We attract customers by our fabulous 350-601 certification material and high pass rate, which are the most powerful evidence to show our strength. We are so proud to tell you that according to the statistics from our customers' feedback, the pass rate of our 350-601 exam questions among our customers who prepared for the exam with our 350-601 Test Guide have reached as high as 99%, which definitely ranks the top among our peers. Hence one can see that the 350-601 learn tool compiled by our company are definitely the best choice for you.

The benefit of obtaining the Cisco 350-601: Implementing and Operating Cisco Data Center Core Technologies Exam Certification

- Cisco 350-601: Implementing and Operating Cisco Data Center Core Technologies Certification has more useful and relevant networks that help them in setting career goals for themselves. Cisco 350-601: Implementing and Operating Cisco Data Center Core Technologies networks provide them with the correct career guidance that non-certified generally are unable to get.
- Cisco 350-601: Implementing and Operating Cisco Data Center Core Technologies Certification is distinguished among competitors. Cisco 350-601: Implementing and Operating Cisco Data Center Core Technologies certification can give them an edge at that time easily when candidates appear for a job interview companies look to note something which individualizes the individual to another.
- Cisco 350-601: Implementing and Operating Cisco Data Center Core Technologies Certifications provide opportunities to get a job easily in which they are interested in instead of wasting years and ending without getting any experience.

Skills Outline of Cisco 350-601 Exam

The Cisco 350-601 exam is presented to the candidates in a wide range of topics, which indicate the skills measured. Here they are:

- **Storage Network (20%)**

This subject area evaluates the candidates' proficiency in describing software updates as well as their impacts (EPLD and disruptive/nondisruptive), implementing infrastructure monitoring, describing the NAS and NFS concepts, and implementing FCoE Unified Fabric (DCB and FIP). This topic also encompasses their proficiency in implementing Fiber Channel. This means that the applicants must have a thorough understanding of zoning, VSAN, NPV and NPIV, device alias, FCNS, CFS, FCID, port channels, and switch fabric initialization.

- **Compute (25%)**

Answering the questions from this objective, the applicants have to show that they have the capability to implement Cisco Unified Compute System Rack Servers, implement infrastructure monitoring such as Intersight and SPAN, implement compute management configuration (restore and backup), describe software and firmware updates and their effects on C-Series and B-Series servers, and explain HyperFlex Infrastructure with its benefits (all-flash vs Edge and Hybrid Architecture). Besides, within this knowledge area, the learners' ability to implement Cisco Compute System Blade Chassis is tested. This means that the students must have the skills needed to accomplish initial setup and infrastructure management. They should also demonstrate their knowledge of server management, storage management, and network management (pools and policies, VLANs, templates, QoS).

- **Automation (15%)**

In the framework of this topic, the individuals need to show their competency in implementing automation and scripting tools, including REST API, EEM, Scheduler, Guest Shell and Bash Shell for NX-OS, and JSON and XML encodings. Answering the questions within this domain, they also need to be able to evaluate automation as well as orchestration technologies. This means that they should be well conversant with UCSD, DCNM, POAD, PowerShell, Python, Ansible, and Puppet.

- **Security (15%)**

In the last section, the examinees need to demonstrate their expertise in applying network security, including CoPP, ACI contracts, and micro-segmentation, AAA and RBAC, and first-hop security features, such as port security, DHCP snooping, and dynamic ARP inspection. In addition, the candidates will need to show that they can apply to compute security effectively. Last but not least, they will have to answer the questions related to the application of storage security in reference to AAA and RBAC, fabric binding, and port security.

- **Network (25%)**

To answer the questions from this first topic, the test takers need to demonstrate that they have the skills and knowledge required to apply routing protocols (FHRP, PIM, MP-BGP, OSPFv2, OSPFv3), implement network configuration management, and implement infrastructure monitoring such as SPAN and NetFlow. This domain also comprises of skills such as describing software updates and their impacts, which means that the students should understand fabric setup, VMM, tenant policies, and access policies. Also, they will be required to answer the questions related to analyzing Cloud deployment and service models, analyzing packet flow (broadcast, multicast, and unicast), applying overlay protocols such as OTV and VXLAN EVPN, and applying switching protocols, for example, vPC, LACP, and RSTP+.

