ValidTorrent can provide professional and high quality products. It is the industry leader in providing IT certification information. To

selecte ValidTorrent is to choose success. ValidTorrent's Cisco 350-601 Exam Training materials is your magic weapon to success. With it, you will pass the exam and achieve excellent results, towards your ideal place.

Career Path

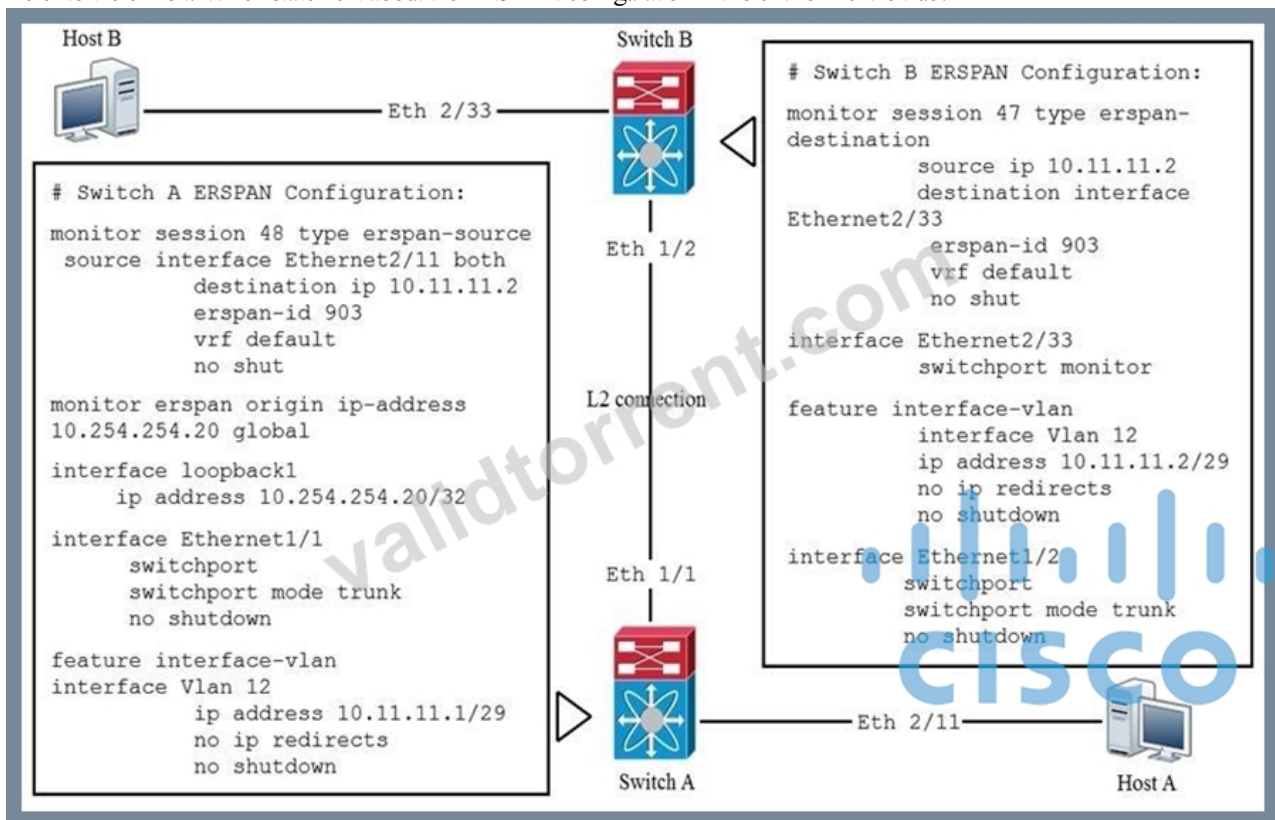

You can take the Cisco 350-601 Exam to qualify for as many as three certificates as mentioned above. So, the next path will depend on your goals. If you are at the intermediate level, the best certificate to opt for is Cisco CCNP Data Center. But if you take this exam to attain the CCIE Data Center accreditation, you may want to seek a new challenge by focusing on a completely different path since it has a lab exam.

