Free Cisco 350-701 Exam & 350-701 Exam Questions Vce

BraindumpQuiz Implementing and Operating Cisco Security Core Technologies (350-701) questions in three formats are the go-to source for successful and quick preparation. Three formats of our study material are Cisco 350-701 exam PDF questions, desktop practice test software, and web-based 350-701 practice test. The philosophy behind offering these formats is simple: to create a world-class learning material that can help candidates achieve their Implementing and Operating Cisco Security Core Technologies (350-701) preparation objectives. With the help of 350-701 exam questions in three formats, you can prepare successfully for the test according to your style.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q322-Q327):

NEW QUESTION # 322

What do tools like Jenkins, Octopus Deploy, and Azure DevOps provide in terms of application and infrastructure automation?

- A. cloud application security broker
- B. continuous integration and continuous deployment

- C. container orchestration
- D. compile-time instrumentation

Answer: B

NEW QUESTION # 323

Which two commands are required when configuring a flow-export action on a Cisco ASA? (Choose two.)

- A. flow-export event-type
- B. access-list
- C. flow-export template timeout-rate 15
- D. policy-map
- E. access-group

Answer: A,D

Explanation:

To configure a flow-export action on a Cisco ASA, you need to use the flow-export event-type command and the policy-map command. The flow-export event-type command specifies the type of events that trigger the export of NetFlow Security Event Logging (NSEL) records to a collector. The policy-map command creates or modifies a policy map that can be applied to one or more interfaces to specify a service policy. A service policy consists of a traffic class and one or more actions to be applied to the traffic class. One of the actions can be a flow-export action that matches the NSEL events and sends them to a collector. The other commands are not required for configuring a flow-export action. The access-list command creates or modifies an access list that can be used to filter traffic or match traffic classes, but it is not mandatory for a flow-export action.

The flow-export template timeout-rate command specifies how often the ASA sends the template to the collector, but it is not part of the flow-export action configuration. The access-group command applies an access list to an interface, but it is not related to the flow-export action. References:

NEW QUESTION # 324

Refer to the exhibit.

```
Sysauthcontrol          Enabled
Dot1x Protocol Version      3

Dot1x Info for GigabitEthernet1/0/12
-----
PAE                        = AUTHENTICATOR
PortControl                = FORCE_AUTHORIZED
ControlDirection          = Both
HostMode                   = SINGLE_HOST
QuietPeriod                = 60
ServerTimeout              = 0
SuppTimeout                = 30
ReAuthMax                  = 2
MaxReq                     = 2
TxPeriod                   = 30
```

Which command was used to display this output?

- A. show dot1x all
- B. show dot1x interface gi1/0/12

- C. show dot1x
- D. show dot1x all summary

Answer: A

NEW QUESTION # 325

An organization wants to secure users, data and applications in the cloud. The solution must be API-based and operate as a cloud-native CASB. Which solution must be used for this implementation?

- A. Cisco Firepower Next-Generation Firewall
- B. Cisco Cloud Email Security
- C. Cisco Umbrella
- **D. Cisco Cloudlock**

Answer: D

NEW QUESTION # 326

What is a commonality between DMVPN and FlexVPN technologies?

- A. FlexVPN and DMVPN use IS-IS routing protocol to communicate with spokes
- B. FlexVPN and DMVPN use the same hashing algorithms
- **C. IOS routers run the same NHRP code for DMVPN and FlexVPN**
- D. FlexVPN and DMVPN use the new key management protocol

Answer: C

Explanation:

In its essence, FlexVPN is the same as DMVPN. Connections between devices are still point-to-point GRE tunnels, spoke-to-spoke connectivity is still achieved with NHRP redirect message, IOS routers even run the same NHRP code for both DMVPN and FlexVPN, which also means that both are Cisco's proprietary technologies.
