350-201 Valid Test Camp & Latest 350-201 Test Simulator

Cisco 350-201 actual test questions have effective high-quality content and cover many the real test questions. Cisco 350-201 study guide is the best product to help you achieve your goal. If you pass exam and obtain a certification with our Cisco 350-201 Study Materials, you can apply for satisfied jobs in the large enterprise and run for senior positions with high salary and high benefits.

Cisco Performing CyberOps Using Cisco Security Technologies Sample Questions (Q40-Q45):

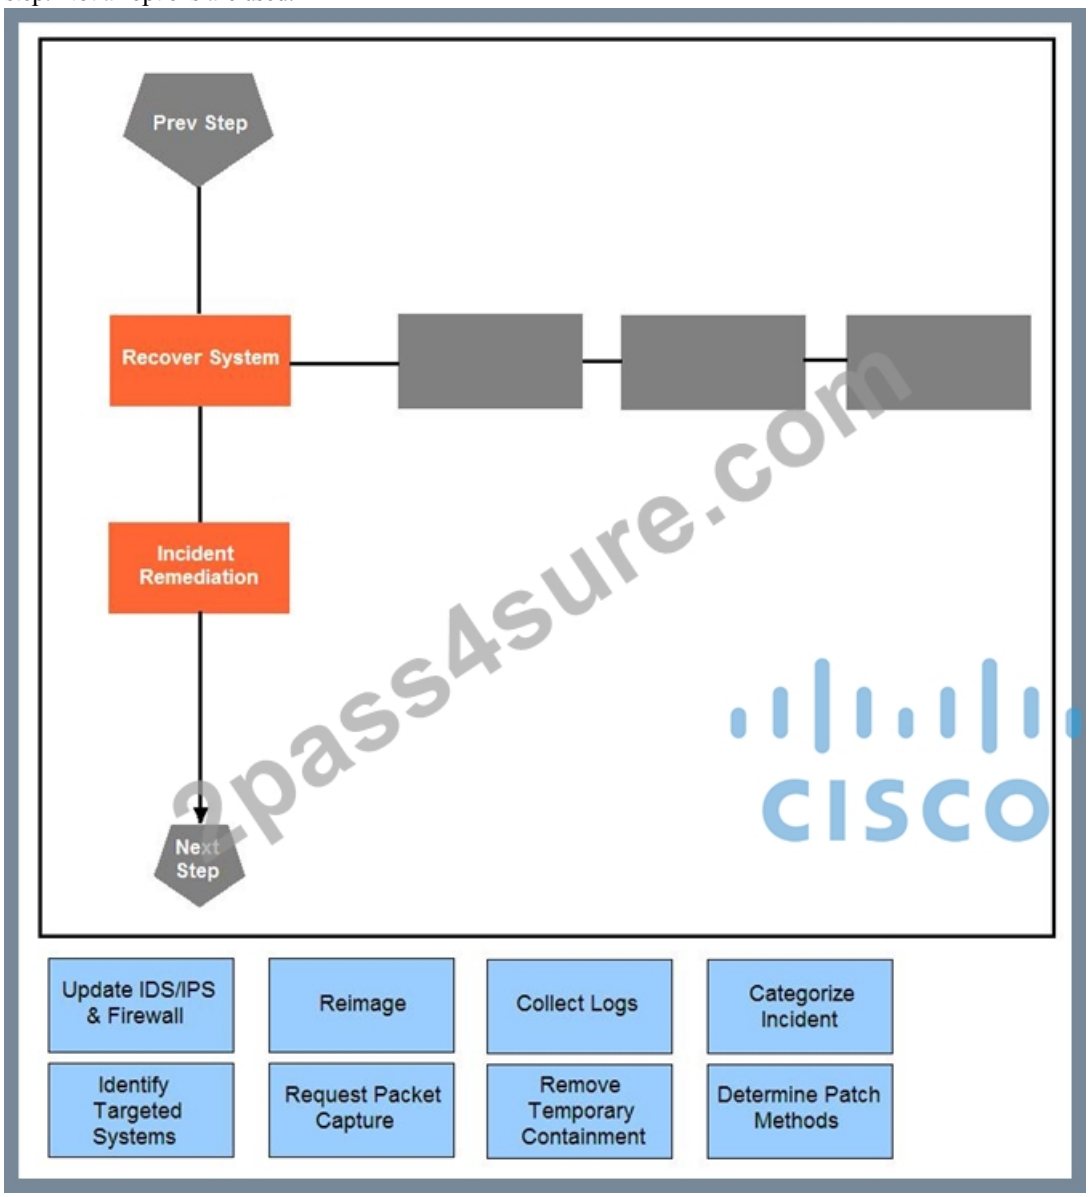
NEW QUESTION # 40
According to GDPR, what should be done with data to ensure its confidentiality, integrity, and availability?

