In order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our AZ-305 learning questions in this website. And we can assure you that you will get the latest version of our AZ-305 Training Materials for free from our company in the whole year after payment on AZ-305 practice quiz. Last but not least, we will provide the most considerate after sale service for our customers on our AZ-305 exam dumps.

Microsoft AZ-305 exam is an essential certification for professionals who want to demonstrate their expertise in designing Azure infrastructure solutions. Candidates who pass AZ-305 exam will have the skills and knowledge needed to design solutions that meet the needs of customers and provide a secure, scalable, and reliable environment on the Azure platform. With the right preparation and training, candidates can pass AZ-305 exam and achieve the Microsoft Certified: Azure Solutions Architect Expert certification.

Microsoft AZ-305 Exam is designed for IT professionals who are interested in designing solutions on Microsoft Azure. AZ-305 exam measures the candidates' knowledge and skills in designing, implementing, and monitoring Microsoft Azure infrastructure solutions. AZ-305 exam tests the candidates on their ability to design solutions for compute, storage, networking, security, and monitoring on the Azure platform.

Microsoft AZ-305 Exam Questions With PDF File Format

Why do we need so many certifications? One thing has to admit, more and more certifications you own, it may bring you more opportunities to obtain a better job, earn more salary. This is the reason why we need to recognize the importance of getting the test AZ-305 certification. Our passing rate is 98%-100% and there is little possibility for you to fail in the exam. But if you are unfortunately to fail in the exam we will refund you in full immediately. Some people worry that if they buy our AZ-305 Exam Questions they may fail in the exam and the procedure of the refund is complicated.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q193-Q198):

NEW QUESTION # 193
You plan to migrate App1 to Azure.
You need to recommend a high-availability solution for App1. The solution must meet the resiliency requirements.
What should you include in the recommendation? To answer, select the appropriate options in the answer area.

Answer:

Explanation:
Explanation
Graphical user interface, text, application, email Description automatically generated
Box 1: 3
Scenario: App1 must meet the following requirements:
Be hosted in an Azure region that supports availability zones.
Maintain availability if two availability zones in the local Azure region fail.
A host group is a resource that represents a collection of dedicated hosts. You create a host group in a region and an availability zone, and add hosts to it.
Use Availability Zones for fault isolation
Availability zones are unique physical locations within an Azure region. Each zone is made up of one or more datacenters equipped with independent power, cooling, and networking. A host group is created in a single availability zone. Once created, all hosts will be placed within that zone. To achieve high availability across zones, you need to create multiple host groups (one per zone) and spread your hosts accordingly.
Box 2: 1
Scenario: App1 must meet the following requirements:
Be hosted on Azure virtual machines that support automatic scaling.
An Azure virtual machine scale set can automatically increase or decrease the number of VM instances that run your application.
This automated and elastic behavior reduces the management overhead to monitor and optimize the performance of your application.

NEW QUESTION # 194
You need to recommend a solution that meets the file storage requirements for App2.
What should you deploy to the Azure subscription and the on-premises network? To answer, drag the appropriate services to the correct locations. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 195
You plan to develop a new app that will store business critical dat
a. The app must meet the following requirements:
* Prevent new data from being modified for one year.
* Maximize data resiliency.
* Minimize read latency.
What storage solution should you recommend for the app? To answer, select the appropriate options in the answer area. NOTE:
Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 196
Your company develops a web service that is deployed to an Azure virtual machine named VM1. The web service allows an API to access real-time data from VM1.

The current virtual machine deployment is shown in the Deployment exhibit. (Click the Deployment tab).

The chief technology officer (CTO) sends you the following email message: "Our developers have deployed the web service to a virtual machine named VM1. Testing has shown that the API is accessible from VM1 and VM2. Our partners must be able to connect to the API over the Internet. Partners will use this data in applications that they develop." You deploy an Azure API Management (APIM) service. The relevant API Management configuration is shown in the API exhibit. (Click the API tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/api-management/api-management-using-with-vnet

NEW QUESTION # 197
Hotspot Question
You have an Azure subscription. The subscription contains 100 virtual machines that run Windows Server 2022 and have the Azure Monitor Agent installed.

You need to recommend a solution that meets the following requirements:
- Forwards JSON-formatted logs from the virtual machines to a Log
Analytics workspace
- Transforms the logs and stores the data in a table in the Log
Analytics workspace
What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
To forward the logs: Use the Azure Monitor Agent. The Azure Monitor Agent can collect different types of data into a Log Analytics workspace, including JSON-formatted logs from your virtual machines.
To transform the logs and store the data: Use Kusto Query Language (KQL). Once the data is in the Log Analytics workspace, you can write KQL queries to transform the logs and store the data in a table in the workspace. KQL is a read-only request to process data and return results.
