## SC-401 Test Simulator Fee, SC-401 Latest Study Questions

The exam time is coming, while you are not prepared well for SC-401 real test. Please do not be tense and worried, you can pass

your SC-401 actual exam very simply and easily with VCETorrent SC-401 free pdf dumps. With the help of Microsoft SC-401 free pdf practice, you can not only get high score in your actual test, but also can get more technology knowledge and be more professional.

## Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q82-Q87):

### NEW QUESTION # 82

You have a Microsoft 365 ES subscription.

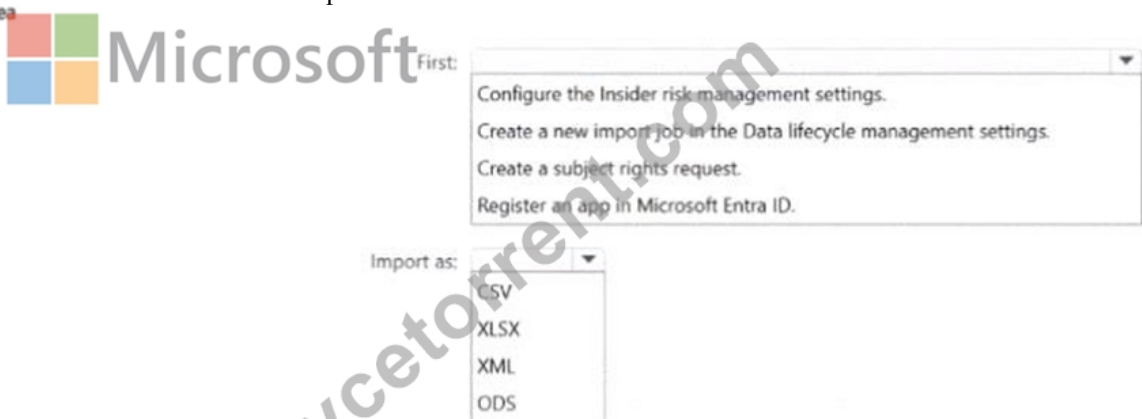

You plan to use the Microsoft Purview portal to map human resources (HR) data for use with insider risk management policies.

You need to add a data connector to import the HR data.

What should you do first and in which format should you import the data? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

First:

- Configure the Insider risk management settings.
- Create a new import job in the Data lifecycle management settings.
- Create a subject rights request.
- Register an app in Microsoft Entra ID.

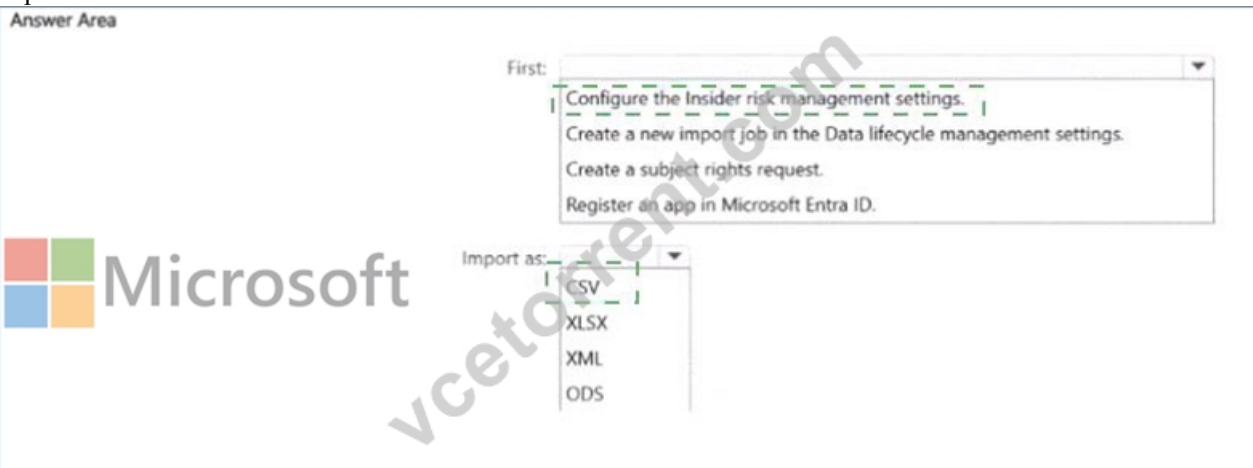

Import as:

- CSV
- XLSX
- XML
- ODS

**Answer:**

**Explanation:**

Answer Area

Microsoft

First:

- Configure the Insider risk management settings.
- Create a new import job in the Data lifecycle management settings.
- Create a subject rights request.
- Register an app in Microsoft Entra ID.