- A. Conduct a data protection impact assessment
- B. Perform a vulnerability assessment
- C. Perform awareness testing
- D. Conduct penetration testing

Answer: A

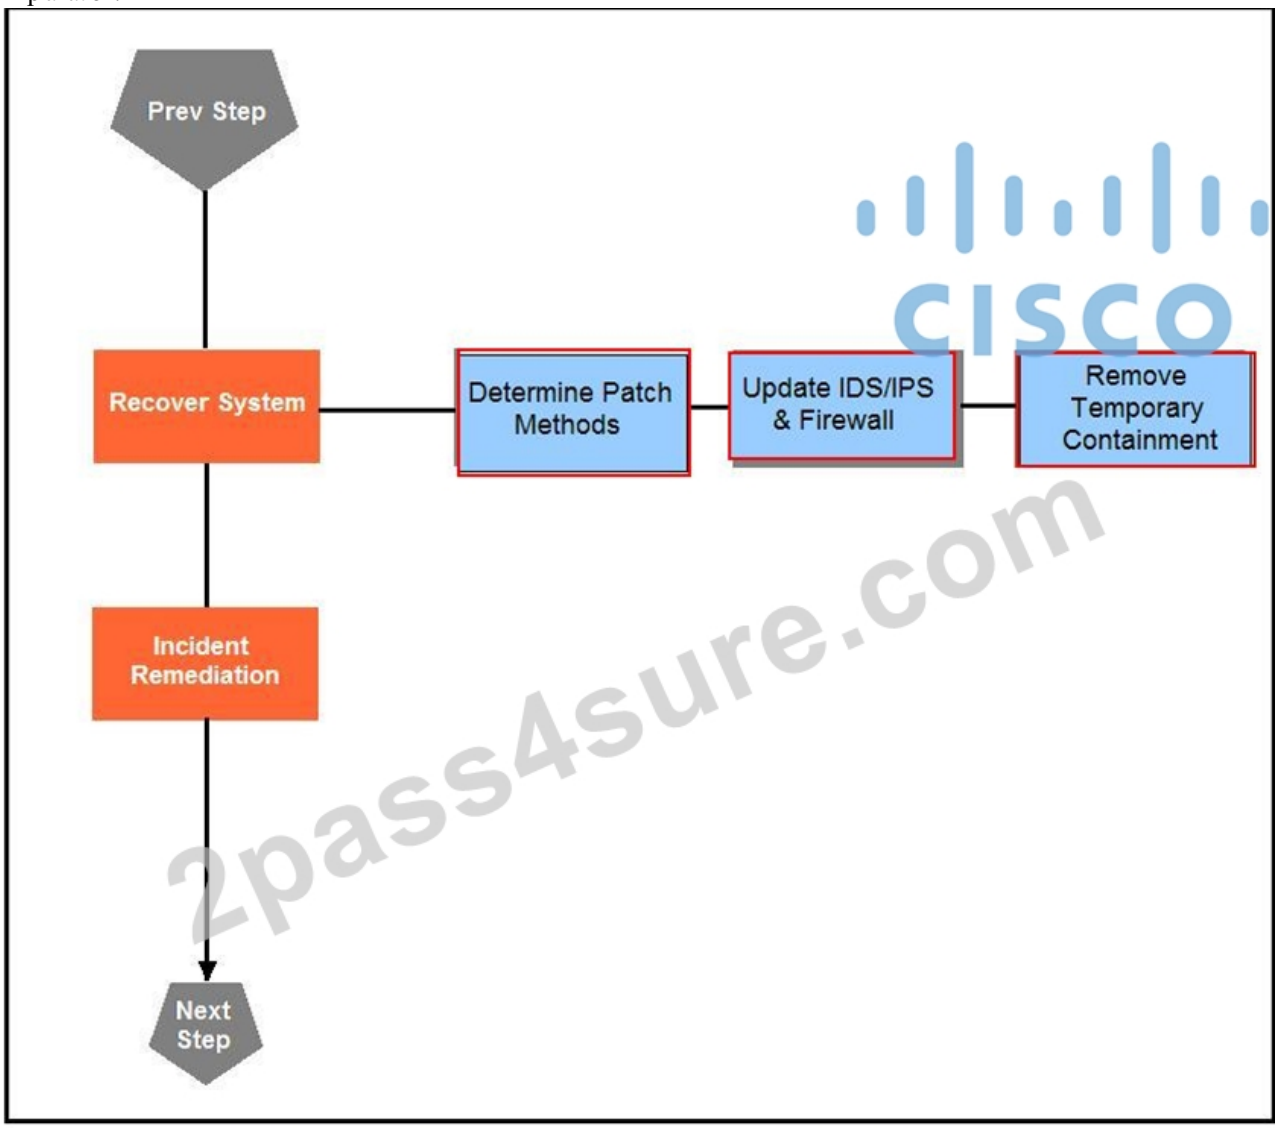
Explanation:
Explanation/Reference: https://apdcat.gencat.cat/web/.content/03-documentacio/Reglament_general_de_proteccio_de_dades/documents/DPIA-Guide.pdf

