

350-601 PDF Questions | 350-601 Mock Exams

Question:

Acme is a small shipping company that has an existing enterprise network comprised of 2 switches;DSW1 and ASW1. The topology diagram indicates their layer 2 mapping. VLAN 40 is a new VLAN that will be used to provide the shipping personnel access to the server. For security reasons, it is necessary to restrict access to VLAN 20 in the following manner:

- Users connecting to ASW1's port must be authenticate before they are given access to the network. Authentication is to be done via a Radius server:
- Radius server host: 172.120.39.46
- Radius key: rad123
- Authentication should be implemented as close to the host device possible.
- Devices on VLAN 20 are restricted to in the address range of 172.120.40.0/24.
- Packets from devices in the address range of 172.120.40.0/24 should be passed on VLAN 20.
- Packets from devices in any other address range should be dropped on VLAN 20.

2025 350-601 PDF Questions Free PDF | Latest 350-601 Mock Exams: Implementing Cisco Data Center Core Technologies (350-601 DCCOR)

In order to help all people to pass the 350-601 exam and get the related certification in a short time, we designed the three different versions of the 350-601 study materials. We can promise that the products can try to simulate the real examination for all people to learn and test at same time and it provide a good environment for learn shortcoming in study course. If you buy and use the 350-601

study materials from our company, you can complete the practice tests in a timed environment, receive grades and review test answers via video tutorials. You just need to download the software version of our 350-601 Study Materials after you buy our study materials. You will have the right to start to try to simulate the real examination. We believe that the 350-601 study materials from our company will not let you down.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q72-Q77):

NEW QUESTION # 72

Refer to the exhibit.

```
<?xml version="1.0" encoding="UTF-8"?><imdata totalCount="1"><error  
code="403" text="Token was invalid (Error: Token timeout)"/></imdata>
```

An engineer configures a new application profile using REST API and receives this error message. Which method can be used before application profile can be configured?

- A. POST to aaaRefresh
- B. GET to aaaListDomains
- C. POST to aaaLogin
- D. POST to aaaLogout

Answer: C

NEW QUESTION # 73

An engineer must recover configuration on a Cisco MDS 9000 Series switch from a previous version that was backed up to bootflash and then verify the restoration.

Drag and drop the commands on the left to the correct order on the right.

copy bootflash:<configuration_file> running-config	Step 1
copy running-config startup-config	Step 2
show startup-config	Step 3
write erase	Step 4
reload	Step 5

Answer:

Explanation:

copy bootflash:<configuration_file> running-config	write erase
copy running-config startup-config	reload
show startup-config	copy bootflash:<configuration_file> running-config
write erase	copy running-config startup-config
reload	show startup-config

Explanation

write erase
reload
copy bootflash:<configuration_file> running-config
copy running-config startup-config
show startup-config

NEW QUESTION # 74

An engineer must configure HTTPS secure management for Cisco UCS Manager using a key ring named kr2016 and a key size of 1024 bits. The environment consists of a primary fabric interconnect named UCS-A and a secondary fabric interconnect named UCS-B. Which command sequence must be used to accomplish this goal?

- A.

```
UCS-B# scope security
UCS-B /security # keyring kr2016
UCS-B /security/keyring* # set mod mod1024
UCS-A /security/keyring* # commit-buffer
```
- B.

```
UCS-A# scope security
UCS-A /security # keyring name kr2016
UCS-A /security/keyring* # set size 1024
UCS-A /security/keyring* # commit-buffer
```

```
UCS-B# scope security
UCS-B /security # create keyring kr2016
UCS-B /security/keyring* # set size mod1024
UCS-A /security/keyring* # commit-buffer
```

- C.

```
UCS-A# scope security
UCS-A /security # create keyring kr2016
UCS-A /security/keyring* # set modulus mod1024
UCS-A /security/keyring* # commit-buffer
```

- D.

Answer: D

NEW QUESTION # 75

The engineer must configure SPAN on a Cisco Nexus 5000 Series Switch to get a capture of the traffic from these applications for an in-depth packet analysis.

Which two SPAN characteristics must be considered? (Choose two.)

- A. A SPAN source port cannot be a destination SPAN port.
- B. Only Ethernet, FC, vFC, port channel port types can be used as SPAN source ports.
- C. The rx/tx option is available for VLAN or VSAN SPAN sessions.
- D. The Ethernet, FC, vFC, port channel, SAN port channel can be used as SPAN source ports.
- E. SPAN source ports can be monitored in multiple SPAN sessions.

Answer: A,D

Explanation:

Section: Network

NEW QUESTION # 76

Which protocol does Cisco Hyperflex use to share data among nodes in a VMware vSphere environment?

- A. NFS
- B. CIFS
- C. SMB
- D. FCoE

Answer: A

Explanation:

Cisco HyperFlex uses the Network File System (NFS) protocol for sharing data among nodes in a VMware vSphere environment. NFS is a distributed file system protocol that allows a user on a client computer to access files over a network in a manner similar to how local storage is accessed. This protocol is commonly used in virtualized environments for ease of data sharing and management.

References: The use of NFS in Cisco HyperFlex environments is documented in Cisco's official installation guides and design documents