Import as:

- CSV
- XLSX
- XML
- ODS

**Explanation:**

Answer Area

Microsoft

First: Configure the Insider risk management settings.

Import as: CSV

Step 1 - Requirement

The scenario requires using Microsoft Purview Insider Risk Management to import HR data (such as employee hire dates, resignations, and department changes). HR data connectors allow insider risk policies to use workforce signals to detect risky user activities.

Step 2 - What to do first

Before importing HR data, you must configure Insider Risk Management settings in the Microsoft Purview compliance portal. This is

a prerequisite step that enables HR data connectors and policies to be created.

Reference: Configure HR data for Insider Risk Management in Microsoft Purview Step 3 - Import format HR data for Insider Risk Management is imported as a CSV file. The CSV must include required fields like user principal name, event type, start date, and end date. Other formats (XLSX, XML, ODS) are not supported by Purview Insider Risk HR data connectors.

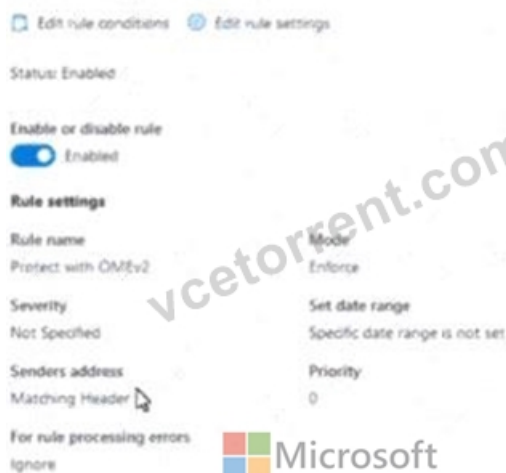

Reference: HR connector CSV schema for Insider Risk Management

### NEW QUESTION # 83

You have a Microsoft 365 subscription.

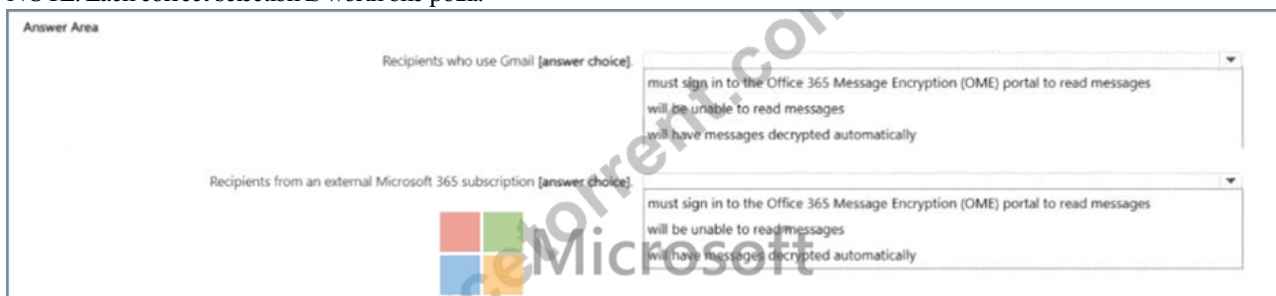

In Microsoft Exchange Online, you configure the mail flow rule shown in the following exhibit.

#### Protect with OMEv2

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

The mail flow rule is configured to apply OMEv2 protection ("Protect with OMEv2") to messages. With OMEv2: Recipients on consumer mail systems (such as Gmail) receive a link-protected message and must authenticate to the Office 365 Message Encryption portal to view the content.

Microsoft 365 recipients (even in external tenants) get a native reading experience in Outlook/OWA where protected messages are

opened directly with automatic decryption using their Microsoft 365 identity-no separate OME portal workflow is required. These behaviors are documented by Microsoft for OMEv2 user experiences for different recipient types and clients. See: Microsoft Purview Office 365 Message Encryption overview and user experiences for external Microsoft 365 and consumer email recipients.

#### NEW QUESTION # 84

You have a Microsoft 365 E5 tenant that uses a domain named contoso.com.

A user named User 1 sends link based, branded emails that are encrypted by using Microsoft Purview Advanced Message Encryption to the recipients shown in the following table.

Name	Email address
Recipient1	Recipient1@contoso.com
Recipient2	Recipient2@fabrikam.onmicrosoft.com
Recipient3	Recipient3@outlook.com
Recipient4	Recipient4@gmail.com

For which recipients Can User1 revoke the emails?

- A. Recipient4 only
- B. Recipient1, Recipient2, Recipient3, and Recipient4
- **C. Recipient3 and Recipients only**
- D. Recipient1 only
- E. Recipient1 and Recipient
