Reparenting' checkbox on the Master-detail field.
- D. Uncheck 'Delete this record also' to turn off cascading deletes.

Answer: C
