

350-401 Valid Braindumps Files Unparalleled Questions Pool Only at RealVCE

BONUS!!! Download part of RealVCE 350-401 dumps for free: https://drive.google.com/open?id=18_M0OoqsZanqEsCBJyfrQD5YwoTnu0tG

It is well acknowledged that people who have a chance to participate in the simulation for the real test, they must have a fantastic advantage over other people to get good grade in the exam. Now, it is so lucky for you to meet this opportunity once in a blue . We offer you the simulation test with the App version of our 350-401 preparation test, in order to let you be familiar with the environment of test as soon as possible. Under the help of the real 350-401 test simulation, you can have a good command of key points which are more likely to be tested in the real test. Therefore that adds more confidence for you to make a full preparation of the upcoming 350-401 Exam. In addition, since you can experience the process of 350-401 the simulation test, you will feel less pressure about the approaching exam. It sounds wonderful, right? Of course, it is. So why not have a try? We promise you will enjoy this study.

When it comes to the main objectives that this training sets, they are as covered below:

- Optimizing the usage of OSPFv2 as well as OSPFv3 including various packet types, adjacencies, and filtering for routers;
- Learning how to utilize spanning tree protocol;
- Describing the features of the Cisco solutions known as SD-Access & SD-WAN.
- Defining local wireless servers for roaming;

- Extensible Authentication Protocol configuration and validation;
- Troubleshooting the aggregation of links;

Career opportunities

With the Cisco CCNP Enterprise certification, the professionals can land some lucrative job roles that will enhance their career growth. Their specific position and salary potential will depend on their years of experience, hands-on skills, and organization, among others. The individuals with this certificate can take up the following titles: a Network Engineer, a Security Specialist, a Wireless Specialist, and a Networking Specialist. The average salary for these certified experts is about \$90,000 and \$105,000 per annum.

Reliable 350-401 Test Testking - Valid 350-401 Exam Topics

Some people want to study on the computer, but some people prefer to study by their mobile phone. Because our 350-401 study torrent can support almost any electronic device, including iPod, mobile phone, and computer and so on. If you choose to buy our Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) guide torrent, you will have the opportunity to use our study materials by any electronic equipment. We believe that our 350-401 Test Torrent can help you improve yourself and make progress beyond your imagination. If you buy our 350-401 study torrent, we can make sure that our study materials will not be let you down

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q325-Q330):

NEW QUESTION # 325

Which version of NetFlow does Cisco Threat Defense utilize to obtain visibility into the network?

- A. 0
- B. IPFIX
- C. flexible
- D. NBAR2

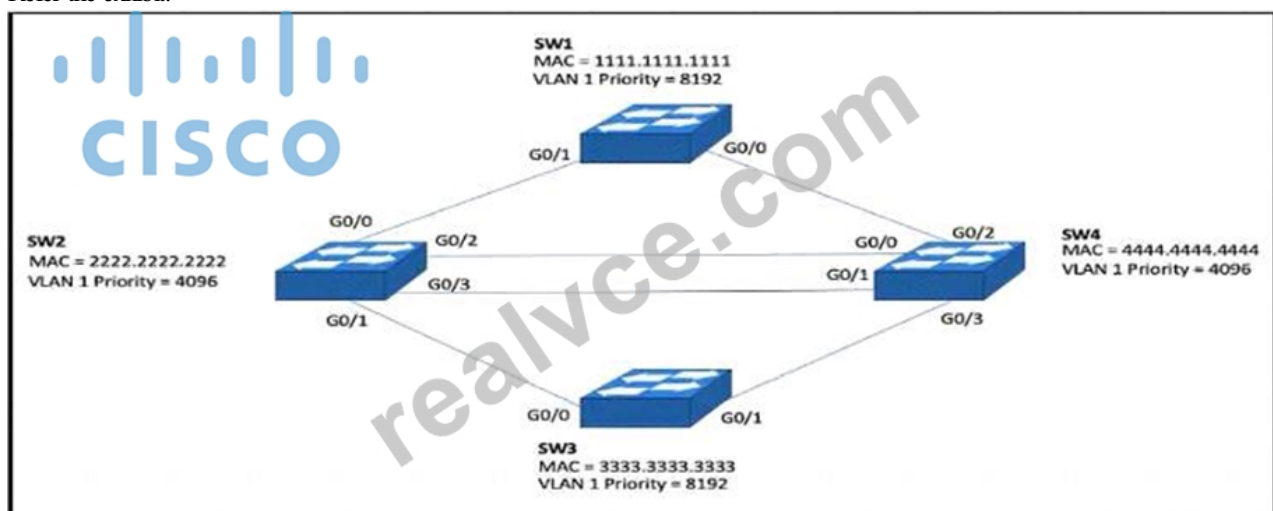

Answer: C

Explanation:

Cisco Threat Defense utilizes NetFlow version 8 to gain visibility into network traffic patterns and detect potential threats. NetFlow v8 includes enhancements for security monitoring, allowing for more detailed and specific traffic analysis compared to earlier versions.

NEW QUESTION # 326

Refer the exhibit.

Which configuration elects SW4 as the root bridge for VLAN 1 and puts G0/2 on SW2 into a blocking state?