The Implementing and Operating Cisco Data Center Core Technologies (350-601 DCCOR) exam is a prerequisite for obtaining the Cisco Certified Specialist – Data Center Core certification. It is also a part of requirements for the following certificates: CCNP Data Center as well as CCIE Data Center. This test measures the knowledge and skills of the professionals required for the implementation of key data center technologies, including compute, network, automation, storage network, and security.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q278-Q283):

NEW QUESTION # 278

Refer to the exhibit. Which statement about the ERSPAN configuration in this environment is true?

- A. Host B is the source ofERSPAN spanned traffic and host A is the traffic analyzer.
- B. The session number of the source ofERSPAN spanned traffic must have a session ID of 47 for the traffic analyzer to receive the traffic.
- C. The session number of the source ofERSPAN spanned traffic must have a session ID of 48 for the traffic analyzer to receive the traffic.
- D. Host A is the source ofERSPAN spanned traffic and host B is the traffic analyzer.

Answer: D

Explanation:

The following factors are applicable while using ERSPAN as a local SPAN:

Both sessions have the same ERSPAN ID.

Both sessions have the same IP address. This IP address is the router's own IP address; that is, the loopback IP address or the IP address configured on any port.

NEW QUESTION # 279

What is the impact of updating the firmware packages of a service profile that is associated to a Cisco B-Series server if no maintenance policy is configured on the service profile?

- A. The update is applied at the next reboot of the server.
- B. A user-acknowledged reboot of the servers is required.
- C. The server reboots as soon as the changes are saved.
- D. A fault is raised for a maintenance policy to be applied.

Answer: A

Explanation:

When no maintenance policy is configured on a service profile in Cisco UCS Manager, firmware updates to the service profile do not trigger an immediate reboot. Instead, the update is applied the next time the server is rebooted. This behavior allows the firmware updates to take effect without disrupting the server's current operation.

NEW QUESTION # 280

An engineer must configure a control plane policy on a Cisco Nexus 9000 Series Switch that is located at IP 192.168.20.1 that moots those requirements Only HTTP, RDP, and ICMP traffic is permitted from subnet 192.168.10.0/24.

The committed information rate must be 54000 pps.

The burst size must be 128 packets.

Any other traffic must be dropped.

Drag and drop the code snippets from the bottom onto the blanks in the code on the top to complete the configuration. Not all code snippets are used

The image shows a Cisco configuration interface with a code editor and a list of code snippets to be dragged into the editor. The code editor contains the following configuration:

```
ip access-list permithosts
 permit tcp 192.168.10.0/24
 permit tcp 192.168.10.0/24 host 192.168.20.1 eq 3389
 permit icmp 192.168.10.0/24 host 192.168.20.1

class-map type control-plane match-any hostscmap
 match

policy-map type control-plane hostscmap
 police cir 54000 pps bc 128 packets
```

The code snippets available for dragging are:

- host 192.168.20.1 eq 3389
- class hostscmap
- conform transmit violate drop
- access-group name permithosts
- class permithosts
- conform transmit violate drop

Answer:

Explanation:

NEW QUESTION # 281

What are two requirements when planning a Cisco HyperFlex All Flash standard cluster installation using three HX240c M5 servers? (Choose Two)

- A. The servers must be discovered, unassociated, and connected to each fabric interconnect.
- B. If the Jumbo MTU option in the HyperFlex installer is enabled, then jumbo frames must also be enabled on the upstream switches.
- C. The hypervisors must be installed to Cisco FlexFlash SD cards.
- D. The cluster deployment type must support a mix of HDD and SS
- E. If the Jumbo MTU option in the HyperFlex installer is enabled, then jumbo frames do not have to be enabled on the upstream switches.

Answer: A,B

Explanation:

https://www.cisco.com/c/en/us/td/docs/hyperconverged_systems/HyperFlex_HX_DataPlatformSoftware/AdminGuide/3_5/b_HyperFlexSystems_AdministrationGuide_3_5/b_HyperFlexSystems_AdministrationGuide_3_5_chapter_01111.html

NEW QUESTION # 282

Which feature of Cisco Nexus Dashboard permits users to switch between site controllers of Cisco ACI?

- A. multifactor authentication
- B. air-gap support
- C. cloud-site onboarding
- D. single sign-on

Answer: C