Best 350-601 : Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Exam Torrent Provide Three Versions for choosing

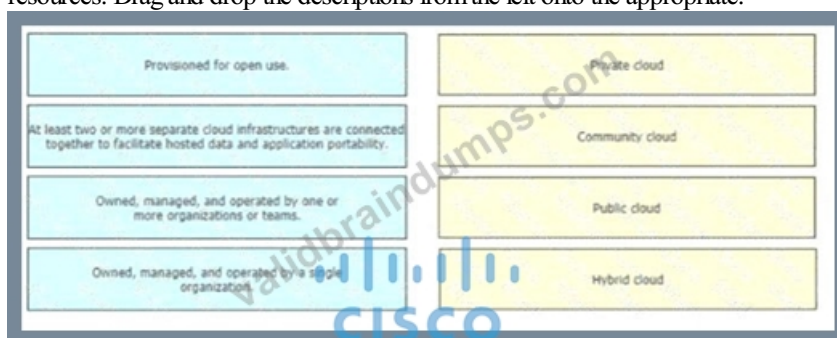

Before the clients purchase our 350-601 study practice guide, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our 350-601 exam materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our 350-601 useful test guide and the discounts. You can have a comprehensive understanding of our 350-601 useful test guide after you see this information.

Cisco 350-601 (Implementing Cisco Data Center Core Technologies) certification exam is a comprehensive test that evaluates an individual's knowledge and skills in the implementation of core data center technologies. 350-601 exam covers a diverse range of topics, including network design, automation, virtualization, storage, and security. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification validates the candidate's ability to provide solutions for modern data center challenges.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q215-Q220):

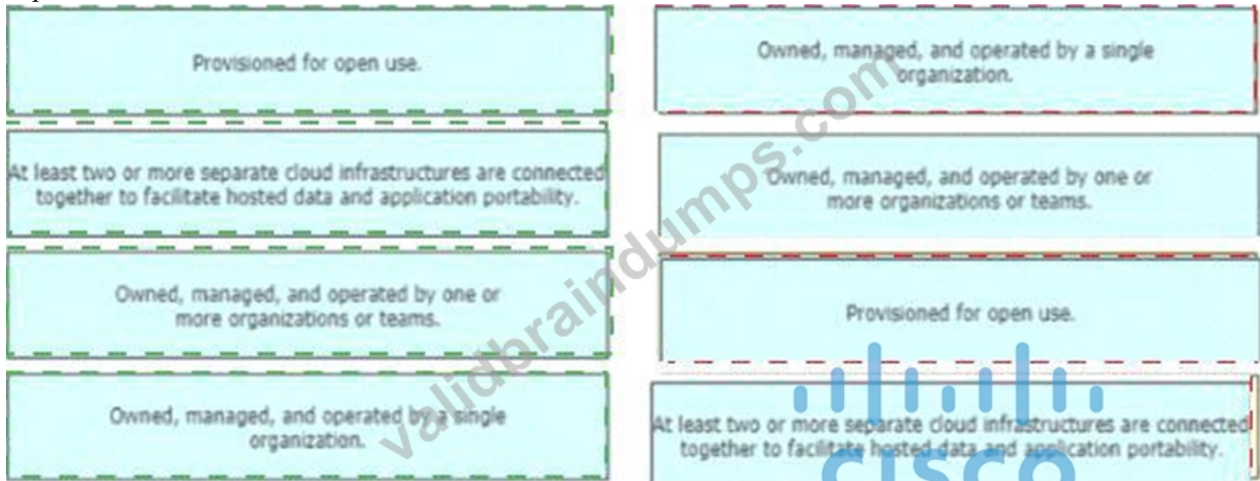

NEW QUESTION # 215

A network engineer is asked to describe the cloud infrastructure models from the perspective of their operation and access to resources. Drag and drop the descriptions from the left onto the appropriate.

Answer:

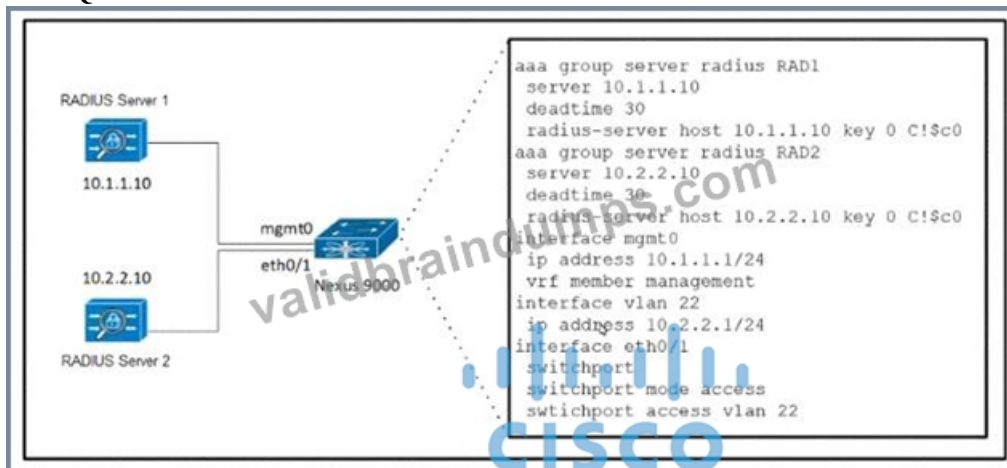

Explanation:

Explanation:

NEW QUESTION # 216

Refer to the exhibit. A user must be granted management access to the Cisco Nexus 9000 Series Switch using AAA servers. The RADIUS servers are configured to accept login requests from the same Layer 2 subnet of the switch. The user must be permitted to log in with these requirements:

- * RADIUS server 1 must be used to log in via a console.
- * RADIUS server 2 must be used to log in via SSH.

Which two actions meet these requirements?

- A. Set the RADIUS source interface to be mgmt0 for group RAD1 and VLAN 22 for group RAD2
- B. Change the dead timer for RAD1 and RAD2 to 1 minute.
- C. Configure the authentication login to use group RAD1 for console and group RAD2 for remote access.
- D. Enable command authorization to RAD1 and RAD2 for all successful logins.

Answer: C,D

NEW QUESTION # 217

A network engineer is adding a Cisco HyperFlex data platform to the Cisco intersight management portal. Which two components are required for Intersight to claim the Cisco HyperFlex data platform? (Choose two.)

- A. device public IP address
- B. device FQDN
- C. device ID
- D. device claim code
- E. device serial number

Answer: C,D

Explanation:

Step 1 In the Cisco Intersight, left navigation pane, select **ADMIN > Targets**.

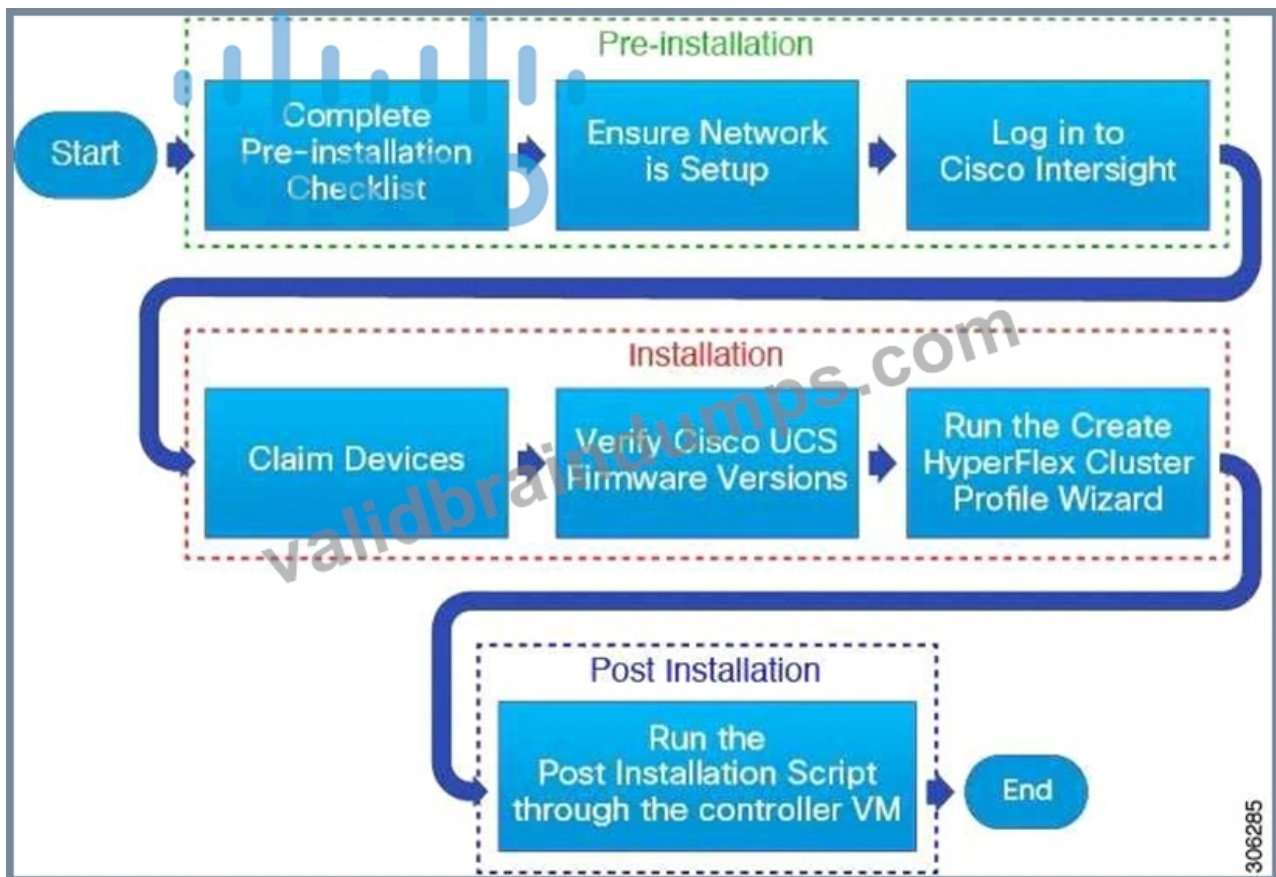

Step 2 In the **Targets** details page, click **Claim a New Target**.

Step 3 In the **Claim a New Target** wizard, select **Hyperconverged > Cisco HyperFlex Cluster** and complete the following fields:

Note You can locate the **Device ID** and the **Claim Code** information in:

- a. Cisco UCS Manager and Cisco IMC by navigating to **Admin > Device Connector**.
- b. Cisco HyperFlex by navigating to **HyperFlex Connect UI > Settings > Device Connector**.
- c. Cisco UCS Director by navigating to **Administration > Device Connector**.

UI Element	Essential Information
Device ID	Enter the applicable Device ID. • For a UCS Domain, use the serial number of the primary and subordinate FIs, in this format: (Serial number of FI-A & Serial number of FI-B). Example: [SAL1924GKV6&SAL1913CJ7V] • For a standalone server, use serial number. Example: NGTR12345 • For HyperFlex, use Cluster UUID. Example: xxxxxxxx-xxxx-xxxx-xxxx

https://www.cisco.com/c/en/us/td/docs/hyperconverged_systems/HyperFlex_HX_DataPlatformSoftware/HyperFlex_Installation_Guide_for_Intersight/b_HyperFlex_Installation_Guide_for_Intersight/b_HyperFlex_Installation_Guide_for_Intersight_chapter_011.html