- A.

```
SW4(config)#spanning-tree vlan 1 priority 0
!
SW2(config)#int G0/2
SW2(config-if)#spanning-tree cost 128
```
- B.

```
SW4(config)#spanning-tree vlan 1 priority 32768
!
SW2(config)#int G0/2
SW2(config-if)#spanning-tree cost 128
```
- C.

```
SW4(config)#spanning-tree vlan 1 priority 0
!
SW2(config)#interface G0/2
SW2(config-if)#spanning-tree vlan 1 port-priority 64
```
- D.

```
SW4(config)#spanning-tree vlan 1 priority 32768
!
SW2(config)#interface G0/2
SW2(config-if)#spanning-tree vlan 1 port-priority 0
```

Answer: C

Explanation:

To elect SW4 as the root bridge for VLAN 1, the priority value needs to be lower than any other switch in the network for that VLAN. The default priority value is 32768, and by setting SW4's priority to 32768 for VLAN

1, it does not guarantee that SW4 will become the root bridge unless all other switches have their priorities set higher or equal and have a higher MAC address. However, assuming all other factors are default, this could make SW4 a candidate for being the root bridge if it has the lowest MAC address.

To put G0/2 on SW2 into a blocking state, we need to influence the Spanning Tree Protocol (STP) decisions.

This can be done by manipulating port costs or priorities to ensure that this port does not provide the best path to the root bridge.

By setting the spanning-tree cost of G0/2 on SW2 to 128, it increases the likelihood of this port being selected as a non-designated port if there is another path with a lower cost.

NEW QUESTION # 327

Which configuration restricts the amount of SSH traffic that a router accepts to 100 kbps?

A)

```
class-map match-all CoPP_SSH
  match access-group name CoPP_SSH
  !
policy-map CoPP_SSH
  class CoPP_SSH
    police cir 100000
    exceed-action drop
    !
  !
  !
  interface GigabitEthernet0/1
    ip address 209.165.200.225 255.255.255.0
    ip access-group EGRESS out
    service-policy input CoPP_SSH
    !
  !
  ip access-list extended CoPP_SSH
    deny tcp any any eq 22
```

B)

```

class-map match-all CoPP_SSH
  match access-group name CoPP_SSH
  !
policy-map CoPP_SSH
  class CoPP_SSH
    police cir 100000
    exceed-action drop
  !
  !
control-plane transit
  service-policy input CoPP_SSH
  !
ip access-list extended CoPP_SSH
  permit tcp any any eq 22

```

C)

```

class-map match-all CoPP_SSH
  match access-group name CoPP_SSH
  !
policy-map CoPP_SSH
  class CoPP_SSH
    police cir 100000
    exceed-action drop
  !
  !
interface GigabitEthernet0/1
  ip address 209.165.200.225 255.255.255.0
  ip access-group EGRESS out
  service-policy input CoPP_SSH
  !
ip access-list extended CoPP_SSH
  permit tcp any any eq 22

```

D)

```

class-map match-all CoPP_SSH
  match access-group name CoPP_SSH
  !
policy-map CoPP_SSH
  class CoPP_SSH
    police cir 100000
    exceed-action drop
  !
  !
control-plane
  service-policy input CoPP_SSH
  !
ip access-list extended CoPP_SSH
  permit tcp any any eq 22

```

- A. Option B
- B. Option C
- C. Option A
- **D. Option D**

Answer: D

NEW QUESTION # 328

Why would an architect use an OSPF virtual link?

- A. to allow a stub area to transit another stub area
- B. to connect a nonbackbone area to Area 0 through another nonbackbone area
- **C. to merge two existing Area 0s through a nonbackbone**
- D. to connect two networks that have overlapping private IP address space

Answer: C

Explanation:

An OSPF virtual link is used for two primary purposes:

* Linking an area that does not have a physical connection to the backbone (Area 0): In cases where it is not possible to have a direct physical connection to the backbone area (Area 0), a virtual link allows an OSPF router in a non-backbone area to connect to the backbone through a transit area. This transit area must have full routing information and cannot be a stub area.

* Patching the backbone in case of discontinuity of Area 0: If there is a partitioned backbone (Area 0) due to network changes or other reasons, a virtual link can be used to connect the two parts of the partitioned backbone through a non-backbone area.

In summary, an OSPF virtual link helps maintain connectivity between areas when physical connections are not feasible or when the backbone itself is partitioned.

NEW QUESTION # 329

Drag and drop the wireless elements on the left to their definitions on the right.

beamwidth	a graph that shows the relative intensity of the signal strength of an antenna within its space
polarization	the relative increase in signal strength of an antenna in a given direction
radiation patterns	measures the angle of an antenna pattern in which the relative signal strength is half-power below the maximum value
gain	radiated electromagnetic waves that influence the orientation of an antenna within its electromagnetic field

Answer:

Explanation:

beamwidth	radiation patterns
polarization	gain
radiation patterns	beamwidth
gain	polarization

NEW QUESTION # 330

.....

Cisco 350-401 certification exam opens the doors for starting a bright career in the sector. After passing the Cisco 350-401 test you will easily apply for good jobs in top companies all over the world. Cisco 350-401 exam offers multiple advantages including high salaries, promotions, enhancing resumes, and skills improvement. Once you pass the 350-401 Exam, you can avail all these benefits. If you want to pass the Cisco 350-401 certification exam, you must find the best resource to prepare for the Cisco 350-401 test.
