## Juniper JN0-105 Free Dumps | Valid JN0-105 Exam Format

A lot of professional experts concentrate to making our JN0-105 practice materials by compiling the content so they have gained reputation in the market for their proficiency and dedication. About some esoteric points, they illustrate with examples for you. Our JN0-105 practice materials are the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing us. The best way to gain success is not cramming, but to master the discipline and regular exam points of question behind the tens of millions of questions. Our JN0-105 practice materials can remove all your doubts about the exam. If you believe in our products this time, you will enjoy the happiness of success all your life.

### Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q69-Q74):

#### NEW QUESTION # 69

When considering routing tables and forwarding tables, which two statements are correct? (Choose two.)

- **A. The routing table is used by the RE to select the best route.**
- **B. The routing table stores all routes and prefixes from all protocols.**
- C. The forwarding table stores all routes and prefixes from all protocols.
- D. The forwarding table is used by the RE to select the best route.

**Answer: A,B**

Explanation:

The routing table and forwarding table play distinct roles in a Junos OS device. The correct answers are A and D.

The routing table (A) is used by the Routing Engine (RE) to select the best route among all the learned routes, while the routing table (D) stores all routes and prefixes learned from all routing protocols. The forwarding table, in contrast, contains only the active routes chosen by the RE and is used by the Packet Forwarding Engine for actual packet forwarding.

#### NEW QUESTION # 70

Which advantage is provided by multiple software processes running in the Junos OS?

- **A. Each process runs in a protected memory space.**
- B. Each process dependency can be mapped independently.
- C. Each process allocates a fixed amount of CPU resources.
- D. Each process is started manually to ensure system stability.

**Answer: A**

Explanation:

In the Junos OS, multiple software processes run independently in their own protected memory spaces. This design ensures that if one process crashes or encounters an issue, it does not affect the other processes running on the system. This architecture enhances the stability and reliability of the network device, as each process operates independently and securely.

#### NEW QUESTION # 71

Exhibit

[edit]

```
user@router1 set interfaces ge-0/1/2 unit 0 family inet address 172.16.101.1/24 [edit] user@router# commit check configuration check succeeds
```

[edit]

```
user@router#
```

You need to configure interface ge-0/1/2 with an IP address of 172.16.100.1/24. You have accidentally entered 172.16.101.1/24 as shown in the exhibit.

Which command should you issue to solve the problem?

- A. [edit] user@routeri rollback rescue
- B. [edit] user@router# rollback 0
- C. [edit] user@router# rollback 2
- D. (edit) user@router# rollback 1

**Answer: D**

Explanation:

If you've committed a configuration and then need to revert to the previous configuration, the `rollback` command is used. Since the incorrect IP address has not been committed, as indicated by the `commit check` command being successful, issuing `rollback 1` will undo the changes made in the current session, which includes the accidental entry of the IP address.

### NEW QUESTION # 72

You received a new Junos device and are configuring the system-related settings. You must configure this device for the current date and time on the US West coast. You have set the time zone to `America/Los_Angeles`, however the time and date did not change.

In this scenario, which two additional actions would satisfy this requirement? (Choose two.)

- A. Configure a DNS server.
- B. Reboot the device.
- C. Configure an NTP server.
- D. Set the date and time setting manually.

**Answer: C,D**

Explanation:

When configuring the system-related settings for the current date and time on a Junos device, especially for a specific time zone like `America/Los_Angeles`, and the time does not automatically adjust, two effective actions can be taken. Firstly, setting the date and time manually allows for immediate correction of the system clock. This can be done via the CLI with the appropriate `set date and time` command. Secondly, configuring the device to use an NTP server can provide ongoing synchronization with an accurate time source, ensuring that the device maintains the correct time and date automatically in the future, even in the case of restarts or minor drifts in the internal clock.

### NEW QUESTION # 73

Which command modifier would you use to see all possible completions for a specific command?

- A. extensive
- B. detail
- C. ?
- D. |

**Answer: C**

Explanation:

In Junos OS, the `?` command modifier is used to display all possible completions for a specific command. This helps users understand the available options and syntax for a command they are trying to use.

### NEW QUESTION # 74

.....

The best way for candidates to know our Junos, Associate (JNCIA-Junos) JN0-105 training dumps is downloading our free demo. We provide free PDF demo for each exam. This free demo is a small part of the official complete Juniper JN0-105 training dumps. The free demo can show you the quality of our exam materials. You can download any time before purchasing.
