- C. Risk management

정답: B

질문 # 21

Risk evaluation is defined as the process used to:

- A. assign values to the probability and consequence of risk.
- B. find, list, and characterize elements of risk.
- C. select and implement measures to modify risk.
- D. compare estimated risk against given risk criteria.

정답: D

설명:

As defined in API 580, Section 3.1.59:

"Risk evaluation: The process used to compare the estimated risk against given risk criteria to determine the significance of the risk."

This follows from the broader risk assessment process where risk identification and analysis occur first, followed by risk evaluation.
