SPLK-3002합격보장가능공부 & SPLK-3002높은통과율 시험대비공부자료

2026 PassTIP 최신 SPLK-3002 PDF 버전 시험 문제집과 SPLK-3002 시험 문제 및 답변 무료 공유: https://drive.google.com/open?id=1PRqDRsI8ugA_DvfBrQ4laB_rE5SsOmuD

많은 사이트에서Splunk 인증SPLK-3002 인증시험대비자료를 제공하고 있습니다. 그중에서 PassTIP를 선택한 분들은Splunk 인증SPLK-3002시험통과의 지름길에 오른것과 같습니다. PassTIP는 시험에서 불합격성적표를 받으시면 덤프비용을 환불하는 서

Splunk SPLK-3002 (Splunk IT Service Intelligence Certified Admin) 인증 시험은 Splunk IT 서비스 인텔리전스 관리 및 관리에 대한 기술과 지식을 시연하려는 IT 전문가를 위해 설계된 널리 알려진 인증 프로그램입니다. 이 인증 시험은 핵심 개념, 기능 및 기능을 포함하여 Splunk IT 서비스 인텔리전스의 다양한 측면에서 후보자의 숙련도를 테스트하도록 특별히 설계되었습니다.

SPLK-3002 시험은 ITSI 개념, 도구 및 기술에 대한 후보자의 지식을 평가하는 객관식 문제로 구성되어 있습니다. 이 시험은 온라인으로 시행되며 언제 어디서나 응시할 수 있습니다. 시험 통과 기준은 70%이며, 후보자는 90분 동안 시험을 완료해야 합니다. 성공한 후보자는 ITSI 관리 및 운영에 대한 전문성을 입증하는 Splunk 자격증을 받게 됩니다.

Splunk SPLK-3002높은 통과율 시험대비 공부자료 - SPLK-3002시험패스 가능한 공부하기

Splunk SPLK-3002인증시험을 패스하고 자격증 취득으로 하여 여러분의 인생은 많은 인생역전이 이루어질 것입니다. 회사, 생활에서는 물론 많은 업그레이드가 있을 것입니다. 하지만SPLK-3002시험은Splunk인증의 아주 중요한 시험으로서SPLK-3002시험패스는 쉬운 것도 아닙니다.

최신 Splunk IT Service SPLK-3002 무료샘플문제 (Q65-Q70):

질문 # 65
Which of the following are characteristics of ITSI service dependencies? (select all that apply)

- A. Impactful dependent services should only be configured to one primary service to avoid false negatives in Multi KPI Alerts.
- B. If a primary service has a dependent service KPI and the KPI's importance level is changed, the dependency is broken.
- C. Setting the dependent service KPI importance level will be treated as any other KPI in the primary service's health score.
- D. It is best practice to use the dependent service's built-in 'ServiceHealthScore' KPI to reflect impact to the primary service.

정답：C,D

설명:
In the context of Splunk IT Service Intelligence (ITSI), service dependencies allow for the modeling of relationships between services, where the health of one service (dependent) can affect the health of another (primary).
B) It is best practice to use the dependent service's built-in 'ServiceHealthScore' KPI to reflect impact to the primary service: Utilizing the 'ServiceHealthScore' KPI of a dependent service as part of the primary service's health calculation is a recommended practice. This approach ensures that changes in the health of the dependent service directly influence the primary service's overall health score, providing a more holistic view of service health within the IT environment.
C) Setting the dependent service KPI importance level will be treated as any other KPI in the primary service's health score: When a dependent service's KPI is incorporated into a primary service, the importance level assigned to this KPI is factored into the primary service's overall health score calculation just like any other KPI. This means that the impact of the dependent service on the primary service can be weighted according to the business significance of the relationship between the services.
The other options are not accurate representations of ITSI service dependencies. Changes in KPI importance levels do not break dependencies, and there is no restriction on configuring impactful dependent services to only one primary service, as dependencies can be complex and multi-layered across various services.

질문 # 66
Which of the following is a characteristic of base searches?

- A. Search expression, entity splitting rules, and thresholds are configured at the base search level.
- B. The fewer KPIs that share a common base search, the more efficiency a base search provides, and anomaly detection is more efficient.
- C. It is possible to filter to entities assigned to the service for calculating the metrics for the service's KPIs.
- D. The base search will execute whether or not a KPI needs it.

정답: C

설명:
Reference:
A base search is a search definition that can be shared across multiple KPIs that use the same data source. Base searches can improve search performance and reduce search load by consolidating multiple similar KPIs. One of the characteristics of base searches is that it is possible to filter to entities assigned to the service for calculating the metrics for the service's KPIs. This means that you can use entity filtering rules to specify which entities are relevant for each KPI based on the base search results. Reference: Create KPI base searches in ITSI, [Filter entities for KPIs based on base searches]

질문 # 67
Which of the following items describe ITSI Backup and Restore functionality? (Choose all that apply.)

- A. ITSI backups are stored as a collection of JSON formatted files.
- B. ITSI backup is inclusive of KV Store, ITSI Configurations, and index dependencies.
- C. A pre-configured default ITSI backup job is provided that can be modified, but not deleted.
- D. kvstore_to_json.py can be used in scripts or command line to backup ITSI for full or partial backups.

정답: A,D

설명:
Explanation
ITSI provides a kvstore_to_json.py script that lets you backup/restore ITSI configuration data, perform bulk service KPI operations, apply time zone offsets for ITSI objects, and regenerate KPI search schedules.
When you run a backup job, ITSI saves your data to a set of JSON files compressed into a single ZIP file.

질문 # 68
Which step is required to install ITSI on a single Search Head?

- A. Run splunk_apply shcluster-bundle
- B. All of the above.
- C. Use the Splunk -> Manage Apps Dashboard to download and install.
- D. Untar the ITSI package in <splunk home>/etc/apps

정답：C

설명：
To install Splunk IT Service Intelligence (ITSI) on a single Search Head, one of the straightforward methods is to use the Splunk Web interface, specifically the "Manage Apps" dashboard, to download and install ITSI.
This method is user-friendly and does not require manual file handling or command-line operations. By navigating to "Manage Apps" in the Splunk Web interface, users can find ITSI in the app repository or upload the ITSI installation package if it has been downloaded previously. From there, the installation process is initiated through the Splunk Web interface, simplifying the setup process. This approach ensures that the installation follows Splunk's standard app installation procedures, helping to avoid common installation errors and ensuring that ITSI is correctly integrated into the Splunk environment.

질문 # 69
Which of the following services often has KPIs but no entities?

- A. Network Service.
- B. Business Service.
- C. Technical Service.
- D. Security Service.

정답：B

설명：
In the context of Splunk IT Service Intelligence (ITSI), a Business Service often has Key Performance Indicators (KPIs) but might not have directly associated entities. Business Services represent high-level aggregations of organizational functions or processes and are typically measured by KPIs that reflect the performance of underlying technical services or components rather than direct infrastructure entities. For example, a Business Service might monitor overall transaction completion times or customer satisfaction scores, which are abstracted from the specific technical entities that underlie these metrics. This abstraction allows Business Services to provide a business-centric view of IT health and performance, focusing on outcomes rather than specific technical components.
