## 2026 Efficient EMEA-Advanced-Support New Dumps Sheet Help You Pass EMEA-Advanced-Support Easily

Don't let the Fortinet EMEA Advanced Support Exam exam stress you out! Prepare with our EMEA-Advanced-Support exam dumps and boost your confidence in the EMEA-Advanced-Support exam. We guarantee your road toward success by helping you prepare for the EMEA-Advanced-Support exam. Use the best Fortinet EMEA-Advanced-Support practice questions to pass your EMEA-Advanced-Support Exam with flying colors! In this way, the Fortinet EMEA Advanced Support Exam certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q34-Q39):

#### NEW QUESTION # 34

Which of the following protocols operates at Layer 4

- A. ARP
- B. BGP
- C. OSPF
- D. IPSEC

**Answer: D**

Explanation:

IPsec operates at Layer 4 (Transport Layer) in the OSI model, providing secure communication via protocols like ESP and AH, which work with TCP or UDP. BGP and OSPF are Layer 3 (Network Layer) routing protocols, and ARP operates at Layer 2 (Data Link Layer). Fortinet's FortiGate uses IPsec for VPNs at Layer

4. Exact extract: "IPsec operates at the Transport Layer (Layer 4) to secure communications, encapsulating TCP or UDP packets... BGP and OSPF function at the Network Layer, while ARP resolves IP to MAC addresses at the Data Link Layer."

#### NEW QUESTION # 35

Which term refers to the OSPF router that connects area 0 to a nonbackbone area?

- A. autonomous system boundary router
- B. area border router
- C. area boundary router
- D. backbone router

**Answer: B**

Explanation:

The standard term in OSPF for a router connecting the backbone area (Area 0) to a non-backbone area is "area border router" (ABR). It maintains separate LSDBs for each area and performs summarization. "Area boundary router" is similar but not the standard term; ASBR connects to external AS; backbone router is in Area 0. Exact extract: Go to Network > OSPF. Set Router ID to 10.11.101.1. In the Areas table, click Create New and set the following: Area ID. 0.0. Click OK. In the Networks ... A router connected to more than one area is an area border router (ABR). An autonomous system boundary router (ASBR) is located between an OSPF autonomous ... This article describes the basic steps to configure FortiGates in an OSPF scenario where the FortiGates will be ABR and ASBR OSPF routers across 3 areas. OSPF areas are groupings of OSPF routers or logical parts of a network. An area's routing information can be sent as a summary to other areas. This article describes that routes learned from the other OSPF areas will be removed on the ABR router when it has multiple areas and has no backbone ...

#### NEW QUESTION # 36

Which protocol does FortiGate use for secure management access by default?

- A. SSH
- B. SNMP
- C. Telnet
- D. HTTP

**Answer: A**

Explanation:

FortiGate uses SSH (Secure Shell) by default for secure management access, providing encrypted command-line access. Telnet (A) and HTTP (C) are insecure, and SNMP (D) is for monitoring, not management. Exact extract: "FortiGate enables SSH by default for secure management access, providing encrypted CLI access to administrators."

#### NEW QUESTION # 37

What is the purpose of the FortiGate 'diagnose debug flow' command?

- A. To troubleshoot routing table issues
- B. To monitor system performance metrics

- C. To show the packet flow through firewall policies
- D. To display real-time packet captures

**Answer: C**

Explanation:

The 'diagnose debug flow' command in FortiGate is used to troubleshoot how packets are processed through firewall policies, showing details like policy matching, NAT, and session handling. It helps identify why packets are allowed or dropped. Option A refers to packet sniffing, B to routing diagnostics, and D to performance monitoring, none of which are the primary function. Exact extract: "The diagnose debug flow command displays the packet flow through FortiGate, including policy matching, NAT, and session details, useful for troubleshooting traffic issues."

### NEW QUESTION # 38

Which Router in an OSPF Domain sends a Type-4 Summary LSA

- A. All OSPF Routers
- B. Stub Routers only
- C. ABR
- D. ASBR

**Answer: C**

Explanation:

In OSPF, the Area Border Router (ABR) generates Type-4 Summary LSAs to advertise the location of an Autonomous System Boundary Router (ASBR) to other areas. This LSA informs routers in different areas how to reach the ASBR for external routes. ASBR generates Type-5 LSAs for external routes, but ABR summarizes them with Type-4. Not all routers or stub routers do this. Exact extract: This article describes the basic steps to configure FortiGates in an OSPF scenario where the FortiGates will be ABR and ASBR OSPF routers across 3 areas. Router3 is the Autonomous System Border Router (ASBR). It routes all traffic to the ISP BGP router for internet access. It redistributes routes from BGP and ... Type 4 LSAs exist to let the area know the router-id of the ASBR, so the routers can look at the type 5 route, find advertising-router, and map ... An ASBR summary LSA is generated by an ABR and describes the location of an ASBR (Autonomous System Boundary Router) that connects to an external network. The FortiGate in the middle shall be a ABR between the two areas. But I don't want R2 in area 0.0.0.0 to have every /32 route for every VPN client. So I tried ...

### NEW QUESTION # 39

.....

Prepared by experts and approved by experienced professionals, our EMEA-Advanced-Support exam torrent is well-designed high quality products and they are revised and updated based on changes in syllabus and the latest developments in theory and practice. With the guidance of our EMEA-Advanced-Support Guide Torrent, you can make progress by a variety of self-learning and self-assessing features to test learning outcomes. And as the high pass rate of our EMEA-Advanced-Support exam questions is 99% to 100%, you will be bound to pass the EMEA-Advanced-Support exam with ease.
