Platform-App-Builder exam is designed to test your knowledge of the Salesforce platform and your ability to build custom applications that meet the needs of your organization.

Salesforce Certified Platform App Builder Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which three standard component types are available in the Lightning App Builder?

Choose 3 answers

- A. Report details
- B. Rich text
- C. Filter list
- D. Plain text
- E. Recent items

Answer: A,B,E

Explanation:

In the Lightning App Builder, the following standard components can be used to enhance the functionality of Lightning pages:

B . Rich text: Allows the inclusion of formatted text, links, and images on a page.

D . Report details: Enables embedding of specific report details directly on a page.

E . Recent items: Displays a list of recently accessed items relevant to the user.

Steps to add these components:

Open the Lightning App Builder via Setup → Edit Page or when creating a new Lightning page.

Drag and drop the Rich text, Report details, and Recent items components from the standard components section onto the page layout.

Configure each component as needed (e.g., selecting a specific report for the Report details component).

For more on using these components, refer to Salesforce's guide on Standard Lightning Components.

NEW QUESTION # 66

The app builder at Northern Trail Outfitters created a report type for opportunities with or without shipments.

The operations team wants to see the account rating information on the report.

What should the app builder do to fulfill this request?

- A. Change the account/opportunity relationship to a master/detail relationship.
- B. Use add fields related via lookup with the view set to opportunities.
- C. Add the Account Rating field to the opportunity record page.
- D. Change the primary object of the custom type to the Account object.

Answer: B

Explanation:

* Using 'Add Fields Related Via Lookup' in the report type configuration allows adding fields from the Account object to the Opportunity report, including the Account Rating. References:

* Salesforce Help - Custom Report Types

NEW QUESTION # 67

At Universal Containers, multiple departments utilize the Case object for different purposes. Some users submit cases for IT and HR requests. Other users provide customer support with case records. How can an App Builder enable different users to see different fields, based on the case type?

- A. Create different case record types for IT, HR and Customer Support. Assign different page layouts to each record type by role.
- B. Create different case record types for IT, HR and Customer Support. Assign different page layouts to each record type by

profile.

- C. Create different case field sets for IT, HR and Customer Support. Assign different field sets by role.
- D. Create different case field sets for IT, HR and Customer Support. Assign different field sets by profile.

Answer: B

NEW QUESTION # 68

The Service Manager provided the app builder with color code requirements for case age on open cases.

New cases populate a green circle

Day-old cases populate a yellow circle

Three-day-old cases populate a red circle

How should an app builder implement this requirement?

- **A. Formula Field**
- B. Lightning Web Component
- C. Quick Action
- D. Custom Button

Answer: A

Explanation:

A formula field is a read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change. You can use formula fields to display images based on certain conditions. In this case, a formula field can be used to display a green, yellow, or red circle image based on the case age.

NEW QUESTION # 69

Universal Containers manages leads in a Lead qualification queue where sales reps can accept ownership of the Lead. Campaign members are required to have a sales owner.

What validation rule should an app builder configure?

- A. AND(ISBLANK(Lead.Owner.Id))
- B. NOT(ISNEW() && ISBLANK(Lead.Owner:Queue.Id))
- **C. AND(ISNEW(), ISBLANK(Lead.Owner:User.Id))**
- D. NOT(ISBLANK(Lead.Owner:Queue.Id))

Answer: C

Explanation:

The validation rule should be AND(ISNEW(), ISBLANK(Lead.Owner:User.Id)). This rule will prevent saving a new lead record if the owner is not a user. This will ensure that campaign members have a sales owner.

Option A is incorrect because it will prevent saving any lead record if the owner is blank, which is not the requirement. Option B is incorrect because it will prevent saving an existing lead record if the owner is a queue, which is not the requirement. Option D is incorrect because it will prevent saving any lead record if the owner is a queue, which is not the requirement.