<https://www.cisco.com/c/en/us/support/docs/hyperconverged-infrastructure/hyperflex-hx-dataplatform/214268-cisco-intersight-hyperflex-installatio.html>

NEW QUESTION # 218

A network engineer an EPLD update on the fan modules of a Cisco Nexus 7000 series switch. What is the impact if "y" is selected to continue?

```
switch# install all epld bootflash:n7000-epld.6.2.10.img parallel fan-module 1

WARNING!!!: Executing the "install all epld" command
may result in multiple modules going offline and
affect redundant links.

It is strongly recommended to use one of the following
when EPLD upgrade is attempted on a system carrying
production traffic.or Module EPLDs".

1) "install module <mod#> epld"
2) "install all epld <uri> parallel module <mod#>"
where <mod#> is on a single module

For EPLD upgrade best practices, please refer to the link-
http://www.cisco.com/en/US/solutions/switches/datacenter/sw/best\_practices/cli\_mntrguide/epld\_upgrade.html

Do you want to continue (y/n) ? [n] y
Copy complete, now saving to disk (please wait)...

EPLD image signature verification passed
Retrieving EPLD versions... Please wait...

Images will be upgraded according to following table:
Module Type EPLD Running-Version New-Version Upg-Required
-----
1 FAN Fan Controller (1) 0.002 0.006 Yes
1 FAN Fan Controller (2) 0.002 0.006 Yes

Programming Fan
Do you want to continue (y/n) ? [n] y
```

- A. The update does not complete successfully and the switch needs to power cycle.
- B. The switch is power cycled for the fan modules to start running the new code and prompts before each module is reloaded.
- C. The update is completed because it is nondisruptive and a power cycle is not required after the upgrade.
- D. The switch is power cycled for the fan modules to start running the code and it is auto reloaded.

Answer: C

NEW QUESTION # 219

An engineer must integrate Cisco ACI with VMware vCenter. The virtualization team configured the necessary port groups and assigned them to virtual machines through VMware vCenter. The final port group configuration must be protected from being changed by Cisco APIC.

Which action accomplishes these goals?

- A. Create the VMM domain with switch mode set to AVE.
- B. Set the VMM domain access mode to Read Only Mode.
- C. Configure the VMM domain with tag collection.
- D. Activate CDP and LLDP in the VMM domain.

Answer: B

NEW QUESTION # 220