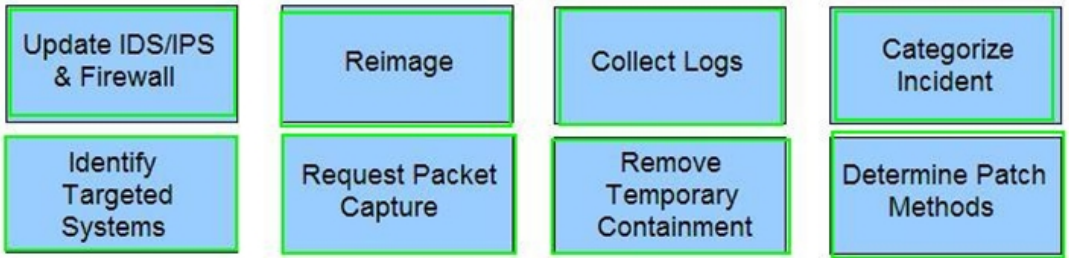
NEW QUESTION # 41
Drag and drop the actions below the image onto the boxes in the image for the actions that should be taken during this playbook step. Not all options are used.



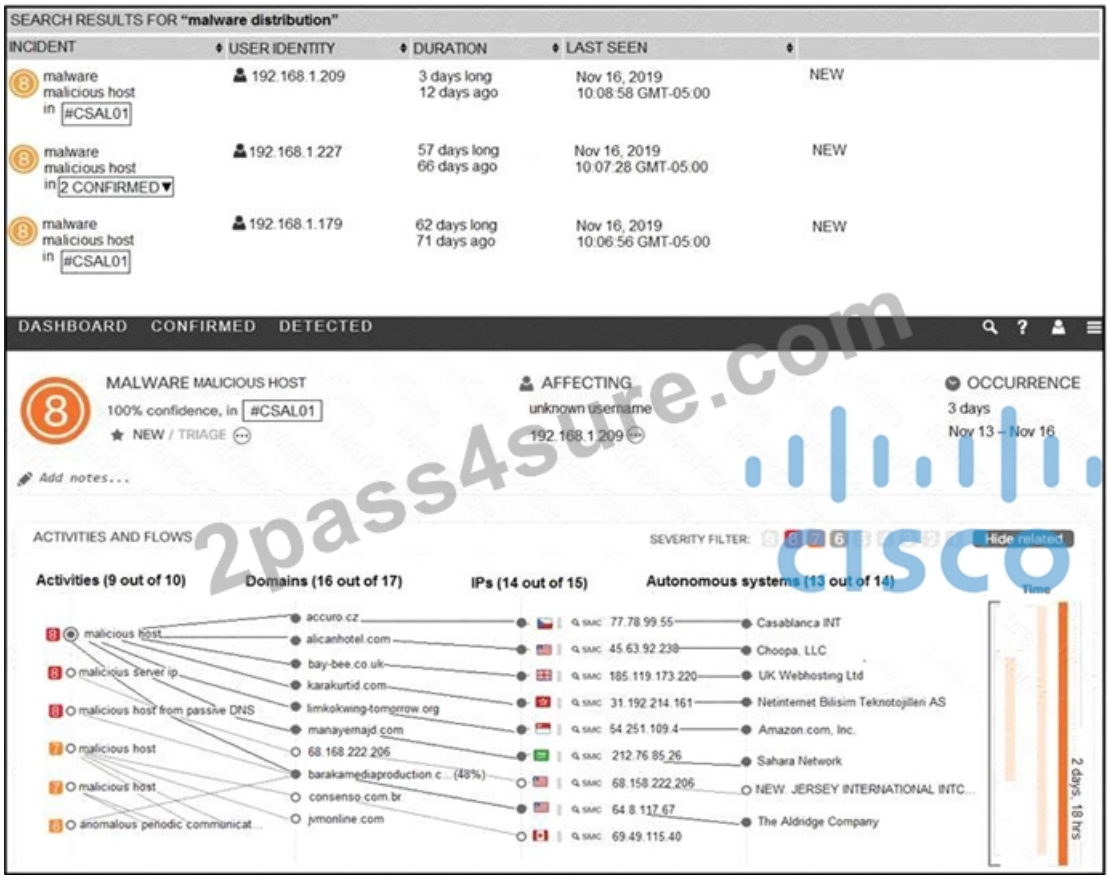
Answer:

Explanation:





NEW QUESTION # 42
Refer to the exhibit.



For IP 192.168.1.209, what are the risk level, activity, and next step?

- A. high risk level, anomalous periodic communication, quarantine with antivirus
- B. high risk level, malicious host, investigate further
- C. critical risk level, malicious server IP, run in a sandboxed environment
- D. critical risk level, data exfiltration, isolate the device

Answer: D

Explanation:
The IP address 192.168.1.209 is associated with a critical risk level due to data exfiltration activities. Data exfiltration refers to the unauthorized transfer of data from a computer or other device, which can be a significant security threat as it may involve sensitive or proprietary information being taken out of the network. Given the severity of the risk and the nature of the activity, the immediate next step is to isolate the device to prevent further unauthorized data transfer and to contain the potential breach. This action will also allow fora more thorough investigation without the risk of additional data loss or network compromise1.
References:
* Cisco's CyberOps Using Core Security Technologies course provides insights into identifying and responding to cybersecurity threats, including data exfiltration2.
* The Cisco Certified CyberOps Associate certification emphasizes the skills needed to work in a Security Operations Center (SOC), including the handling of critical threats and the isolation of affected devices

NEW QUESTION # 43
An organization installed a new application server for IP phones. An automated process fetched user credentials from the Active Directory server, and the application will have access to on-premises and cloud services. Which security threat should be mitigated first?

- A. aligning access control policies
- B. exfiltration during data transfer
- C. data exposure from backups
- D. attack using default accounts

Answer: D

Explanation:
The first security threat that should be mitigated when installing a new application server for IP phones is the attack using default accounts. Default accounts often have preset usernames and passwords that are widely known and can be easily exploited by attackers. It is crucial to change these default credentials to prevent unauthorized access

NEW QUESTION # 44
How is a SIEM tool used?

- A. To compare security alerts against configured scenarios and trigger system responses
- B. To collect and analyze security data from network devices and servers and produce alerts
- C. To collect security data from authentication failures and cyber attacks and forward it for analysis
- D. To search and compare security data against acceptance standards and generate reports for analysis

Answer: B

Explanation:
A Security Information and Event Management (SIEM) tool is primarily used to collect and analyze security data from various sources, such as network devices and servers, and then produce alerts based on this analysis.
SIEM tools aggregate and correlate data to identify patterns that may indicate a security incident, allowing organizations to respond to threats more effectively.

NEW QUESTION # 45
.....

Cisco 350-201 certification exam is very important for every IT person. With this certification you will not be eliminated, and you will be a raise. Some people say that to pass the Cisco 350-201 exam certification is tantamount to success. Yes, this is true. You get what you want is one of the manifestations of success. 2Pass4sure of Cisco 350-201 Exam Materials is the source of your success. With this training materials, you will speed up the pace of success, and you will be more confident.
